Impartiality In Context:

Impartiality in Context Shane O'Neill, 1997-01-01 Assesses critically the work of Rawls Walzer and Habermas and presents a theory of justice that responds to two senses of pluralism The Authoritarian Interlude Peter Marden, 2016-03-09 What do we value as a political virtue What are the core values of democracy in the modern era What is a democratic culture and can it coexist with a predatory capitalist corporatism Is democracy just about human rights What is the nature of public dissent These are some of the questions posed in this book as Peter Marden extends debates on democracy by critically examining the key role of values often associated with neo liberalism and the traditions of thought concerning public conceptions of democratic life Within the volume various normative arguments from prominent political theorists are addressed particularly those associated with deliberative approaches to the study of contemporary democracy Marden is motivated by an interest in the language and spirit of democracy as a values based culture not solely driven by technocratic devices but a genuine reframing of the values necessary to underpin any peculiar democratic practice Throughout the book examples are taken from the Australian United Kingdom and United States democratic experience post 9 11 to explore the dimensions of democratic culture the nuanced tensions between the individual as an autonomous reflective subject and conceptions of the common good *Tax Dispute Resolution in the European Union* Giovanni Consolo, 2024-12-09 Providing a thorough examination of the Tax Dispute Resolution Directive TDRD Giovanni Consolo addresses the uncertainties and challenges that may compromise the effectiveness of the dispute resolution procedure Additionally the book provides an in depth overview of the TDRD s integration within domestic procedures across EU Member States legal systems **Ethics, Integrity and Aptitude General Studies-IV (GS-4) Solved Papers: Civil Services Mains (2013-2019)** Team ARSu, 2020-01-21 This book contains model answers to the questions and case studies asked in General Studies IV GS 4 Civil Services Mains Paper from 2013 to 2019 with detailed information on the background framework of the question likely answer It is important to note that as a subject in Civil Services Examination GS 4 is the only subject where we have comparatively well defined syllabus and paper pattern Because of this each individual can score good marks in the paper with lesser efforts as compared to other General Studies Papers i e if you dedicate 15 20 days to this subject you will not just learn about the complete subject but you can score much more as compared to other General Studies paper as they require much more time because of their dynamic nature If we consider the previous year question Papers of General Studies IV the questions were divided into two parts as 1 Theory based Questions based on the theoretical aspects of the ethics and 2 Case Studies based on the actual or probable life situations The answers are divided into two portions with first one detailing about the framework of the answer or background of the question giving details about the basic idea of the question or the form of case study The second part is the model answer giving wider inputs on the question We hope that wider considerations will help the reader in understanding the question and how to structure the answer based on the

question A Continuation of Politics by Other Means , The Current State of Domain Name Regulation Konstantinos Komaitis,2010-07-12 This book evaluates the behaviour of domain names within the rule of law as well as their regulatory frameworks Drawing on experience from various jurisdictions the book determines the property nature of domain names and suggests solutions as to how the regulation of domain names can be reformed *Normative Justification of a Global Ethic* Uchenna B. Okeja,2013 The focus of this book is the normativity of global ethic Over the years different cultures and civilizations have been brought closer than never before by globalization This trend has both its negative and positive dimensions Overall the main problem of this present trend of societal organization and human interaction called globalization is a moral issue namely the question how should we treat one another Okeja s global ethic seeks to answer this question It underscores that we should treat one another in our current age of globalization in accordance with the Golden Rule principle The suggestion of this ethic is therefore that we should not treat others the way we would not want to be treated This sounds simple enough The problem however is that it is not exactly clear what this principle of moral conduct would suggest in both simple and complex moral situations Most importantly it is not clear why it is reasonable to treat people the way we would not want to be treated Why in other words should we act in accordance with the Golden Rule principle What is the justification of the demand the Golden Rule makes on us This book answers these and other questions about the normative plausibility of the Golden Rule and thus global ethic from the comparative perspective of ethics in African philosophy It analyzes three stages of the possible normative justification of the moral imperative of global ethic and proposes a deliberative form of justification **Being Apart from Reasons** Cláudio Jr. Michelon,2006-04-23 Being Apart from Reasons deals with the question of how we should go about using reasons to decide what to do More particularly the book presents objections to the most common response given by contemporary legal and political theorists to the moral complexity of decision making in modern societies namely the attempt to release public agents from their argumentative burden by insulating a particular set of reasons from the general pool of reasons and assigning the former systematic priority over all other reasons That strategy is apparent both in Rawls claim that reasons concerning the right are systematically prior to reasons concerning the good and in Raz s claim that pre emptive reasons are systematically prior to first order reasons The same strategy is also instantiated by certain arguments for the procedural value of law such as Jeremy Waldron s In the book each of those arguments for the insulation of reasons is objected to in order to defend the thesis the reasoning by public agents must always be as comprehensive as possible The remaining chapters object to those arguments mentioned above which aim at justifying the exclusion of certain reasons from public agents decision making Contextual Subjects Robert Leckey,2008-02-16 Law and legal discourse both presuppose and produce legal subjects Views on the nature of the legal subject will constantly shift therefore with changes in the law Contextual Subjects argues that a new view of the legal subject has indeed emerged and that it is now embedded in the social context and relationships This claim is developed

through a contrast of Canadian family law and administrative law as it was in the mid twentieth century and as it is today Robert Leckey argues that it is not only the subject that is contextual Legal discourse and adjudication have also become more contextual making family law and administrative law themselves contextual subjects Leckey bolsters this argument through the use of relational theory a rich strand of feminist political theory that advocates a contextual method and seeks to promote constructive relationships that enable relational autonomy Developments in family law and administrative law therefore exemplify the contextualism called for by relational theorists Leckey points to the importance of contextualization but he is not uncritical of relational theory insisting that it should articulate more forcefully its normative vision of good relationships and offer clear recommendations in contested areas Contextual Subjects is the most thorough and sustained application of relational theory to legal examples to appear to date It is unique in Canadian legal scholarship for the way it pairs family law and administrative law and within legal scholarship in English for its integration of common law and civil law

Difference Iris Marion Young, Danielle S. Allen, 2011-09-11 In this classic work of feminist political thought Iris Marion Young challenges the prevailing reduction of social justice to distributive justice The starting point for her critique is the experience and concerns of the new social movements that were created by marginal and excluded groups including women African Americans and American Indians as well as gays and lesbians Young argues that by assuming a homogeneous public democratic theorists fail to consider institutional arrangements for including people not culturally identified with white European male norms Consequently theorists do not adequately address the problems of an inclusive participatory framework Basing her vision of the good society on the culturally plural networks of contemporary urban life Young makes the case that normative theory and public policy should undermine group based oppression by affirming rather than suppressing social group differences Provided by publisher

Judicial Power and Strategic Communication in Mexico Jeffrey K. Staton, 2010-03-22 Although they are not directly accountable to voters constitutional court judges communicate with the general public through the media In Judicial Power and Strategic Communication in Mexico Jeffrey K Staton argues that constitutional courts develop public relations strategies in order to increase the transparency of judicial behavior and promote judicial legitimacy Yet in some political contexts there can be a tension between transparency and legitimacy and for this reason courts cannot necessarily advance both conditions simultaneously The argument is tested via an analysis of the Mexican Supreme Court during Mexico's recent transition to democracy and also through a cross national analysis of public perceptions of judicial legitimacy The results demonstrate that judges can be active participants in the construction of their own power More broadly the study develops a positive political theory of institutions which highlights the connections between democratization and the rule of law
