shows how matching each use of a word against established contextual patterns plays a large part in determining the meaning of an utterance His goal is to develop a coherent and practical lexically driven theory of language that takes into account the immense variability of everyday usage and that shows that this variability is rule governed rather than random Such a theory will complement other theoretical approaches to language including cognitive linguistics construction grammar generative lexicon theory priming theory and pattern grammar **Irons in the Fire** Juliet McKenna,2019-08-06
