*The Long History of the Future* Nicole Kobie, 2024-07-04 We love to imagine the future But why are groundbreaking future technologies always just around the corner and never a reality For decades we've delighted in dreaming about a sci fi utopia from flying cars and bionic humans to hyperloops and smart cities And why not Building a better world be it a free flying commute or an automated urban lifestyle is a worthy dream Given the pace of technological change nothing seems impossible anymore But why are these innovations always out of reach Delving into the remarkable history of technology *The Long History of the Future* introduces us to the clever scientists genius engineers and eccentric innovators who first brought these ideas to life and have struggled to make them work since These stories reveal a more realistic picture of how these technologies may evolve and how we'll eventually get to use them You may never be able to buy a fully driverless car but automated braking and steering could slash collision rates Smart cities won't perfect city life but they could help empty bins on time Hyperloops may never arrive but superfast trains are already here We always believe current technology is the best it could be By looking to the past and the future Nicole Kobie shows how history always proves us wrong and how what lies ahead may not be what we imagine but so much better
