Nakamura, Joan R. Taylor, Ian K. Workman, 1980 This report summarizes the results of a project that was conducted in 1974 75 In addition to the information that we sought our efforts produced an extensive bibliography on fishes in the estuaries of the Gulf of Mexico Some of our colleagues suggested that we include additional species and that we update the references The unlikelihood of our doing so becomes more apparent with the passage of time We therefore present this version of our report with the hope that others may find it useful Preface **The First Year in the Life of Estuarine Fishes in the Middle Atlantic Bight** Kenneth W. Able, Michael P. Fahay, 1998 In the heart of the book they describe the natural history of the eggs larvae and juveniles of seventy fish species the most abundant and ecologically economically important of 300 species whose young are found in the Hudson and Delaware estuaries and smaller New Jersey rivers estuaries and bays They stress the temporal and spatial distribution of eggs larvae and juveniles They also analyze the patterns and subtle variations in the ecology and life history strategies of these species their growth rates where they find refuge from predators how they survive their first winter and how they share the estuarine habitat with so many other species **Fish and Fisheries in Estuaries** Alan K.
