Imagining The Past:

Imagining the Past Colleen Manassa, 2013-10-25 Five hundred years before Homer immortalized the Trojan Horse the ancient Egyptians had already composed a tale of soldiers hiding Ali Baba like in baskets to capture a besieged city Shortly after the rise to power of the warrior pharaoh Ramesses II Egyptian authors began to write stories about battles and conquest However these stories were not set in the present but in the past they were the world's first works of historical fiction These literary recreations of past events which preserve fascinating mixtures of fact and fiction provide unparalleled information about topics as diverse as ancient Egyptian historiography religion and notions of humor and wit *Imagining the Past* is the first volume to provide complete translations and commentary for the historical fiction composed during Egypt's New Kingdom The four works include *The Quarrel of Apepi and Seqenenre* *The Capture of Joppa* *Thutmose III in Asia* *The Libyan Battle Story* An introduction explores Egyptian conceptions of the past the universe of historical and literary texts in New Kingdom Egypt and the definition of a new genre of Egyptian literature Extensive commentary and new translations appear within each chapter and a concluding analysis summarizes the audience and function of historical fiction as well as theology and historiography within the tales Despite the fragmentary nature of the papyrus copies the thorough research into the literary political and social context of each tale allows a modern reader to explore this forgotten literary subfield and appreciate the stories as works of historical fiction

Imagining the Past, Constructing the Future Maria C.D.P.

Lyra, Brady Wagoner, Alicia Barreiro, 2021-02-17 This book takes a sociocultural developmental and dialogical perspective to explore the constructive and interconnected nature of remembering and imagining Conceived as cognitive affective processes both emerge at the border of the person and his or her socio cultural world Memory is approached as a functional adaption to the environment using the resources of the past in preparation for action in the present Imagination is tightly related to memory in that both aim to escape the confines of the concrete here and now situation however while memory is primarily oriented to the past imagination looks to the future Both are embedded in the exchanges with the social and cultural milieu and thus theorizing them has relied on key ideas from Lev Vygotsky Frederic Bartlett and Mikhail Bakhtin Thus this book aims to integrate theories of remembering and imagining through rich empirical studies in diverse cultural settings and concerning the development of self and identity These two groups of studies compose the subparts that organize the book

Manassa,2013 *Staging the Archive* Ernst van Alphen,2014-11-15 Dedicated to art practices that mobilize the model of the archive *Staging the Archive* demonstrates the ways in which such archival artworks probe the possibilities of what art is and what it can do Through a variety of media methodologies and perspectives the artists surveyed here also challenge the principles on which the notions of organization evidence and documentation are built The earliest examples of the modern archival artwork were made in the 1930s but only since the 1960s have artists really embraced archival principles to inform structure and shape their works This includes practices that consist of archive construction archaeological investigation record keeping and the use of archived materials but also interrogations of the principles claims and effects of the archive *Staging the Archive* shows how artists read the concept of the archive against the grain questioning not only what the archive is and can be but what materials images or ideas can be archived Ernst van Alphen examines these archival artists and artworks in detail setting them within their social political and aesthetic contexts Exploring the works of Marcel Duchamp Marcel Broodthaers Christian Boltanski Annette Messager Fiona Tan and Sophie Calle among others he reveals how modern and contemporary artists have used and contested the notion of the archive to establish new relationships to history information and data **Gilbert Ryle** William E. Montoya, Vincent Ferré, 2015 Essays on the post modern reception and interpretation of the middle ages *Designing Futures* Saimir Shtylla, Marina Checa Olivas, Angeles Sánchez, Antonio Maffei, Claudio Sassanelli, 2025-02-01 This book is a compelling exploration into the integration of sustainability with creativity and technology It offers a cohesive journey from theoretical insights into practical applications across creative disciplines education and industries This book serves as a crucial guide for those looking to navigate the challenges of modern sustainability through innovative solutions By showcasing examples from 3D printing in education to sustainable practices in creative industries and the preservation of cultural heritage through digital innovation it highlights the transformative power of creativity in fostering a sustainable future Aimed at academics professionals and students this book is an invitation to engage innovate and contribute to the sustainability discourse in the creative sectors Temporal Asymmetries in Philosophy and Psychology Christoph Hoerl, Teresa McCormack, Alison Fernandes, 2022 Our attitudes towards an event may vary depending on whether the event has happened or has yet to take place Philosophers and psychologists explore such psychological past future asymmetries to reveal what kinds of asymmetries we exhibit and under what conditions and how they may reflect particular beliefs about time or features of time itself Seminar ,2003 The Psychology of Everyday Life James Drever, 1927 *A History of Modern Political Thought* Gary K. Browning, 2016 How are we to understand past political thinkers Is it a matter simply of reading their texts again and again Do we have to relate past texts of political thought to the contexts in which ideas were composed and in which the aims of past thinkers were formulated Or should past political theories be deconstructed so as to uncover not what their authors maintain but what the texts reveal In this book theories of interpreting past political thinkers are examined and the interpretive methods of a range of theories are reviewed including those of Hegel Marx Oakeshott Collingwood the Cambridge School Foucault Derrida and Gadamer The application of these theories of interpretation to notable modern political theorists Machiavelli Hobbes Locke Rousseau Kant Hegel Marx Bentham Mill Nietzsche and Beauvoir is then used as a way of understanding modern political thought and of assessing interpretive theories of past political thought The result is a book which sees the history of modern political thought as more than a procession of political theories but rather as a reflection on the meaning of past political thought and its interpretation It provides a way of reading the history of modern political thought in which the question of interpretation matters both for understanding how we interpret the past but also for considering what it means to undertake political thinking **The Oratorical Dictionary** John Newland Maffitt, 1835 **The Normative Status of Time Bias** Kristie Miller, 2024-12-10 This book empirically investigates the nature of time biases Many philosophers think that it is rationally permissible to prefer a life that is overall worse to one that is overall better as long as the badness of that life lies in the past rather than the future These philosophers think that it is rationally permissible to be time biased Time biased individuals differently value the wellbeing of their various selves in virtue of where those selves are located in time This book

focuses on three key kinds of time bias near present and future bias It presents a rich picture of the conditions under which we display these biases and it outlines several psychological explanations for them It then uses this new empirical research we conducted to inform arguments regarding the normative status of these biases At its heart it considers the question does having time biased preferences of one sort or another make us better off or worse off And it uses the answers to these questions to inform our theorising about whether we have reason either to have or to avoid having such preferences
