Introduction to Simulation Modeling Using GPSS/PC James A. Chisman, 1992 A practical introduction to simulation theory and the GPSS PC simulation language this package is designed to help readers start modelling real world manufacturing and service industry problems quickly It aims to serve both as a tutorial and reference resource *Modern Statistical, Systems, and GPSS Simulation, Second Edition* Zaven A. Karian, Edward J. Dudewicz, 2020-09-10 Modern Statistical Systems and GPSS Simulation Second Edition introduces the theory and implementation of discrete event simulation This text establishes a theoretical basis for simulation methodology provides details of an important simulation language GPSS General Purpose Simulation System integrates these two elements in a systems simulation case study Valuable additions to the second edition include coverage of random number generators with astronomic period new entropy based tests of uniformity gamma variate generation results on the GLD and variance reduction techniques GPSS PC is an interactive implementation of GPSS for the IBM PC compatible family of microcomputers The disk accompanying Modern Statistical Systems and GPSS Simulation contains the limited educational version of GPSS PC with many illustrative examples discussed in the text **Modeling and Simulation of Distributed Systems (with Cd-rom)**, 2010 **Understanding Computer Simulation** Roger McHaney, 2009 **Essential Analytics for Hospital Managers** Murray V. Calichman, 2019-04-25 This book provides practical applications of statistical and mathematical concepts to resolve common issues in hospital management Each chapter discusses a key component of hospital operations such as maximizing hospital profitability through pricing optimization forecasting facility requirements from historical data and determining optimal patient schedules to fully utilize hospital resources in order to eliminate over crowding in the emergency department Structured by the degree of mathematical complexity this professional book utilizes problem solving methodologies ranging from basic statistical concepts means and standard deviations to more advanced statistics Poisson distributions and queuing theory Concluding with computer applications and simulations the practical examples will help hospital managers to optimally and innovatively make use of linear programming The book s main goal is to make hospital personnel more aware of the benefits of management science methodologies that are not usually employed in today s hospitals *Parallel and Distributed Processing and Applications* Jiannong Cao, Laurence T. Yang, Minyi Guo, Francis Lau, 2005-01-17 Welcometotheceedingsofthe2ndInternationalSymposiumonParalleland Distributed Processing and Applications ISPA2004 which was held in Hong Kong China 13 15 December 2004 With the advance of computer networks and hardware technology parallel and distributed processing has become a key technology which plays an imp tant part in determining future research and development activities in many academic and industrial branches It provides a means to solve computati ally intensive problems by improving processing speed It is also the only ableapproachtobuildinghighlyreliableandinherentlydistributedapplications ISPA2004 provided a forum for scientists and

engineers in academia and industry try to exchange and discuss their experiences new ideas research results and applications about all aspects of parallel and distributed computing There was a very large number of paper submissions 361 from 26 countries and regions including not only Asia and the Pacific but also Europe and North America All submissions were reviewed by at least three program or technical committee members or external reviewers It was extremely difficult to select the presentations for the conference because there were so many excellent and interesting submissions In order to allocate as many papers as possible and keep the high quality of the conference we finally decided to accept 78 regular papers and 38 short papers for oral technical presentations We believe that all of these papers and topics not only provide novel ideas new results work in progress and state of the art techniques in this field but also stimulate the future research activities in the area of parallel and distributed computing with applications
