Histological Typing of Prostate Tumours K.F. Mostofi, I.A. Sesterhenn, C.J. Jr. Davis, 2013-04-18 This revision of the book originally published in 1980 is the result of a collaboration among scientists from 10 countries. The authors include not only pathologists but also a urologist and a basic scientist. The second edition containing 146 colour photographs is considerably more extensive than its predecessor A number of new entities unrecognized in 1980 are included prostatic intraepithelial neoplasia which is commonly associated with carcinoma and may also be seen in a biopsy for elevated PSA basal cell carcinoma small cell carcinoma paracrine endocrine elements variants of carcinoma and stromal sarcoma The criteria for the diagnosis of carcinoma have been expanded including the minimal criteria. The Gleason grading system based on growth pattern is presented in detail The WHO grading system based on nuclear anaplasia and glandular differentiation is more clearly defined Histological Typing of Tumours of the Exocrine Pancreas G. Leistenschneider, R. Nagel, 2012-12-06 Diagnostic and exfoliative cytology has today achieved a status that few could have envisaged 20 years ago While exfoliative cytology has long been employed in gynecological diagnosis new and rewarding

spheres have now developed in which cytological diagnosis plays an important role Exfoliative cytology for example is widely employed as an aid in the continuous assessment of urinary tract tumors and aspiration cytology in the diagnosis of thyroid dis eases This has given rise to a growing demand for pathologists experienced in cytological diagnosis However clinicians with an interest in morphology were often the first to adopt these simple and safe methods being naturally attracted by the chance to avoid conducting biopsy which in the last analysis is nothing less than a surgical operation In this Atlas of Prostatic Cytology Leistenschneider and Nagel expertly demonstrate what can be achieved when clinicians skilled in morphology take an interest in cytological methods Not only do they have direct contact with the patient but they also profit from immediately being in a position to assess the results of their diagnostic procedures by examining the specimen obtained From the technical point of view aspiration biopsy of the prostate is by no means a simple procedure and the difficulties involved would seem to have been underestimated in the initial phase of enthusiastic acclaim Consequently it has been not unusual for clinicians and pathologists to be disappointed by the high rate of unsatisfactory samples obtained by this method

Gleason Grading of Prostate Cancer Mahul B. Amin,2004 Featuring more than 300 full color photomicrographs that represent the entire spectrum of the Gleason grading system this atlas is the first comprehensive and definitive reference devoted to Gleason grading of prostate cancer It is written by four eminent authorities in urologic pathology who bring their collective expertise and consensus opinion in Gleason grading Illustrative case examples from the authors collections highlight the pitfalls and problems of applying the Gleason grading system to contemporary techniques in pathology

Carcinoma of the Prostate Zbigniew Petrovich, Luc Baert, Luther W. Brady, 2012-12-06 The American Cancer Society anticipates that during 1995 244000 new cases of cancer of the prostate will have been diagnosed in the United States with 40400 deaths from the disease process The rapid increase in the actual number of new cases in the United States is directly related to more regularized digital rectal examinations and the more frequent and widespread use of prostate specific antigen PSA screening programs As a conse quence major controversies have emerged in how best to manage the patient with cancer of the prostate These include the necessity of PSA screening programs how to interpret PSA values what imaging studies are most appropriate for definition of the true extent of the disease process the value of pretreatment surgical staging of the disease process and the value of different treatments The latter encompass a wide range of options observa tion radical prostatectomy the Walsh type prostatectomy procedure definitive external beam radiation therapy local interstitial implantation using iodine 125 iridium 192 or palladium 103 orchiectomy cryosurgery hyperthermia and various antitestosterone agents such as estrogens or LH RH agonists The present volume deals with the major parameters of controversy with regard to cancer of the prostate and will enable the reader to acquire a better understanding of the disease and how best it might be managed to achieve an optimal outcome with a minimum of complications
