slides for each chapter **Addressing Brain Injury in Under-Resourced Settings** Ross Balchin, Rudi Coetzer, Christian Salas, Janice Webster, 2017-10-30 Many of the world's population have no access to appropriate diagnostic neurorehabilitative or support services following brain injury. *Addressing Brain Injury in Under-Resourced Settings: A Practical Guide to Community Centred Approaches* tackles this unacceptable gap in service provision by empowering the reader to provide basic care, education and support for patients with brain injuries and their families. Written for an audience which does not necessarily have any prior knowledge of the brain, neurorehabilitation or brain injuries, this practical guide first examines the global context of brain injury, considering the cross-cultural realities across communities worldwide. The book goes on to explore the reality of brain injury and how to work with its consequences, offering practical knowledge and advice in a user-friendly, richly illustrated format. It provides easily digestible information about the brain, including its normal functioning and the ways in which it can be damaged through injury and disease. The book also covers the basic skills needed to identify neurological difficulties and provides guidance on basic rehabilitation input and support. The final section of the book covers how to provide services, including working with organisations and communities, volunteering, initiating and developing community-based projects and programmes, and caring for patients and their families from emergency to recovery to rehabilitation. This book is an invaluable resource for community health workers, voluntary sector workers and all professional healthcare providers who work with brain-injured patients around the world. It will also be important reading for policy developers, fundraising organisations and those who work with global humanitarian initiatives.

The Praeger Handbook of Personality across Cultures A. Timothy Church Ph.D., 2017-07-14 This important multivolume work sheds light on current and future research on cultural universals and differences in personality in their evolutionary, ecological and cultural contexts. How does culture impact personality traits? To answer that question, the three volumes in this set address current theory and research on culture and personality in an effort to determine how people differ and how they are alike. Detailed chapters by scholars from around the world unveil a fascinating picture of the relationship between culture and important aspects of personality. They also address the accuracy or meaningfulness of trait comparisons across cultures and the methods and limitations of research on the subject. As most psychological research is conducted on participants from Western industrialized countries, a work that includes a wide range of cultures not only fosters a more complete understanding of human personality but also broadens perspectives on value systems and ways to live. Each of the three volumes concentrates on distinct areas of research, exposing the reader to the diverse theoretical and empirical approaches and topics in the field. Volume 1 focuses on the cross-cultural study of personality dispositions or traits. Volume 2 examines the relationship between culture and other important aspects of personality, including the self, emotions, motives, values, beliefs and life narratives, as well as aspects of personality and adjustment associated with biculturalism and intercultural competence. Volume 3 looks at evolutionary, genetic and neuroscience perspectives on personality across cultures, along with

ecological and cultural influences In addition to providing readers with a thorough analysis of current and future directions for research this unrivaled work brings together multiple perspectives on personality across cultures thereby promoting a more integrative understanding of this important topic
