Historia Anatomica Humani Corporis Parte

Havelock Ellis

Historia Anatomica Humani Corporis Parte:

Eighteenth-Century British Midwifery, Part I vol 3 Pam Lieske, 2024-11-01 Gives readers an understanding of midwives midwifery students and women in labour This twelve volume collection comprises pamphlets treatises lectures for midwifery students texts on the establishment of lying in hospitals and catalogues of obstetrical apparatuses collected by male midwives

The One-Sex Body on Trial: The Classical and Early Modern Evidence Helen King, 2016-02-17 By far the most influential work on the history of the body across a wide range of academic disciplines remains that of Thomas Laqueur This book puts on trial the one sex two sex model of Laqueur's Making Sex Body and Gender from the Greeks to Freud through a detailed exploration of the ways in which two classical stories of sexual difference were told retold and remade from the mid sixteenth to the nineteenth century Agnodike the first midwife who disguises herself as a man and then exposes herself to her potential patients and Phaethousa who grows a beard after her husband leaves her are stories from the ancient world that resonated in the early modern period in particular Tracing the reception of these tales shows how they provided continuity despite considerable change in medicine being the common property of those on different sides of professional disputes about women's roles in both medicine and midwifery The study reveals how different genres used these stories changing their characters and plots but always invoking the authority of the classics in discussions of sexual identity The study raises important questions about the nature of medical knowledge the relationship between texts and observation and the understanding of sexual difference in the early modern world beyond the one sex model

Sex in Relation to Society Havelock Ellis, 1910 **Studies in the Psychology of Sex: Sex in relation to society** Havelock Ellis, 1910 **Studies in the Psychology of Sex** Havelock Ellis, 1913 **Studies in the Psychology of Sex v6** Havelock Ellis, 2015-11-07 A man's sexual nature like all else that is most essential in him is rooted in a soil that was formed very long before his birth In this as in every other respect he draws the elements of his life from his ancestors however new the recombination may be and however greatly it may be modified by subsequent conditions A man's destiny stands not in the future but in the past That rightly considered is the most vital of all vital facts Every child thus has a right to choose his own ancestors Naturally he can only do this vicariously through his parents It is the most serious and sacred duty of the future father to choose one half of the ancestral and hereditary character of his future child it is the most serious and sacred duty of the future mother to make a similar choice 1 In choosing each other they have between them chosen the whole ancestry of their child They have determined the stars that will rule his fate In the past that fateful determination has usually been made helplessly ignorantly almost unconsciously It has either been guided by an instinct which on the whole has worked out fairly well or controlled by economic interests of the results of which so much cannot be said or left to the risks of lower than bestial chances which can produce nothing but evil In the future we cannot but have faith for all the hope of humanity must rest on that faith that a new guiding impulse reinforcing natural instinct and becoming in time an inseparable accompaniment of it will lead civilized man

on his racial course Just as in the past the race has on the whole been moulded by a natural and in part sexual selection that was unconscious of itself and ignorant of the ends it made towards so in the future the race will be moulded by deliberate selection the creative energy of Nature becoming self conscious in the civilized brain of man This is not a faith which has its source in a vague hope The problems of the individual life are linked on to the fate of the racial life and again and again we shall find as we ponder the individual questions we are here concerned with that at all points they ultimately converge towards this same racial end Since we have here therefore to follow out the sexual relationships of the individual as they bear on society it will be convenient at this point to put aside the questions of ancestry and to accept the individual as with hereditary constitution already determined he lies in his mother s womb Studies in the Psychology of Sex Havelock Ellis,2013-10-02 Studies in the Psychology of Sex Volume II presents studies that explore the psychology of sex by addressing topics ranging from erotic symbolism and the mechanism of detumescence to the psychic state in pregnancy Eonism and sex in relation to society are also discussed Divided into three parts this volume first deals with erotic symbolism focusing on erotic fetishism such as foot fetishism and shoe fetishism and scatologic symbolism The reader is then introduced to the mechanism and object of detumescence the constituents of semen and the aptitude for detumescence Erogenous zones and erection and mucous emission in women are also considered The final section is devoted to the psychic state in pregnancy and pays particular attention to the relationship of maternal and sexual emotion conception and loss of virginity the pervading effects of pregnancy the longings of pregnant women and the significance of pregnancy This book will be of interest to physicians psychologists psychiatrists criminologists and educators Encyclopedia of Early Modern Philosophy and the Sciences Dana Jalobeanu,Charles T. Wolfe,2022-08-27 This Encyclopedia offers a fresh integrated and creative perspective on the formation and foundations of philosophy and science in European modernity Combining careful contextual reconstruction with arguments from traditional philosophy the book examines methodological dimensions breaks down traditional oppositions such as rationalism vs empiricism calls attention to gender issues to insiders and outsiders minor figures in philosophy and underground movements among many other topics In addition and in line with important recent transformations in the fields of history of science and early modern philosophy the volume recognizes the specificity and significance of early modern science and discusses important developments including issues of historiography such as historical epistemology the interplay between the material culture and modes of knowledge expert knowledge and craft knowledge This book stands at the crossroads of different disciplines and combines their approaches particularly the history of science the history of philosophy contemporary philosophy of science and intellectual and cultural history It brings together over 100 philosophers historians of science historians of mathematics and medicine offering a comprehensive view of early modern philosophy and the sciences It combines and discusses recent results from two very active fields early modern philosophy and the history of early modern science Editorial Board EDITORS IN CHIEF Dana Jalobeanu University of

