Imagine That Exploring Makebelieve:

Mimesis as Make-Believe Kendall L. Walton, 1993-10-15 Representation in visual arts and fiction play an important part in our lives and culture Walton presents a theory of representation which illuminates its many varieties and goes a long way toward explaining its importance Walton's theory also provides solutions to thorny philosophical problems concerning the existence of fictitious beings *Art, Representation, and Make-Believe* Sonia Sedivy, 2021-06-06 This is the first collection of essays focused on the many faceted work of Kendall L Walton Walton has shaped debate about the arts for the last 50 years He provides a comprehensive framework for understanding arts in terms of the human capacity of make believe that shows how different arts visual photographic musical literary or poetic can be explained in terms of complex structures of pretense perception imagining empathy and emotion His groundbreaking work has been taken beyond aesthetics to address foundational issues concerning linguistic and scientific representations for example about the nature of scientific modelling or to explain how much of what we say is quite different from the literal meanings of our words Contributions from a diverse group of philosophers probe Walton's detailed proposals and the themes for research they open The essays provide an overview of important debates that have Walton's work at their core This book will be of interest to scholars and graduate students working on aesthetics across the humanities as well as those interested in the topic of representation and its intersection with perception language science and metaphysics *The Magic Of Make Believe* Lloyd Leon, 2025-04-12 Imagination is a wondrous gift that lives inside each of us waiting to be unleashed It is the colorful spark that transforms ordinary moments into extraordinary adventures When we close our eyes and let our minds wander we can soar through the skies like a bird dive into the depths of the ocean like a daring explorer or even become a brave knight defending a kingdom This power to create worlds from mere thoughts is what makes life so magical Unfortunately as we grow older many of us forget how to tap into this incredible ability often losing touch with the dreams and beliefs that once brought us joy

Models as Make-Believe Adam Toon, 2012-10-17 Scientists often try to understand the world by building simplified and idealised models of it Adam Toon develops a new approach to scientific models by comparing them to the dolls and toy trucks of children's imaginative games and offers a unified framework to solve difficult metaphysical problems and help to make sense of scientific practice The Philosophy of Fiction Patrik Engisch, Julia Langkau, 2022-10-14 This book presents new research on the crucial role that imagination plays in contemporary philosophy of fiction The first part of the book challenges the main paradigm set by Kendall Walton and Gregory Currie according to which there is a necessary connection between fiction and a prescription that we engage imaginatively with its content The contributors address the fundamental questions of how we can define fiction and especially whether we can define fiction in terms of imagination The second part focuses on a distinct but related question can we point to some distinctive experiential features of our engagement with fiction In the third part the focus lies on the cognitive value of fiction and on the role that imagination plays in that respect The chapters in

this part discuss the cognitive value of fiction with respect to issues such as the training of the faculty of imagination phenomenal experience empathy and the emotions The Philosophy of Fiction will be of interest to scholars and advanced students working in aesthetics philosophy of mind epistemology and literary studies Chapter 13 of this book is available for free in PDF format as Open Access from the individual product page at www.routledge.com It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Media and the Make-Believe Worlds of Children Maya Gotz, Dafna Lemish, Hyesung Moon, Amy Aidman, 2014-04-04 This volume attains a broader understanding of the role media plays in the development and flourishing of children's imaginations and creative abilities through research on children from several countries [Intuition, Imagination, and Philosophical Methodology](#) Tamar Szabó Gendler, 2013-07-18

Tamar Gendler draws together in this book a series of essays in which she investigates philosophical methodology which is now emerging as a central topic of philosophical discussions Three intertwined themes run through the volume imagination intuition and philosophical methodology Each of the chapters focuses in one way or another on how we engage with subject matter that we take to be imaginary This theme is explored in a wide range of cases including scientific thought experiments early childhood pretense thought experiments concerning personal identity fictional emotions self deception Gettier cases and the general relation of conceivability to possibility Each of the chapters explores in one way or another the implications of this for how thought experiments and appeals to intuition can serve as mechanisms for supporting or refuting scientific or philosophical claims And each of the chapters self consciously exhibits a particular philosophical methodology that of drawing both on empirical findings from contemporary psychology and on classic texts in the philosophical tradition particularly the work of Aristotle and Hume By exploring and exhibiting the fruitfulness of these interactions Gendler promotes the value of engaging in such cross disciplinary conversations in illuminating philosophical issues **Just So You**

