## **Fissure Rock:**

Geomechanical Behaviors of Deeply Buried Rock under Triaxial Disturbed Stress Conditions Yu Wang,Xuefeng Yi,Lei Yin,2023-12-05 This book is intended as a reference book for advanced graduate students and research engineers in rock mechanics related to civil mining hydropower and traffic engineering etc For rock mass during construction they are often subjected to complicated stress disturbance conditions such as human induced and environmental loading acting on rock that is cyclic or fatigue in nature Typical forms of stress disturbance include excavation unloading blasting vibration earthquake drilling and vehicle loading etc Usually the stress disturbance condition is inferred as a kind of dynamic loading and differs dramatically from those under static loads Along with the constructions on rock mass a lot of disasters e g tunnel rockburst induced seismicity and sand liquefaction are cyclic and dynamic processes Nevertheless insufficient attentions have been paid to the influences of disturbed stress on the long term stability of rock mass construction so far The discrepancy between theoretical prediction by approximating the dynamic problems as static ones and actual performance of constructed engineering structures is usually tolerated As a result investigation of the disturbed stress on rock is always vital to the rational design and the long term stability prediction of rock constructions      **Microfacies of Carbonate Rocks** Erik Flügel,2013-11-11 This unparelled reference synthesizes the methods used in microfacies analysis and details the potential of microfacies in evaluating depositional environments and diagenetic history and in particular the application of microfacies data in the study of carbonate hydrocarbon reservoirs and the provenance of archaeological materials Nearly 230 instructive plates 30 in color showing thin section photographs with detailed explanations form a central part of the content Helpful teaching learning aids include detailed captions for hundreds of microphotographs boxed summaries of technical terms many case studies guidelines for the determination and evaluation of microfacies criteria for enclosed CD with 14000 references self testing exercises for recognition and characterization skills and more      **Instability Mechanism and Disaster Prevention of the Jointed Rockmass** Shuren Wang,Hongyuan Liu,Chengguo Zhang ,Xu Chang,2024-06-13 Discontinuities such as cracks fissures bedding planes etc resulting from different geological processes are commonly found in rock masses and often play a critical role in the initiation propagation and coalescence of new cracks due to stress redistribution caused by engineering activities and natural disturbances It is challenging to determine the instability mechanism of jointed rock masses but it is vital for estimating instability disasters in jointed rock engineering      *Rock landslide risk assessment, stability analysis and monitoring for the development of early warning systems and reinforcement measures* Mowen Xie,Yan Du,Yujing Jiang,Bo Li,2023-06-29      **An Introduction to Geotechnical Processes** John Woodward,2005-03-10 The study of the solid part of the earth on which structures are built is an essential part of the training of a civil engineer Geotechnical processes such as drilling pumping and injection techniques enhance the viability of many construction processes by improving ground conditions Highlighting the ground investigation necessary for the process the likely improvement in

strength of treated ground and testing methods An Introduction to Geotechnical Processes covers the elements of ground treatment and improvement from the control of groundwater drilling and grouting to ground anchors and electro chemical hardening **Mines and Methods** ,1907 *Groundwater Engineering* Yiqun Tang,Jie Zhou,Ping Yang,Jingjing Yan,Nianqing Zhou,2016-09-06 Integrating information from several areas of engineering geology hydrogeology geotechnical engineering this book addresses the general field of groundwater from an engineering perspective It covers geological engineering as well as hydrogeological and environmental geological problems caused by groundwater engineering It includes 10 chapters i e basic groundwater theory parameter calculation in hydrogeology prevention of geological problem caused by groundwater construction dewatering wellpoint dewatering methods dewatering wells and drilling groundwater dewatering in foundation pit engineering groundwater engineering in bedrock areas numerical simulation in groundwater engineering groundwater corrosion on concrete and steel Based on up to date literature it describes recent developments and presents several case studies with examples and problems It is an essential reference source for industrial and academic researchers working in the groundwater field and can also serve as lecture based course material providing fundamental information and practical tools for both senior undergraduate and postgraduate students in fields of geology engineering hydrogeology geotechnical engineering or to conduct related research **Proceedings of the 9th International**

**Congress on Deterioration and Conservation of Stone** V. Fassina,2000-06-13 The conservation of historic monuments sites and structures constitutes an inter professional discipline co ordinating a range of aesthetic historic scientific and technical methods Conservation is a rapidly developing field which by its true nature is a multidisciplinary activity with experts respecting one another s contributions and combining to form an effective team Conservation is an artistic activity aided by scientific and historical knowledge Main topics at this Congress included the most appropriate methodology for the assessment of the degree of weathering of stone development of new methods and instruments for the diagnosis of the state of conservation for the study of alteration mechanisms and for conservation treatments the definition of Technical European Standard Methods for the evaluation of conservation treatments of artistic and historic stone objects and monuments

