Rudolf Steiner, 2014-09-04 Our contemporaries who wish to keep to a narrow minded and superficial outlook are annoyed to find that spiritual science continually seeks the whole picture that it has to create a bridge between the body and the soul and truly explores how the psyche becomes corporeal and the body becomes psychological How do the soul and the spirit live in human physical bodies In our materialistic age in which the very existence of the metaphysical is widely rejected such questions are rarely posed let alone addressed In this exceptional series of lectures Rudolf Steiner speaks in scientific detail about the connection of the subtle aspects of human nature our soul and spirit to our physical constitution At the heart of this course are the well loved Bridge lectures which appear in English for the first time in their wider context Steiner discusses the solid fluid air and warmth bodies and how these are connected with the various ethers the I and human blood He goes on to describe how ideals and ideas impact the various aspects of the human constitution how morality is a source of world creativity with moral thinking imbuing life into substance and will Moral ideas have a positive effect he says whereas theoretical ones have a negative impact In the realm of the moral a new natural world comes into being and thus the moral order and the natural order are intertwined This volume also features Steiner's classic lecture on the Isis legend and its renewal today as divine wisdom Sophia Other themes include the mystery of Christ as the connection between the spiritual and physical sun the permeation of the life of thought with will love and permeation of the life of will with thoughts wisdom the path to freedom and love and their importance in the universe the metamorphosis of head and limbs through successive lives on earth the threefold nature of the human form head thorax limbs the threefold nature of the soul thinking feeling will and the threefold nature of the spirit waking dreaming sleeping      *Does the World Exist?* Anna-Teresa

Tymieniecka, 2012-12-06 Does the World exist There would be no reason to resurrect this question of modernity from its historical oblivion were it not for the fact that recent evolution in science and technology impregnating culture makes us

wonder about the nature of reality of the world we are living in and of our status as living beings within it Thus great metaphysical subjacent queries are forcefully revived calling for new investigations to proceed in the light of the innumerable novel insights of science This collection presents a wealth of material toward an elaboration of a new metaphysical groundwork of the onto-poiesis phenomenology of life sought to effect such investigations The classic postulates of the metaphysics of reality those of necessity and certainty here find a new formulation Away from sclerotized ontological and cognitive assumptions and congenial with the views of contemporary science the understanding of reality of our world of life and of ourselves within it is to be sought in the existential onto-poietic ciphering of life Tymieniecka     The Life of Imagination Jennifer Anna Gosetti-Ferencei, 2018-10-30 Imagination allows us to step out of the ordinary but also to transform it through our sense of wonder and play artistic inspiration and innovation or the eureka moment of a scientific breakthrough In this book Jennifer Anna Gosetti Ferencei offers a groundbreaking new understanding of its place in everyday experience as well as the heights of creative achievement The Life of Imagination delivers a new conception of imagination that places it at the heart of our engagement with the world thinking acting feeling making and being Gosetti Ferencei reveals imagination's roots in embodied human cognition and its role in shaping our cognitive ecology She demonstrates how imagination arises from our material engagements with the world and at the same time endows us with the sense of an inner life how it both allows us to escape from reality and aids us in better understanding it Drawing from philosophy cognitive science evolutionary anthropology developmental psychology literary theory and aesthetics Gosetti Ferencei engages a spectacular range of examples from ordinary thought processes and actions to artistic scientific and literary feats to argue that like consciousness itself imagination resists reductive explanation The Life of Imagination offers a vital account of transformative thinking that shows how imagination will be essential in cultivating a future conducive to human flourishing and to that of the life around us     Search for Existence P.V. Rai, 2012-11-01 Search for Existence deals with the biological existential and philosophical search after the human soul The book refers to brain research quantum physics psychology and Vedic philosophy in support of the transcendental existence of the soul     Paideia Anna-Teresa Tymieniecka, 2013-04-17 The education of humanity is the key to the next century's culture its social and practical life The main concerns of education are perennial but the continuous flood of inventions the technological innovations that re shape life calls for a radically new appraisal of the situation such as only philosophy can provide Answering the call of humanity for the measure sense of proportion and direction that could re orient present and future education the phenomenology of life integral and scientific in a dialogue with the arts the sciences and the humanities proposes an onto-poietic model of life's unfolding as the universal paradigm for this re orientation Taking the Human Creative Condition as its Archimedean point it offers a unique context for a fresh investigation of the concerns of education both perennial and immediate     **Returning to Primordially Creative Thinking** Shuren Wang, 2018-05-02 This book identifies that Xiang thinking is the eidetic connotation and a fundamental

trait of traditional Chinese thinking offering insights of considerable methodological significance Xiang thinking is a mode of thinking different from conceptual thinking or idealized rational thinking and in a certain sense it is more primal In the past century particularly since 1949 the primary works on Chinese philosophical history have as a rule addressed the ancient Chinese tradition of philosophical ideas by virtue of the philosophies of Plato Descartes and Hegel methods that inherently challenge Chinese philosophical insights This has naturally led to the fact that the insights as such remained obscured This book starts to reverse this trend intending to help Chinese people understand and appraise themselves in a more down to earth fashion In addition it is particularly helpful to people of other cultures if they want to understand ancient Chinese philosophy and culture in a context of fresh and inspiring philosophical ideas By Zhang Xianglong      **Modern**

**Protestantism and Positive Law** Bradley Shingleton,2019-10-31 The nature and role of positive law has largely been neglected in recent Protestant theology and social ethics Modern Protestantism and Positive Law introduces and critically summarizes a tradition in Continental Protestant thought about human law drawing on writings of Barth Brunner Ellul Thielicke Wolf Pannenberg Huber and Kre many of which have not been translated into English The book argues that law is an essential political and social institution within developed societies one that is normative and dependent on an encompassing vision of justice but that also necessarily reflects the contemporary pluralism of those societies Modern Protestantism and Positive Law argues that theological and ethical perspectives on positive law developed by Protestant thinkers have a place in reflection on positive law provided they are conceived and expressed in a manner appropriately respectful of the diversity of contemporary opinion regarding the expression of religious perspectives in the public arena

Matthew Lipman and Ann Margaret Sharp Roberto Franzini Tibaldeo, 2023-03-14 This book explores the contribution to education contained in the theoretical work and teaching practice of Matthew Lipman 1923 2010 and Ann Margaret Sharp 1942 2010 Their long lasting cooperation gave rise to the well known Philosophy for Children P4C curriculum which is nowadays globally widespread P4C basically relies on the following innovations firstly the unprecedented connection between philosophy and childhood secondly the reframing of philosophy in practical viz not reductively theoretical terms thirdly the employment of philosophy to foster democracy and

moral capabilities through the development of children's thoughtfulness and autonomous thinking which would eventually result in empowering children's social abilities and increasing their self defence against consumerism propaganda and manipulation finally the stand against a strictly cognitivist approach to education More than just contextualizing these innovations in the coeval historical and social context the author shows that P4C's revolutionary stance on education relies on the fruitfulness of Lipman and Sharp's intellectual cooperation and on their manifold abilities as researchers teachers trainers communicators motivators and community builders The book analyzes their philosophical educational vision and the scholastic curriculum they developed jointly additionally it provides a critical appraisal of P4C's achievements as well as of its future perspectives