Would Know Nona B. Watson, 2022-01-26 Bertha Lee Bethea a girl raised by a grandmother who was once a slave adapted to a new way of life in the South during a time not long after slavery was abolished The African American experience in America is often times seen through the eyes of slavery and the Civil Rights Movement however we rarely highlight those unsung heroes and families who endured hard times as they transitioned from slavery through the Great Depression and persevered Bertha is one of many unsung heroes She gives a personal and detailed account of the state of the African American family during the 1920s 1930s and beyond She shares her life her heartaches her loves and her victories She speaks to families whose ancestors never had the opportunity to tell their stories to their children while simultaneously educating and broadening the knowledge of the reader Bertha exemplifies the epitome of a God fearing woman to her 12 children and over 170 grandchildren She leaves a sweet fragrance upon every life she touches Her story had to be told for it is an unassuming story of an extraordinary woman who at the age of ninety nine chronicled her life Just So You Would Know

Contemporary Interactive Environments Aaron Marcus, Elizabeth Rosenzweig, 2020-07-10 This book constitutes the refereed proceedings of the 9th International Conference on Design User Experience and Usability DUXU 2020 held as part of the 22nd International Conference on Human Computer Interaction HCII 2020 in Copenhagen Denmark in July 2020 The conference was held virtually due to the COVID 19 pandemic From a total of 6326 submissions a total of 1439 papers and 238 posters has been accepted for publication in the HCII 2020 proceedings The 50 papers included in this volume were organized in topical sections on interactions in intelligent and IoT environments usability aspects of handheld and mobile devices designing games and immersive experiences and UX studies in automotive and transport *The Case For Make Believe* Susan Linn, 2009-07-01 In *The Case for Make Believe* Harvard child psychologist Susan Linn tells the alarming story of childhood under siege in a commercialized and technology saturated world Although play is essential to human development and children are born with an innate capacity for make believe Linn argues that in modern day America nurturing creative play is not only countercultural it threatens corporate profits A book with immediate relevance for parents and educators alike *The Case for Make Believe* helps readers understand how crucial child s play is and what parents and educators can do to protect it At the heart of the book are stories of children at home in school and at a therapist s office playing about real life issues from entering kindergarten to a sibling s death expressing feelings they can t express directly and making meaning of an often confusing world In an era when toys come from television and media companies sell videos as brain builders for babies Linn lays out the inextricable links between play creativity and health showing us how and why to preserve the space for make believe that children need to lead fulfilling and meaningful lives Thinking about Stories Samuel Lebens, Tatjana von Solodkoff, 2023-10-31 *Thinking About Stories* is a fun and thought provoking introduction to philosophical questions about narrative fiction in its many forms from highbrow literature to pulp fiction to the latest shows on Netflix Written by philosophers Samuel Lebens and Tatjana von Solodkoff it engages with fundamental questions about fiction such as What is it What does it give us Does a story need a narrator And why do sad stories make us cry if we know they aren t real The format of the book emulates a lively verbal exchange each chapter has only one author while the other appears spontaneously in dialogues in the text along the way raising questions and voicing criticisms and inviting responses from their co author This unique format allows readers to feel like they are a part of the conversation about the philosophical foundations of some of the fictions in their own lives Key Features Draws on a wide range of types of narrative fiction from Harry Potter to *Breakfast of Champions* to *Parks and Recreation* Explores how fiction despite its detachment from truth is often best able to teach us important things about the world in which we live Concludes by asking in the final chapter whether we all might be fictions Includes bibliographies and suggested reading lists in each chapter *Aesthetics and the Philosophy of Art* Peter Lamarque, Stein Haugom Olsen, 2018-09-11 For over fifty years philosophers working within the broader remit of analytic philosophy have developed and refined a substantial body of work in aesthetics and the philosophy

of art curating a core foundation of scholarship which offers rigor and clarity on matters of profound and perennial interest relating to art and all forms of aesthetic appreciation Now in its second edition and thoroughly revised *Aesthetics and the Philosophy of Art The Analytic Tradition An Anthology* captures this legacy in a comprehensive introduction to the core philosophical questions and conversations in aesthetics Through 57 key essays selected by leading scholars Peter Lamarque and Stein Haugom Olsen this anthology collects modern classics as well as new contributions on essential topics such as the identification and ontology of art interpretation values of art art and knowledge and fiction and the imagination New to this edition are selections which treat aesthetic experience more widely including essays on the aesthetics of nature and aesthetics in everyday life Other carefully chosen pieces analyze the practice and experience of specific art forms in greater detail including painting photography film literature music and popular art such as comics This bestselling collection is an essential resource for students and scholars of aesthetics designed to foster a foundational understanding of both long standing and contemporary topics in the field

