Impact Fee Programs A Survey Of Design And Administrative Issues:

Impact Fee Programs Joni L. Leithe, Matthew Montavon, 1990 **Impact Fees** Arthur C. Nelson, James C. Nicholad, Julian C. Juergensmeyer, 2017-11-08 This is the only impact fee book you ll need for the next decade or longer This comprehensive reference book updates the popular pioneering works on impact fees by introducing new methodologies concepts applications and theories The authors contend that it s time to go beyond narrowly defined impact fees to proportionate share development fees broadly applied to publicly provided facilities and services and their operation Impact fees are one time charges applied to new development to generate revenue for the construction or expansion of capital facilities outside the boundaries of the new development for system improvements engendered by the new development At least that was the traditional use of impact fees A generation ago they were generally not used legally for the operation maintenance repair alteration or replacement of capital facilities for social purposes such as affordable housing and daycare or for green purposes such as habitat preservation This book updates impact fee law practice and applications and breaks new ground by showing how the impact fee logic of proportionate share can be used for these and other purposes Through actual ordinances summaries of technical reports numerous case studies and model ordinances and codes readers will learn how to design and implement a proportionate share development fee program This is essential reading for anyone interested in impact fees *Impact Fees and the Role of the State* DIANE Publishing Company, 1995-06 Analyzes fee consequences and develops guidance for States in drafting enabling legislation for impact fees Recommends State standards and uniform procedures for local impact fee programs that will minimize effects on housing prices and also ensure adequate capital facilities to support growth Bibliography 9 tables and figures **A Guide to Impact Fees and Housing Affordability** Arthur C. Nelson, Liza K. Bowles, Julian C. Juergensmeyer, James C. Nicholas, 2012-06-22 Impact fees are one time charges that are applied to new residential developments by local governments that are seeking funds to pay for the construction or expansion of public facilities such as water and sewer systems schools libraries and parks and recreation facilities In the face of taxpayer revolts against increases in property taxes impact fees are used increasingly by local governments throughout the U S to finance construction or improvement of their infrastructure Recent estimates suggest that 60 percent of all American cities with over 25 000 residents use some form of impact fees In California it is estimated that 90 percent of such cities impose impact fees For more than thirty years impact fees have been calculated based on proportionate share of the cost of the infrastructure improvements that are to be funded by the fees However neither laws nor courts have ensured that fees charged to new homes are themselves proportionate For example the impact fee may be the same for every home in a new development even when homes vary widely in size and selling price Data show however that smaller and less costly homes have fewer people living in them and thus less impact on facilities than larger homes This use of a flat impact fee for all residential units disproportionately affects lower income residents The purpose of this guidebook is to help practitioners

design impact fees that are equitable It demonstrates exactly how a fair impact fee program can be designed and implemented In addition it includes information on the history of impact fees discusses alternatives to impact fees and summarizes state legislation that can influence the design of local fee programs Case studies provide useful illustrations of successful programs This book should be the first place that planning professionals public officials land use lawyers developers homebuilders and citizen activists turn for help in crafting or recrafting proportionate share impact fee programs

Traffic Impact Fees in Oregon Anthony M. Rufolo,1993 **Environmental Regulations and Housing Costs** Arthur C. Nelson,John Randolph,James M. McElfish,Joseph M. Schilling,Jonathan Logan,LLC Newport Partners,2012-06-22 Many communities across the nation still lack affordable housing And many officials continue to claim that affordable housing is an oxymoron Building inexpensively is impossible they say because there are too many regulations Required environmental impact statements and habitat protection laws they contend drive up the costs of construction But is this actually true In a comprehensive study of the question the authors of this eye opening book separate fact from myth With admirable clarity they describe the policy debate from its beginning review the economic theory trace the evolution of development regulation and summarize the major research on the topic In addition they offer their own research accompanied by a case study of two strikingly different Washington D C suburbs They also include results of focus groups conducted in Dallas Denver and Tucson The authors find that environmental regulatory costs as a share of total costs and processes are about the same now as they were thirty years ago even though there are far more regulations today They find too that environmental regulations may actually create benefits that could improve the value of housing Although they conclude that regulations do not appear to drive up housing costs more now than in the past they do offer recommendations of ways in which the processes associated with regulations including review procedures could be improved and could result in cost savings Intended primarily for professionals who are involved in or impacted by regulations from public officials planners and engineers to housing developers and community activists this book will provide useful insights and data to anyone who wants to know if and how American housing can actually be made affordable **Highway Research Abstracts** ,1994 **Land Conservation**
