The Unity of Science in the Arabic Tradition Shahid Rahman, Tony Street, Hassan Tahiri, 2008-07-15 the demise of the logical positivism programme The answers given to these questions have deepened the already existing gap between philosophy and the history and practice of science While the positivists argued for a spontaneous steady and continuous growth of scientific knowledge the post positivists make a strong case for a fundamental discontinuity in the development of science which can only be explained by extrascientific factors The political social and cultural environment the argument goes on determine both the questions and the terms in which they should be answered Accordingly the sociological and historical interpretation involves in fact two kinds of discontinuity which are closely related the discontinuity of science as such and the discontinuity of the more inclusive political and social context of its development More precisely it explains the discontinuity of the former by the discontinuity of the latter subordinating in effect the history of science to the wider political and social history The underlying idea is that each historical and social context generates scientific and philosophical questions of its own From this point of view the question surrounding the nature of knowledge and its development are entirely new topics typical of the twentieth century

social context reflecting both the level and the scale of the development of science *Islam* Karen Armstrong, 2007-12-18 No religion in the modern world is as feared and misunderstood as Islam It haunts the popular Western imagination as an extreme faith that promotes authoritarian government female oppression civil war and terrorism Karen Armstrong's short history offers a vital corrective to this narrow view The distillation of years of thinking and writing about Islam it demonstrates that the world's fastest growing faith is a much richer and more complex phenomenon than its modern fundamentalist strain might suggest *Islam A Short History* begins with the flight of Muhammad and his family from Medina in the seventh century and the subsequent founding of the first mosques It recounts the origins of the split between Shii and Sunni Muslims and the emergence of Sufi mysticism the spread of Islam throughout North Africa the Levant and Asia the shattering effect on the Muslim world of the Crusades the flowering of imperial Islam in the fourteenth and fifteenth centuries into the world's greatest and most sophisticated power and the origins and impact of revolutionary Islam It concludes with an assessment of Islam today and its challenges With this brilliant book Karen Armstrong issues a forceful challenge to those who hold the view that the West and Islam are civilizations set on a collision course It is also a model of authority elegance and economy **Philosophy of Religion in Islam** Rahim Acar, M.
