J. de Wit, 2015-01-02 This book summarizes the geomorphology geology geochronology geophysics and mineral resources of the Congo Basin one of the world's most enigmatic and poorly understood major intra continental sedimentary basins and its flanking areas of Central Africa It provides an up to date analysis of the large region's origin and evolution The book's nineteen chapters take the reader through the entire basement history as well as the Basin's ca 700 million years of cover sequences Starting from its Archean cratons and Proterozoic mobile belts and proceeding through the Phanerozoic sequences including the most recent Cenozoic successions the book also explores the present drainage systems and the subtle but complex topography of the Congo Basin It also presents and evaluates new basin models and related dynamic processes as well as revised correlation schemes with its Gondwana counterparts in South America all of which provide key insights into its rich diamond deposits and other mineral wealth which are documented in the final chapters A specific feature of this book is its synthesis performed by teams of active experts of a vast amount of geoscientific data previously only recorded in research reports company reports survey bulletins and scattered journal articles and books The sheer size of the Congo Basin ca 1.8 million km² or just under half the area of the EU and Central Africa some 7 million km² or more than 70% of the area of the USA will make this a sought after source of information and inspiration on this unique region **The South African Mining and Engineering Journal**, 1920 **Modern Industry and the African** J. Merle Davis, 2019-05-29 Originally published in 1933 at the time of its publication *Modern Industry and the African* represented a progressive essentially liberal approach to the development of the Copperbelt of Northern Rhodesia and the response thereto of the Christian Church It expressed the authors very real fears that urbanization would irreparably damage the foundations of indigenous life and demonstrated their implicit faith in the virtues of a past golden age of rural stability In many respects the study was a landmark beginning a new trend of investigation into sociological aspects of African administration *British Documents on the End of Empire: Central Africa, Part I*, 2005 **The Impacts of the Construction and Development of the Port Francqui-Bukama Railroad on the Rural Population of Katanga, Belgian Congo** Nkasa Tekilazaya Yelengi, 1996 *Pan-Africanism Versus Partnership* Brooks Marmon, 2023-04-29 This

book takes the transnational history of southern Africa's liberation struggles in an innovative direction. It provides one of the first targeted studies of the manner in which the wider process of African decolonisation shaped the political struggle for control of Southern Rhodesia colonial Zimbabwe. It offers an in-depth survey of the repercussions of pan-African developments on national level political thought amidst one of the most seminal moments of the continent's history. The book draws on over a year of fieldwork in southern Africa as well as archival collections in the USA and UK to explore the seismic realignments that occurred in the white settler dominated territory in southern Africa as self-determination became a widely accepted international principle virtually overnight. In particular, it focuses on the impact of decolonisation struggles and on independence in Ghana, Nigeria, the Democratic Republic of the Congo and Malawi on Zimbabwe's liberation struggle. In so doing, it also offers new context on the roots of contemporary repression in Zimbabwe.

The Cultural History of Money and Credit Chia Yin Hsu, Thomas M. Lockett, Erika Vause, 2015-12-14

In the wake of the financial crisis in 2008, historians have turned with renewed urgency to understanding the economic dimension of historical change. In this collection, nine scholars present original research into the historical development of money and credit during the nineteenth and twentieth centuries and explore the social and cultural significance of financial phenomena from a global perspective. Together with an introduction by the editors, chapters emphasize themes of creditworthiness and access to credit, the role of the state in the loan market, modernization, colonialism, and global connections between markets. The first section of the volume, Creditworthiness and Credit Risks, examines microfinancial markets in South India and Sri Lanka, Brazil, and the United States, in which access to credit depended largely on reputation while larger investors showed a strong interest in policing economic behavior and encouraging thrift among market participants. The second section, The Loan Market and the State, concerns attempts by national governments to regulate the lending activities of merchants and banks for social ends, from the liberal regime of nineteenth-century Switzerland to the far more statist policies of post-revolutionary Mexico and U.S. legislation that strove to eliminate discrimination in lending. The third section, Money, Commercial Exchange, and Global Connections, focuses on colonial and semicolonial societies in the Philippines, China, and Zimbabwe, where currency reform and the development of organized financial markets engendered conflict over competing models of economic development, often pitting the colony against the metropole. This volume offers a cultural history by considering money and credit as social relations and explores how such relations were constructed and articulated by contemporaries. Chapters employ a variety of methodologies.

including analyses of popular literature and the viewpoints of experts and professionals investigations of policy measures and emerging social practices and interpretations of quantitative data **Report** ,1932 Differential Between Raw and Refined Sugar United States Tariff Commission,1931 **Boots and Shoes** United States Tariff Commission,1931 **The Encyclopædia Britannica** Hugh Chisholm,1922 **The Statist** ,1923
