Swagerty,2012-10-29 Although some have attributed the success of the Lewis and Clark expedition primarily to gunpowder and gumption historian William R Swagerty demonstrates in this two volume set that adopting Indian ways of procuring processing and transporting food and gear was crucial to the survival of the Corps of Discovery The Indianization of Lewis and Clark retraces the well known trail of America's most famous explorers as a journey into the heart of Native America a case study of successful material adaptation and cultural borrowing Beginning with a broad examination of regional

demographics and folkways Swagerty describes the cultural baggage and material preferences the expedition carried west in 1804 Detailing this baseline reveals which Indian influences were already part of Jeffersonian American culture and which were progressive adaptations the Corpsmen made of Indian ways in the course of their journey Swagerty's exhaustive research offers detailed information on both Indian and Euro American science medicine cartography and cuisine and on a wide range of technologies and material culture Readers learn what the Corpsmen wore what they ate how they traveled and where they slept and with whom before during and after the return Indianization is as old as contact experiences between Native Americans and Europeans Lewis and Clark took the process to a new level accepting the hospitality of dozens of Native groups as they sought a navigable water route to the Pacific This richly illustrated interdisciplinary study provides a unique and complex portrait of the material and cultural legacy of Indian America offering readers perspective on lessons learned but largely forgotten in the aftermath of the epic journey

**Fur, Fortune, and Empire: The Epic History of the Fur Trade in America** Eric Jay Dolin, 2010 For all of fur's contentious position in American culture today historian Eric Jay Dolin shows its centrality in our nation's ever surprising history He argues that the trade in animal skins turned colonial America into a tumultuous frontier where global powers battled for control From the seventeenth century right on up to the Gilded Age the developed world's appetite for fur made the new continent with its wealth of fur bearing wildlife a seemingly inexhaustible resource The result was a major boost in the evolution of the colonies into a powerful new player on the world stage Dolin sheds insight on the ways the fur trade created international tensions in New England the Great Lakes and in the expanding West Fur traders were often the first white men to map major rivers forests and mountains then soon pushed Native Americans off their lands as John Jacob Astor's American Fur Company attempted to monopolize the West From publisher description

*Acts of Discovery* Albert Furtwangler, 1993 Meriwether Lewis

and William Clark wove science and raw adventure together in their journals as they blazed a trail from St Louis to the Pacific Now with fresh information drawn from many fields Albert Furtwangler mines those journals for valuable insights into western American history as well as the process of discovery Acts of Discovery argues that Lewis and Clark surpassed the enlightened instructions given to them by President Thomas Jefferson They made a literal large scale experiment probing the interior of a continent and weighing information that eventually would supersede the science the politics and even the artistic ideals of Jefferson and his age Drawing on a background of interdisciplinary learning Furtwangler illuminates the achievements of Lewis and Clark as naturalists navigators and diplomats who faced ever new surprises as they worked their way west He shows that their journals trace two very different patterns at the same time as records of modern scientific reasoning and as a narrative of epic deeds in an American epic setting Furtwangler also attempts to define Lewis and Clark s place in American history He examines some ironic outcomes of westward expansion and conquest and brings out the peculiar courage of explorers who were the first and almost the last to cross the continent by pulling their way up the Missouri He also compares Lewis and Clark s discoveries to those of other generations from George Washington s early years as a surveyor of the new American interior to the Apollo moon landings discussing them in light of questions about progress posed by Francis Bacon Henry Adams and modern experimental scientists

**Utah Historians and the Reconstruction of Western History** Gary Topping, 2003 Among historians of Utah and the American West few names have greater resonance than Bernard DeVoto Dale Morgan Juanita Brooks Wallace Stegner and Fawn Brodie Each of these writers made enduring contributions not only to our knowledge of the American West but also to our view of the region and its history In many ways their writing set the standard for scholarship and interpretation and their influence is still felt today Yet they were not flawless As Gary Topping explains in this the first comprehensive appraisal of their work each had serious shortcomings DeVoto and Stegner master storytellers distorted their histories with excessive use of literary and artistic techniques Morgan the thorough researcher failed to see larger contexts and interpretive possibilities Brooks courageous in finding damning new information on the Mountain Meadows massacre stopped short of drawing conclusions that might alienate her from her fellow Mormons and Brodie psychobiographer extraordinaire nonetheless succumbed to reading too much into the lives of her subjects based on her own emotions and conflicts All five writers experienced Mormon Utah in the formative stages of their lives and whether they wanted to or not fashioned their work on the American West under that indelible influence Topping shows ultimately how despite weaknesses each created exemplary models of diligent research and narrative elegance while establishing new traditions in western historical scholarship

**Encounters in Avalanche Country** Diana L. Di Stefano, 2013-11-01 Every winter settlers of the U S and Canadian Mountain West could expect to lose dozens of lives to deadly avalanches This constant threat to trappers miners railway workers and their families forced individuals and communities to develop knowledge share strategies and band together as they tried to survive the extreme conditions of

avalanche country The result of this convergence author Diana Di Stefano argues was a complex network of formal and informal cooperation that used disaster preparedness to engage legal action and instill a sense of regional identity among the many lives affected by these natural disasters Encounters in Avalanche Country tells the story of mountain communities responses to disaster over a century of social change and rapid industrialization As mining and railway companies triggered new kinds of disasters ideas about environmental risk and responsibility were increasingly negotiated by mountain laborers at the elite levels among corporations and in socially charged civil suits Disasters became a dangerous crossroads where social spaces and ecological realities collided illustrating how individuals groups communities and corporate entities were all tangled in this web of connections between people and their environment Written in a lively and engaging narrative style Encounters in Avalanche Country uncovers authentic stories of survival struggles frightening avalanches and how local knowledge challenged legal traditions that defined avalanches as acts of god Combining disaster mining railroad and ski histories with the theme of severe winter weather it provides a new and fascinating perspective on the settlement of the Mountain West