**Frontiers of Rock Mechanics and Sustainable Development in the 21st Century** Wang Sijing,Fu Bingjun,Li Zhonkui,2020-12-17 These proceedings contain the scientific contributions presented at the 2nd Asian Rock Mechanics Symposium ISRM 2001 2nd ARMS The theme of the symposium was Frontiers of Rock Mechanics and Sustainable Development in the 21st Century **Hydraulic and Civil Engineering Technology VIII** Mijia Yang,Pijush Samui,João C.G. Lanzinha,Jianhui Hu,2023-12-15 All of us are dependent on a built environment constructed and maintained by civil and hydraulic engineers and for those working in these fields keeping up to date with the latest technological developments is vital for the safe and efficient design and operation of this infrastructure This book presents the proceedings of HCET 2023 the 8th International Technical Conference on Frontiers of Hydraulic and Civil Engineering Technology held from 25 27

September 2023 in Wuhan China HCET is an international conference which aims to enhance the development of hydraulic and civil engineering in China with a focus on high end intelligent and green technologies It seeks to do this by consolidating global wisdom and achievements and providing scientific support HCET also offers an excellent opportunity for scientists researchers and engineers from around the world to exchange their findings and discuss developments establishing a basis for national and international collaboration A total of 316 contributions were received for the 2023 edition of which 187 were ultimately accepted after a rigorous review process and checks for quality and plagiarism Topics covered include the research and development of concrete structure design and analysis structural mechanics and structural engineering building and future materials hydraulic engineering geological exploration and earthquake engineering building technology urban planning road bridge and traffic engineering energy infrastructure environmental engineering and advanced engineering technologies and interdisciplinary sciences and applications Covering a wide range of subjects related to hydraulic engineering and civil engineering technology and associated transdisciplinary sciences the book will be of interest to all those working in the field

Structural Seismic and Civil Engineering Research Ankit Garg,Bingxiang Yuan,Yu Zhang,2023-04-12 Structural Seismic and Civil Engineering focuses on civil engineering research anti seismic technology and engineering structure These proceedings gather the most cutting edge research and achievements aiming to provide scholars and engineers with preferable research directions and engineering solutions as reference Subjects in these proceedings include Engineering Structure Materials of Civil Engineering Structural Seismic Resistance Monitoring and Testing The works in these proceedings aim to promote the development of civil engineering and earthquake engineering Thereby promoting scientific information interchange between scholars from top universities research centers and high tech enterprises working all around the world

**Proceedings of the 2nd International Conference on Green Energy, Environment and Sustainable Development (GEESD2021)** D. Dobrotă,C. Cheng,2021-12-21 The need for green technologies and solutions which will deliver the energy requirements of both the developed and developing world to support sustainability and protect the environment worldwide has never been more urgent This book contains the proceedings of the 2nd International Conference on Green Energy Environment and Sustainable Development GEESD2021 which due to the COVID 19 pandemic around the world and with the strict travel restrictions in China was held as a hybrid conference both physically and online via Zoom in Shanghai China on 26 and 27 June 2021 It provided an opportunity to bring together an international community of leading scientists researchers engineers and academics as well as industrial professionals to exchange and share their experiences and research results in the energy environment and sustainable development sector In total 80 participants were able to exchange knowledge and discuss the latest developments in the field GEESD2021 attracted more than 250 submissions 88 of which were accepted after an extensive period of peer review by more than 100 reviewers and members of the program committee These are

included here grouped into 3 sections with 28 papers on sustainable energy 34 on ecology and 26 papers covering environmental pollution and protection Offering an overview of the most up to date findings and technologies in the field of sustainable energy and environmental protection the book will be of interest to all those working in this field *Memoirs of the Geological Survey of India* Geological Survey of India,1909 *Mines Register* ,1903 **Building Material and Construction (WBSCTE)** S.S. Bhavikatti, Building Technology involves selecting suitable materials and carrying out building construction neatly This book comprehensively covers all aspects of the subject and is written as per the requirements of civil engineering diploma students of West Bengal The text is presented in simple precise and reader friendly language It is amply supported by figures and tables **KEY FEATURES** Detailed coverage of Kerala University syllabus Simple and precise explanations Text sufficiently illustrated by figures and tables Relevant IS Codes listed Exhaustive questions given *The Copper Handbook* ,1910 **British Mining** Robert Hunt,1884 *Engineering and Mining Journal* ,1901

**Excavations in the City of David, Jerusalem (1995-2010)** Ronny Reich,Eli Shukron,2021-09-15 The City of David more specifically the southeastern hill of first and second millennium BCE Jerusalem has long captivated the imagination of the world Archaeologists and historians biblical scholars and clergy Christians Muslims and Jews and tourists and armchair travelers from every corner of the globe to say nothing of politicians of all stripes look to this small stretch of land in awe amazement and anticipation In the City of David in the ridge leading down from the Temple Mount hardly a stone has remained unturned Archaeologists have worked at a dizzying pace digging and analyzing But while preliminary articles abound there is a grievous lack of final publications of the excavations a regrettable limitation on the ability to fully integrate vital and critical results into the archaeological reconstruction of ancient Jerusalem Excavations of the City of David are conducted under the auspices of the Israel Antiquities Authority The Authority has now partnered with the Center for the Study of Ancient Jerusalem and its publication arm the Ancient Jerusalem Publication Series for the publication of reports that are written and designed for the scholar as well as for the general reader Excavations in the City of David APJ 1 is the first volume in this series
