**Implementing Sustainable Development Goals in Europe** Charlie Karlsson, Daniel Silander, 2020-09-25 This unique book expertly analyses European political entrepreneurship in relation to the European Union's approach towards the Agenda 2030 Sustainable Development strategy. It explores the role of European political entrepreneurs in shaping, influencing, and realising the United Nations Sustainable Development Goals. Chapters examine EU actors in the context of numerous development goals to assess how political entrepreneurship challenges traditional EU institutions and promotes visionary activity.

*Implementing Sustainable Development* William M. Lafferty, James Meadowcroft, 2000-11-30 At the Rio Earth Summit in 1992, political leaders from more than a hundred countries made a formal commitment to intensify efforts to resolve global environment and development problems and to strive for sustainable development. This volume examines how governments in the developed industrial world have responded to the challenge of sustainable development since it was catapulted into the international stage. It focuses on the central government engagement with sustainable development in Australia, Canada, Japan, Norway, the Netherlands, Sweden, the United Kingdom, the United States, and the European Union. The study shows that sustainable development has been integrated into governmental idiom in most jurisdictions and has come to be associated with a series of changes to the structures and approaches deployed to manage environmental problems. Yet it also reveals significant differences of interpretation and priority and in enthusiasm with which sustainable development has been received.
