Castro-Toscano,Oleg Sergiyenko,2024-07-17 This book provides the theory methodology and uses of scanning technologies for the application of autonomous systems The authors provide readers with an understanding of different technologies and methods to perform scanning technologies and their optimal application depending on the kind of autonomous system Also the book presents a compilation of original high quality contributions and research results from worldwide authors on

emerging new autonomous systems based on different scanning technologies This book is a valuable reference for engineering professionals and the scientific community *Artificial Intelligence Tools and Technologies for Smart Farming and Agriculture Practices* Gupta, Rajeev Kumar,Jain, Arti,Wang, John,Bharti, Santosh Kumar,Patel, Samir,2023-06-27 There are various factors that influence the quality and quantity of agricultural products among them weather conditions play the most significant role in agriculture More reliable weather forecasting enables farmers to make important planting and harvesting decisions that can enhance agricultural yield Thus there is a dire need to combine all available modern technologies and agricultural science for economic and environmentally sustainable crop production In this direction artificial intelligence AI serves as a budding solution in the domain of agriculture practices Artificial Intelligence Tools and Technologies for Smart Farming and Agriculture Practices discusses various tools and technologies that can be used in smart farming and agriculture practice and explores the role of different emerging technologies like the internet of things big data machine learning deep learning and AI from agricultural prospects Covering key topics such as farming pests soil and weeds this premier reference source is ideal for environmentalists farmers agriculturalists industry professionals researchers academicians scholars practitioners instructors and students *Image and Graphics Technologies and Applications* Yongtian Wang,Xueming Li,Yuxin Peng,2020-12-22 This book constitutes the refereed proceedings of the 15th Conference on Image and Graphics Technologies and Applications IGTA 2020 held in Beijing China in September 2020 The 24 papers presented were carefully reviewed and selected from 115 submissions They provide a forum for sharing progresses in the areas of image processing technology image analysis and understanding computer vision and pattern recognition big data mining computer graphics and VR as well as image technology applications The conference was held virtually due to the COVID 19 pandemic *Building Earth Observation Cameras* George Joseph,2015-01-28 Observing the Earth from the vantage point of space has emerged as an important means to plan our natural resources in a sustainable manner This book helps readers understand the tradeoffs in selecting various sensor parameters for electro optical sensors and how each parameter is optimally selected It provides a detailed account of the actions required to make a camera system space worthy The book includes case studies based on the IRS sensors and is a good companion for a system designer *Imaging System Technology for Remote Sensing* Mingzhi Wei,1998 This collection of works on imaging system technology for remote sensing includes individual papers on topics such as the design and fabrication of diffractive microlens arrays and the optical design for a multichannel scanning radiometer on board a geostationary meteorological satellite *Chemistry and Technology of Printing and Imaging Systems* P. Gregory,2012-12-06 Printing and imaging has a major impact on everyone From the obvious examples of newspapers magazines and comics through to photographs currency and credit cards and even the less obvious example of compact discs everyone is familiar with the end products of printing and imaging Until recently the major printing and imaging technologies have been impact printing and silver halide photography Important impact printing technologies

are offset lithography gravure flexography and screen printing All these technologies including silver halide photography are mature and have changed little over the past few decades In contrast the phenomenal growth of silicon chip technology over the past 15 years or so has spawned a new era of printing and imaging systems the so called non impact or electronic printers Not all the non impact printing technologies are of equal commercial importance Some like diazotype and conventional photolithography are mature and are declining in importance Other technologies though relatively new have not achieved notable commercial success Electro graphy and magnetography fall into this category The remaining tech nologies such as optical data storage the technology used in compact discs thermography the technology used in electronic photography ink jet printing and electrophotography are the non impact printing tech nologies that are both modern and which have achieved remarkable commercial success especially ink jet printing and electrophotography
