STRATEGY IMPLEMENTATION PROBLEM Dr. Darmin A. Pella, The strategic planning is good but the implementation of the strategy is problematic that's the phrase we often hear Strategic planning can be good because we have abundant literature clarifies strategic planning in our scientific treasures On the other hand strategy implementation is problematic because the literature that clarifies the problem of implementing each strategy is scarce The book that discusses the problem of implementing strategy especially in the context of discussion based on research does not even exist yet To fill this tremendous gap is one of this book's objective After careful examination I can share that there are at least three entry points

if one wants to further understand strategy implementation The first entry point is understanding number of factors that support the implementation of a strategy where these factors must be studied mastered and possessed for the strategy to be successful The second entry point is understanding that there is a framework or model that must be followed if we want to be successful in implementing strategy The framework or model must be studied mastered and followed so that the strategies that have been made are correctly implemented and the results are successful The third entry point is to realize that there are a number of problems that are obstacles to the implementation of the strategy These inhibiting problems must be studied understood and overcome so that the strategy does not fail to implement and be successful Each entry point above requires understanding because it has its own complexity This book you are reading has a third point of entry This book helps you learn and understand the factors that hinder the implementation of the strategy so that your strategy does not fail or reverse its achievement This book helps you avoid failing to implement strategies that are very very easy to find in any organization Read this book to help you have systematics when deciphering what problems cause poor implementation of a strategy

Strategic Planning Edward Robertson, 2019-09-11 Why do so many strategic plans end up collecting dust Organizational leaders feel they should have good plans and they are right Private firms government agencies and non profits are all facing an uncertain future whether the task is to impress potential investors chart a path towards profitability or fight for funding Moreover lack of planning is shown to be among the top reasons for business failure And yet strategic planning if done at all is often a bland re hash of familiar issues It is frustrating when prepared plans set high expectations but then are not even implemented Embarrassingly the effort has produced nothing but a dust collector I have seen this problem first hand and solved it not only as a consultant but as a senior manager in public and private settings I facilitated the effective implementation of organization wide risk management programs praised by the provincial Auditor General As innovation specialist and director of strategic planning I helped lead a manufacturing firm to win the Chamber of Commerce Business of the Year Award It was knowledge hard won After years of study field research and dozens of client engagements I finally arrived at a refined and careful method and formulated it for publication to share with others I am convinced planners must follow a structured method that takes into account not only the different types and purposes of planning a distinction rarely made but also the principles of effective program implementation These success factors are proven in studies but do not seem to be part of management training And yet strategic planning properly done and executed can transform the culture and propel the organization to success Using this book you will gain clarity about exactly what you re trying to plan instead of mixing up types of plans focus the discussion and streamline the process feel confident that your planning steps are in the right order engage managers and staff build teams and transform a negative culture conquer the implementation gap link to the real business and reverse program failure This book is a fast read 70 pages complete with diagrams templates references quotes from industry practitioners and index Starting with an iron clad positive case for doing strategic planning I then show

the practical steps Take my advice too on the role of the planning champion and how to facilitate the process If you can organize and chair meetings and if you are motivated to move the organization ahead you can do this Strategic Planning Process Templates and Effective Implementation lists lower than the average price in the strategic planning category Show your colleagues staff and competitors you can do strategic planning the way it should be done Order it and start planning for success