Make Believe in Film and Fiction K. Kroeber, 2006-05-12 This study provides the first detailed contrast between the experiences of reading a novel and watching a movie Kroeber shows how fiction evokes morally inflected imagining and how movies reveal through magnification of human movements and expression subjective effects of complex social changes

The Paradoxes of Modernity Zachary Simpson, 2022-05-10 A paradox lies at the heart of modernity the simultaneous demand to create ideas to make us better humans and communities along with the contrary imperative that we criticize all ideals especially the ones we have created In philosophy we see this paradox most acutely in figures like Immanuel Kant who states that we cannot know the essence of things and yet we must retain old ideas God freedom and the soul in order to become better and more ethical humans Or in Friedrich Nietzsche whose eternal recurrence a self created myth whose sole purpose is to get us to see the value in the everyday This basic scheme belief and un belief is one of the fundamental elements of modernity manifesting itself in the philosophies of Herbert Marcuse and Michel Foucault along with the theologies of Blaise Pascal C S Lewis William James Sallie McFague and Philip Clayton How do we live out the values we know to be constructions This question holds captive our ability to solve public goods problems and make our lives more meaningful Instead of seeing this paradox of modernity as self deception or bad faith Zachary Simpson employs cognitive and social scientific research to explain how best to realize values that we know to be false through art community and ritual In Simpson s account the values we construct must conform to narrative be reinforced through community and habituated through ritual And yet modernity has also undermined collectivity and ritual Thus arises the second paradox of modernity the best tools we have for realizing values are those which devalue the individual modern subject The last part of the book attempts to make three normative points regarding modernity First the modern individualist subject is insufficient to realize the very values and aspirations of modernity We must recognize that humans are collective and communal Second we cannot simply create values they must arise in communities and be realized through narrative and

ritual And third if we are to live meaningful lives as contemporary meta ethicists and positive psychologists argue then such lives must include art community and ritual as a way to affirm and reinforce one's values Let's Pretend is a statement about one of the dilemmas of the contemporary western world and how that dilemma is and might be resolved How do we believe in the values that we know will make a better world even if they are of our own making We must do so in part by becoming less modern by engaging with one another and imagining more The book should serve as both an essay in the history of Western thought as well as a constructive argument about the nature of the modern epoch and what resources we have to realize the central aspirations of modernity It aims to fill a critical lacuna in theoretical and philosophical approaches to modernity While most texts focus on either the need for created values or the need to remedy modern subjectivity few if any link the two problems together Moreover they do not ground their analyses in the social sciences and contemporary findings regarding the efficacy of narrative communal action and rituals The book is unique then because it asks a central question how do we believe in what we know to be false and because it answers this question using interdisciplinary methods that allow us to see the faultlines and paradoxes of our age *British Books in Print* ,1985 **Reimagining Apologetics** Justin Ariel Bailey,2020-10-13 How should one proclaim of the gospel of Jesus Christ in a secular age Seeking to infuse apologetics with an appeal to the imagination the aesthetic and the affective Justin Bailey engages with two examples of those who have done apologetics through the imagination George MacDonald and Marilynne Robinson **HCI Redux** Phil Turner,2016-08-12 This book explores the role of cognition in the field of human computer interaction HCI assessing how the field has developed over the past thirty years and discusses where the field is heading as we begin to live in increasingly interconnected digital environments Taking a broad chronological view the author discusses cognition in relation to areas like make believe and appropriation and places these more recent concepts in the context of traditional thinking about the psychology of HCI HCI Redux will appeal to undergraduate and postgraduate students and researchers in psychology the cognitive sciences and HCI It will also be of interest to all readers with a curiosity about our everyday use of technology **Exploring Child Behavior** Donald B. Helms,Jeffrey S. Turner,1986 **Volume 1** Richard Heinrich,Elisabeth Nemeth,Wolfram Pichler,David Wagner,2013-05-02 What is an image How can we describe the experience of looking at images and how do they become meaningful to us In what sense are images like or unlike propositions Participants of the 33rd International Wittgenstein Symposium philosophers as well as historians of art science and literature provide many stimulating answers Some of the contributions are dedicated to Wittgenstein's thoughts on images while others testify to the important role notions coined or inspired by Wittgenstein seeing as picture games and the dichotomy of saying and showing play in the field of picture theory today This first volume of the Proceedings of the 2010 conference addresses readers interested in the history and theory of images and in the philosophy of Wittgenstein
