Prentice Hall 2004-2005 Faculty Directory Hasselback,2003-07 *Books in Print Supplement* ,2002 **Subject**
Guide to Books in Print ,1997 **Management Accounting** ,1980 Specifications Grading Linda B. Nilson,2023-07-03

In her latest book Linda Nilson puts forward an innovative but practical and tested approach to grading that can demonstrably raise academic standards motivate students tie their achievement of learning outcomes to their course grades save faculty time and stress and provide the reliable gauge of student learning that the public and employers are looking for She argues that the grading system most commonly in use now is unwieldy imprecise and unnecessarily complex involving too many rating levels for too many individual assignments and tests and based on a hairsplitting point structure that obscures the underlying criteria and encourages students to challenge their grades This new specifications grading paradigm restructures assessments to streamline the grading process and greatly reduce grading time empower students to choose the level of attainment they want to achieve reduce antagonism between the evaluator and the evaluated and increase student receptivity to meaningful feedback thus facilitating the learning process all while upholding rigor In addition specs grading increases students motivation to do well by making expectations clear lowering their stress and giving them agency in determining their course goals Among the unique characteristics of the schema all of which simplify faculty decision making are the elimination of partial credit the reliance on a one level grading rubric and the bundling of assignments and tests around learning outcomes Successfully completing more challenging bundles or modules earns a student a higher course grade Specs grading works equally well in small and large class settings and encourages authentic assessment Used consistently over time it can restore credibility to grades by demonstrating and making transparent to all stakeholders the learning outcomes that students achieve This book features many examples of courses that faculty have adapted to spec grading and lays out the surprisingly simple transition process It is intended for all members of higher education who teach whatever the discipline and regardless of rank as well as those who oversee train and advise those who teach Specification grading promotes the following values and outcomes It 1 Upholds High Academic Standards2 Reflects Student Attainment of Skills and Knowledge 3 Motivates Students to Learn and to Excel4 Fosters Higher Order Cognitive Development and Creativity5 Discourages Cheating6 Reduces Student Stress7 Makes Students Feel Responsible for Their Grades8 Minimizes Conflict Between Faculty and Students9 Saves Faculty Time and Is Simple to Administer10 Makes Expectations Clear and Simplifies Feedback for Improvement11 Assesses Authentically12 Achieves High Inter Rater Agreement Resources in Education ,1999-10 Bulletin of the Atomic Scientists ,1970-06 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world *APAIS 1994: Australian public affairs information service* , Handbook of Critical Issues in Goal Programming C. Romero,2014-06-28 Goal Programming GP is

perhaps the oldest and most widely used approach within the Multiple Criteria Decision Making MCDM paradigm GP combines the logic of optimisation in mathematical programming with the decision maker's desire to satisfy several goals The primary purpose of this book is to identify the critical issues in GP and to demonstrate different procedures capable of avoiding or mitigating the inherent pitfalls associated with these issues The outcome of a search of the literature shows many instances where GP models produced misleading or even erroneous results simply because of a careless formulation of the problem Rather than being in itself a textbook *Critical Issues in Goal Programming* is designed to complement existing textbooks It will be useful to students and researchers with a basic knowledge of GP as well as to those interested in building GP models which analyse real decision problems

Management Education for Integrity Charles Wankel, Agata Stachowicz-Stanusch, 2011-09-02 Explains how curricula should be streamlined and rejuvenated to ensure a high level of integrity in management education providing numerous examples of new tools teaching methods integrity sensitization and development exercises and ethical management education assessment approaches