Catalogue of the Library of the Surgeon General's Office, United States Army ,1872 *Cognition and Girlhood in Shakespeare's World* Caroline Bicks, 2021-07-15 This groundbreaking study of girlhood and cognition argues that early moderns depicted female puberty as a transformative event that activated girls' brains in dynamic ways. Mining a variety of genres from Shakespearean plays and medical texts to autobiographical writings, Caroline Bicks shows how the change of fourteen years seemed to gift girls with the ability to invent, judge, and remember what others could or would not. Bicks challenges the presumption that early moderns viewed all female cognition as passive or pathological, demonstrating instead that girls' changing adolescent brains were lightning rods for some of the period's most vital debates about the body and soul, faith and salvation, science and nature, and the place and agency of human perception in the midst of it all. Sexual Types Mario DiGangi, 2011-11-29 Sexual types on the early modern stage are at once strange and familiar, associated with a range of unnatural or monstrous sexual and gender practices yet familiar because readily identifiable as types recognizable figures of literary imagination and social fantasy. From the many found in early modern culture, Mario DiGangi here focuses on six types that reveal in particularly compelling ways both individually and collectively how sexual transgressions were understood to intersect with social, gender, economic, and political transgressions. Building on feminist and queer scholarship, *Sexual Types* demonstrates how the sodomite, the tribade, a woman loving woman, the narcissistic courtier, the citizen wife, the bawd, and the court favorite function as sites of ideological contradiction in dramatic texts. On the one hand, these sexual types are vilified and disciplined for violating social and sexual norms; on the other hand, they can take the form of dynamic, resourceful characters who expose the limitations of the categories that attempt to define and contain them. In bringing sexuality and character studies into conjunction with one another, *Sexual Types* provides illuminating new readings of familiar plays such as Shakespeare's *A Midsummer Night's Dream* and *The Winter's Tale*, and of lesser-known plays by Fletcher, Middleton, and Shirley. **The Embryological Treatises of Hieronymus Fabricius of Aquapendente** Fabricius (ab Aquapendente), 1942 Fabricius wrote at great length on embryology, inventing many theories, some of which were false. His illustrations marked a great advance on previous work; Fabricius recorded for the first time the dissection of several

embryos Morton s medical bibliography 5th ed 1991 p 88 Catalogue of the Printed Books in the Library of the University of Edinburgh Edinburgh University Library,1918 Sex in Relation to Society Havelock Ellis,2013-10-22 Studies in the Psychology of Sex Volume VI Sex in Relation to Society describes the social attitude and legal opinion toward sex This volume is composed of 12 chapters and starts with a survey on the maternal role in child s early knowledge about sex The next chapters explore the principles of sex education nakedness sexual love chastity and sexual abstinence Other chapters cover sex related topics including the origin and development of prostitution sexual morality marriage and the so called art of love A chapter tackles the issue of acquiring venereal disease due to sexual malpractice and prostitution The final chapter discusses the link between the art of love and the science of procreation This book will be of value to psychologists teachers parents and the general readers who are interested the allied fields *Catalogue of the Books, Manuscripts, Maps and Drawings in the British Museum (Natural History)* ...
