Sarah Fels Usher extends Mahler's theory and includes the writing of Loewald and Modell among others stressing the right of adult patients to a separate life. She describes the predicament of Oedipal victors or victims, their introjected feelings of responsibility for their parents, and their resultant inability to be truly individuated adults. Difficulties separating from siblings are also given analytic attention. Usher's experience treating couples adds a new and powerful dimension to her theory. She is optimistic throughout about the therapist's ability to help adult patients resolve the rapprochement sub phase in a satisfying manner. An additional crucial question is raised when the author asks if the therapist can allow the patient to terminate treatment. Has the therapist achieved separation from their own parents or indeed from their analyst? Exploring the plight of patients of the unseparated analyst, Usher describes how these generational factors rear their unfortunate heads when it is time to end therapy. Listening to patients from the perspective of separation/individuation is not new; what is new is Usher's emphasis on how these particular issues are often masked by significant achievement in adult professional life. *Separation/Individuation Struggles in Adult Life: Leaving Home* will be of great importance for psychoanalysts and psychoanalytic psychotherapists working with adults as well as for clinical postgraduate students. Hopelessness Salman Akhtar, Mary Kay O'Neil, 2018-03-26. Hope is the most reliable sustainer of life. It offers the promise of something good in the future, contributes to resilience, and keeps one going. However, there are circumstances when hope dries up. This book seeks to map out such dark terrain of hopelessness. While it allows for the fact that a modicum of hopelessness might help in reducing infantile omnipotence and curtailing fixation on unrealistic goals, its focus is upon severe and clinically significant shades of hopelessness. The book opens with a broad overview of the nature, developmental origins, and technical implications of hope and hopelessness, and closes with a thoughtful summary, synthesis, and critique of the intervening essays. This summary forges both theoretically and technically significant links between the experiences of helplessness and hopelessness. Sandwiched between these opening and closing commentaries are nine essays which address the ontogenetic trajectory, phenomenological variations, cultural and literary portrayals, and clinical ramifications of sustained hopelessness. The Ethics of Managed Care: Professional Integrity and Patient Rights W.B. Bondeson, J.W. Jones, 2013-03-09. In the culture of medicine, they saw their mission as a generation of profit for stockholders, not necessarily medical care for clients. Cost-effective medicine was the goal in the context of a profit-making enterprise. Although preventive health care programs were promised, very few were realized, and they were not nearly comprehensive. The definition of unnecessary testing slowly expanded to mean virtually any high-cost test requiring the service of a medical specialist, and low-priced generalist physicians with limited diagnostic and therapeutic skills were made available to patients with the instruction they should limit their access to high-cost specialists. Managed care organizations tended to reward primary care physicians who avoided specialty referrals and severed contracts with those who persisted in sending their patients to outside consultants. Most notoriously, managed care organizations maintained veto authority over the provision of complex and expensive care, and that

veto was often wielded in defiance of a physician's recommendation by managed care employees without medical training or experience. Managed care did indeed slow the rate of increase of medical costs but not without limitations on the care provided to patients and the professional integrity of physicians. Managed care organizations were so successful that they could provide extremely high salaries to their executives even in the context of limiting cost and care. It is these developments that the papers of this symposium addressed. The most fundamental ethical issue is posed in the first paper by Dr. **Psychoanalysis and the New Rhetoric** Daniel Adleman, Chris Vanderwees, 2022-12-30. Psychoanalysis and the New Rhetoric: Freud, Burke, Lacan, and Philosophy's Other Scenes is an innovative work that places the fields of psychoanalysis and rhetoric in dynamic resonance with one another. The book operates according to a compelling interdisciplinary conceit. Adleman provocatively explores the psychoanalytic aspects of rhetoric, and Vanderwees probes the rhetorical dimensions of psychoanalytic practice. This thoroughly researched text takes a closer look at the missed encounter between rhetoric and psychoanalysis. The first section of the book explores the massive but underappreciated influence of Freudian psychoanalysis on Kenneth Burke's new rhetoric. The book's second section undertakes sustained investigations into the rhetorical dimensions of psychoanalytic concepts such as transference, free association, and listening. Psychoanalysis and the New Rhetoric then culminates in a more comprehensive discussion of Lacanian psychoanalysis in the context of Kenneth Burke's new rhetoric. The book therefore serves as an invaluable aperture to the fields of psychoanalysis and rhetoric, including their much overlooked disciplinary entanglement. Psychoanalysis and the New Rhetoric will be of great interest to scholars of psychoanalytic studies, rhetoric, language studies, semiotics, media studies, and communication studies. **Gabbard's Textbook of Psychotherapeutic Treatments, Second Edition** Holly Crisp, M.D., Glen O. Gabbard, M.D., 2022-09-21. Preceded by Textbook of psychotherapeutic treatments edited by Glen O. Gabbard 1st ed. c2009.
