### Novel Techniques for Dialectal Arabic Speech Recognition

Mohamed Elmahdy, Rainer Gruhn, Wolfgang Minker, 2012-02-10 Novel Techniques for Dialectal Arabic Speech describes approaches to improve automatic speech recognition for dialectal Arabic Since speech resources for dialectal Arabic speech recognition are very sparse the authors describe how existing Modern Standard Arabic MSA speech data can be applied to dialectal Arabic speech recognition while assuming that MSA is always a second language for all Arabic speakers In this book Egyptian Colloquial Arabic ECA has been chosen as a typical Arabic dialect ECA is the first ranked Arabic dialect in terms of number of speakers and a high quality ECA speech corpus with accurate phonetic transcription has been collected MSA

acoustic models were trained using news broadcast speech In order to cross lingually use MSA in dialectal Arabic speech recognition the authors have normalized the phoneme sets for MSA and ECA After this normalization they have applied state of the art acoustic model adaptation techniques like Maximum Likelihood Linear Regression MLLR and Maximum A Posteriori MAP to adapt existing phonemic MSA acoustic models with a small amount of dialectal ECA speech data Speech recognition results indicate a significant increase in recognition accuracy compared to a baseline model trained with only ECA data

From the 1919 Revolution to the 2011 Arab Spring Uzi Rabi,Mira Tzoreff,2024-05-08 Focused on three Egyptian revolutions in 1919 1952

and 2011 this edited book argues that each of these revolutions is a milestone which represents a meaningful turning point in modern Egyptian history. Revolutions are typically characterized by a fundamental change in political and social infrastructures as well as in the establishment of new values and norms. However, it should be noted that this may not be entirely applicable when examining the context of the three Egyptian revolutions: the 1919 revolution failed to liberate Egypt from British colonial hegemony; the 1952 revolution failed to rework the country's social and economic systems and unify the Arab world; and the Arab Spring revolution of 2011 culminated in a chaotic economic and social catastrophe, thus failing to solve the young generation's crisis. Nevertheless, by revisiting and redefining these revolutions through diverse theoretical frameworks, the book proposes that each of them played a significant role in shaping Egypt's political, social, and cultural identity. This book is specifically of interest for students, historians, and social scientists with a keen interest in Egyptian history and the Middle East, offering fresh perspectives and insights into these transformative moments in Egypt's history.
