Imagery in Psychology Jon Roeckelein, 2004-05-30 Provides a current and comprehensive review of the literature on imagery in psychology and traces the evolution of the topic from ancient to modern times Columbia Accident Investigation Board: (vol. 5 issued in 3 parts: appendices G.1-G.9; G.10-G.12; G.13). Vol. 1 dated August 2003; Vols. 2-6 dated October 2003 United States. Columbia Accident Investigation Board, 2003 Engineering Geology for Society and Territory - Volume 5 Giorgio Lollino, Andrea Manconi, Fausto Guzzetti, Martin Culshaw, Peter Bobrowsky, Fabio Luino, 2014-08-25 This book is one out of 8 IAEG XII Congress volumes and deals with the theme of urban geology Along with a rapidly growing world population the wave of urban growth continues causing cities to swell and new metropolitan centers to emerge These global trends also open new ventures for underground city development Engineering geology plays a major role in facing the increasing issues of the urban environment such as finding aggregates for construction works providing adequate water supply and waste management solving building problems associated to geological and geomorphological conditions evaluating host rock conditions for underground constructions preventing or mitigating geological and seismic hazards Furthermore this book illustrates recent advancements in sustainable land use planning which includes conservation protection reclamation and landscape impact of open pit mining and alternative power generation The Engineering Geology for Society and Territory volumes of the IAEG XII Congress held in Torino from September 15 19 2014 analyze the dynamic role of engineering geology in our changing world and build on the four main themes of the congress environment processes issues and approaches The congress topics and subject areas of the 8 IAEG XII Congress volumes are 1 Climate Change and Engineering Geology 2 Landslide Processes River Basins 3 Reservoir Sedimentation and Water Resources 4 Marine and Coastal Processes Urban Geology 5 Sustainable Planning and Landscape Exploitation 6 Applied Geology for Major Engineering Projects 7 Education Professional Ethics and Public Recognition of Engineering Geology 8 Preservation of Cultural Heritage **Current perspectives on the mechanisms of auditory hallucinations in clinical and non-clinical populations** Johanna C. Badcock, Frank Larøi, Paul Allen, Kelly M. Diederer, 2014-03-07 There has been a recent surge of interest in auditory hallucinations AH in schizophrenia compared to those experienced by non clinical i e healthy individuals This interest stems in no small part from a keen awareness of the fact that progress in developing more effective treatments for AH in psychosis has been seriously hampered by our limited understanding of the cognitive and biological mechanisms involved The prevailing notion that AH in clinical and non clinical populations share the same features and underlying mechanisms the continuum hypothesis has been seriously challenged by a growing list of differences as well as similarities between these groups At the phenomenological level this is exemplified in the highly negative content of AH in patients and the markedly earlier age of onset of AH in non patients Similarly several recent studies point to significant differences in cognition language lateralization and possibly dopamine function between these groups These findings have

important implications for the design of future studies and raise considerable doubt about the adequacy of modelling the functional mechanisms of clinical AH on the basis of non clinical populations In short the time seems ripe to re evaluate the continuum hypothesis and provide a forum to present alternative perspectives on the functional pathways leading to AH in clinical and non clinical groups Such a forum is also timely in view of the renewed interest in AH in other non schizophrenic clinical groups again examining similarities and differences between such groups Preliminary studies for instance have shown that AH in certain clinical populations e g bipolar disorder borderline personality disorder dissociative disorder share similar phenomenological features with AH in schizophrenia However the implications of such findings are not fully understood and studies have not adequately examined potential differences between AH in these groups The goal of this Frontiers Research Topic therefore is take the opportunity to bring together research exploring differences and similarities in mechanisms of AH in clinical and non clinical groups and to stimulate the development of new explanatory models which explicitly link the phenomenological characteristics of AH with underlying mechanisms

*Dream Science* J. F. Pagel, 2014-02-05 Dreaming is the cognitive state uniquely experienced by humans and integral to our creativity the survival characteristic that allows for the rapid change and innovation that defines our species and provides the basis for our art philosophy science and humanity Yet there is little empiric or scientific evidence supporting the generally accepted dream based theories of neuroconsciousness Dream Science examines the cognitive science of dreaming and offers an evidence based view of the phenomenon Today such evidence based breakthroughs in the field of dream science are altering our understanding of consciousness Different forms of dreaming consciousness occur throughout sleep and dreamlike states extend into wake Each dream state is developed on a framework of memories emotions representational images and

electrophysiology amenable to studies utilizing emerging and evolving technology Dream Science discusses basic insights into the scientific study of dreaming including the limits to traditional Freudian based dream theory and the more modern evidence based science It also includes coverage of the processes of memory and parasomnias the sleep disturbance diagnoses related to dreaming This comprehensive book is a scientific exploration of the mind brain interface and a look into the future of dream science Provides a more evidence based approach than any other work on the market Single source of integrated information on all aspects of dream science makes this a critical time saving reference for researchers and clinicians Authored by one of the leaders in the field of dream research

### **Queer Histories and the Politics of Policing**

Emma K. Russell,2019-08-13 Despite ongoing challenges to the criminalisation and surveillance of queer lives police leaders are now promoted as allies and defenders of LGBT rights However in this book Emma K Russell argues that the surface inclusion of select LGBT identities in the protective aspirations of the law is deeply tenuous and conditional and that police recognition is both premised upon and reproductive of an imaginary of good queer citizens those who are respectable responsible and just like their heterosexual counterparts Based on original empirical research Russell presents a detailed analysis of the political complexities compromises and investments that underpin LGBT efforts to achieve sexual rights and protections With a historical trajectory that spans the so called decriminalisation era to the present day she shows how LGBT activists have both resisted and embraced police incursions into queer space and how with LGBT support police leaders have re crafted histories of violence as stories of institutional progress Queer Histories and the Politics of Policing advances broader understandings of the nature of police power and the shifting terrain of sexual citizenship It will be of interest to students and researchers of criminology sociology and law engaged in studies of policing social justice and gender and sexuality

### **Investigations Into the Phenomenology and the Ontology of the Work of Art**

Peer F. Bundgaard,Frederik Stjernfelt,2015-06-22 This book investigates the nature of aesthetic experience and aesthetic objects Written by leading philosophers psychologists literary scholars and semioticians the book addresses two intertwined issues The first is related to the phenomenology of aesthetic experience The understanding of how human beings respond to artworks how we process linguistic or visual information and what properties in artworks trigger aesthetic experiences The examination of the properties of aesthetic experience reveals essential aspects of our perceptual cognitive and semiotic capacities The second issue studied in this volume is related to the ontology of the work of art Written or visual artworks are a specific type of objects containing particular kinds of representation which elicit a particular kind of experience The research question explored is What properties in artful objects trigger this type of experience and what characterizes representation in written and visual artworks The volume sets the scene for state of the art inquiries in the intersection between the psychology and ontology of art The investigations of the relation between the properties of artworks and the characteristics of aesthetic experience increase our insight into what art is In addition they shed light on essential properties of human meaning making
