Environmental Taxes Kalle Määttä, 2006-01-01

Environmental taxes differ from each other according to the functions they serve and the manner in which they are implemented This study highlights the appropriateness of different kinds of environmental taxes against a rigorous framework of theory and case study evidence The purpose of this book is to analyse the way in which environmental taxes are categorized and which factors affect the effectiveness and efficiency of the different kinds of environmental taxes in practice This pragmatic approach is emphasized along with the multiplicity of regulatory problems such as At what level should the environmental tax rate be set What is the proper time schedule for introducing an environmental tax What are the most appropriate taxable characteristics and how should they be determined What activities should be exempt from environmental taxation How can tax relief be implemented These are only some of the regulatory problems explored in this study which also encompasses an examination of the theory of regulation The author argues that economists have often paid too little attention to the administrative and legal issues concerning the implementation of legislation such as environmental tax laws which are of course vital to the success of any potential policy Lawyers too have in turn neglected the theory of regulation which would assist in analysing problems in a future oriented way Environmental taxes will therefore be of great interest to a wide audience of environmental economists law and economics scholars as well as policymakers Back cover

principle in the form of correctional charges imposed on activities which have a demonstrably damaging effect on the quality of life or the environment. The other involves a more ambitious policy shift aiming to put taxation onto a different basis away from income and labour and onto resource depleting and environmentally damaging activities. By going further and directing the additional revenue towards environmentally supportive and socially improving ends it can be part of the fiscal basis for sustainable development. This volume explores the history of both ideas but with more emphasis on the wider ranging policy alternatives that ecotaxation represents. The contributors look at the mixed records of the correctional economic instruments which have been introduced suggesting that unless they are integrated into a more comprehensive package of reforms they are not likely to have much effect on the direction of an already unsustainable economy. On the other hand taxation has the potential not only to stimulate sustainable forms of economic activity but also by lowering the costs of work and employment to create jobs and greater social justice. At a time when governments room for manoeuvre is being more and more restricted by conflicting social economic and environmental commitments and pressures revenue neutral ecotaxation has a crucial role to play in reconciling those objectives and putting policy onto a new and lasting footing.

Nils Axel Braathen, Principal Administrator OECD Environment Directorate. Another outstanding volume on environmental taxation this time with focus on China and the Asia Pacific. Public Economics and the Environment in an Imperfect World Lans Bovenberg, Sijbren Cnossen, 2012-12-06. Growing populations and economies have increased the public's awareness that the world's environmental resources are finite. The issues of global warming and the depletion of the ozone layer have given universal significance to what were once local and regional pollution problems. What is evident from *Public Economics and the Environment in an Imperfect World* is

that Coasian negotiations fail to internalize the costs of environmental degradation often calling for public intervention through the market mechanism In its consideration of such issues the book includes contributions on assessment problems institutional aspects the need for coordination and efficiency and distribution issues Handbook of Environmental and Resource Economics Jeroen C.
