Imaging in Molecular Dynamics Benjamin J. Whitaker, 2003 Charged particle imaging has revolutionised experimental studies of photodissociation and bimolecular collisions Written in a tutorial style by some of the key practitioners in the field this book gives a comprehensive account of the technique and describes many of its recent applications The book is split into two parts Part I is intended as a series of tutorials It explains the basic principles of the experiment and the numerical methods involved in interpreting experimental data Part II describes a number of different applications These chapters are more directly research oriented the aim being to introduce the reader to the possibilities for future experiments This comprehensive book will be of primary interest to researchers and graduate students working in chemical and molecular physics who require an overview of the subject as well as ideas for future experiments

Quantum Metrology with Photoelectrons Paul Hockett, 2018-04-20 Since the turn of the century the increasing availability of photoelectron imaging experiments along with the increasing sophistication of experimental techniques and the availability of computational resources for analysis and numerics has allowed for significant developments in such photoelectron metrology *Quantum Metrology with Photoelectrons Volume 1 Foundations* discusses the fundamental concepts along with recent and emerging applications The core physics is that of photoionization and Volume 1 addresses this topic The foundational material is presented in part as a tutorial with extensive numerical examples and also in part as a collected reference to the relevant theoretical treatments from the literature for a range of cases Topics are discussed with an eye to developing general quantum metrology schemes in which full quantum state reconstruction of the photoelectron wavefunction is the goal In many cases code and or additional resources are available online Consequently it is hoped that readers at all levels will find something of interest and that the material provides something rather different from existing textbooks
