Publisher description *Introduction to the Law of Real Property* Cornelius J. Moynihan, 1988 First edition published in 1962 Cases, Materials and Text on Property Law Sjef van Erp, Bram Akkermans, 2012-07-23 This casebook presents a deep comparative analysis of property law systems in Europe ie the law of immovables movables and claims offering signposts and stepping stones for the reader wishing to explore this fascinating area The subject matter is explained with careful attention given to its history foundations thought patterns underlying principles and basic concepts The casebook focuses on uncovering differences and similarities between Europe's major legal systems French German Dutch and English law are examined while Austrian and Belgian law are also touched upon The book combines excerpts from primary source materials case law and legislation and from doctrine and soft law In doing so it presents a faithful picture of the systems concerned Separate chapters deal with the various types of property rights their creation transfer and destruction with security rights such as mortgages pledges retention of title as well as with harmonising and unifying efforts at the EU and global level Through the functional approach taken by the *Ius Commune* Casebooks this volume clearly demonstrates that traditional comparative insights no longer hold The law of property used to be regarded as a product of historical developments and political ideology which were considered to be almost set in stone and assumed to render any substantial

form of harmonisation or approximation very unlikely Even experienced comparative lawyers considered the divide between common law and civil law to be so deep that no common ground so it was thought could be found However economic integration in particular integration of financial markets and freedom of establishment has led to the integration of particular areas of property law such as mortgage law and enforceable security instruments eg retention of title This pressure towards integration has led comparative lawyers to refocus their interest from contract tort and unjustified enrichment to property law and delve beneath its surface This book reveals that today property law systems are closer to one another than previously assumed that common ground can be found and that differences can be analysed in a new light to enable comparison and further the development of property law in Europe

Criminal Law Henry F. Fradella, Professor in and Associate Director of the School of Criminology and Criminal Justice Henry F Fradella, 2022-06-24

Criminal Law offers a unique hybrid approach to learning criminal law Most textbooks oversimplify the law by presenting the black letter law for major and defenses but they rarely present any corresponding exploration of the gray areas that exist beyond the basic rules of law Conversely casebooks present numerous edited judicial opinions often with context Criminal Law takes the best from each of these approaches by merging textual pedagogy and case analyses into a coherent framework that includes legal history social context and public policy Taking a historical approach legal expert Henry F Fradella presents the law as it evolved from English common law and compares it with the modern statutory approach to crimes set forth in the American Law Institute's highly influential Model Penal Code After providing such comparative pedagogy for each crime or defense Criminal Law presents 12 edited cases that allow the reader to contrast how the black letter law plays out in the real world After each case a series of questions challenge students to engage in critical thinking about the case and its implications as precedent Finally chapters contain a number of additional pedagogical features that focus on public policy concerns and statutory interpretation skills using penal laws from a variety of U S states
