*Introduction to World Peace Through World Law* Grenville Clark, Louis B. Sohn, 1973      *The Constitutional Foundations of World Peace* Richard A. Falk, Robert C. Johansen, Samuel S. Kim, 1993-07-01 This book shows how significant a worldwide constitutional framework can be both analytically and politically in efforts to achieve a just and lasting peace The authors are careful to avoid the pitfalls of legalism and moralism that have often afflicted discussion of world governance in the past and their analyses are rooted directly within contemporary human struggles for peace justice prosperity and environmentally sustainable societies The authors demonstrate that when these struggles are examined in light of the planet's changing constitutional framework their origins and future trajectories are more fathomable intellectually By examining alternative images of world order these authors uncover an abundance of practical yet bold policy recommendations for addressing and solving global problems They also demonstrate that implementing desirable policies can indeed become politically feasible This book is a compendium of new ideas for managing threats to peace enhancing U N peacekeeping establishing an effective global environmental authority aiding the faltering global economy nurturing the growth of democracy both locally and globally protecting human rights and ethnic diversity holding governments and intergovernmental organizations accountable to those they govern and nurturing humanitarian values among all people      Congressional Record United States. **Right Backed by Might** Roger Beaumont, 2001-02-28 This study provides an overview of the International Air Force IAF concept which emerged in the early 20th century out of a long progression of schemes for creating multi national armed forces to enforce the peace most often referred to as an international police force IPF After broadly tracing the IAF's complex lineage Beaumont surveys the proliferation of IPF and IAF proposals throughout the 20th century including schemes offered by Kipling H G Wells and Theodore Roosevelt Later ideas included the Allies Independent Air Force of 1917-18 the evolution of the League to Enforce Peace into the League of Nations imperial air policing between the World Wars and a host of proposals official and informal such as visions of a United Nations IAF and the ad hoc coalition air forces assembled by the major western powers in the Gulf War and the Balkans in the 1990s The IAF concept gained far greater popularity even

among contemporary historians than is generally appreciated Beaumont interweaves the review of the IAF and IPF designs with diplomacy and war especially the rise of air power and the confounding of its advocates visions of a cheap quick road to victory Based on Beaumont s survey of secondary and primary sources during more than a decade of research this book considers the IAF image from such diverse perspectives as pacifism popular culture and collective security      **Key Documents on the Reform of the UN Security Council 1991-2019** Bardo Fassbender,2020-10-12 Key Documents on the Reform of the UN Security Council 1991 2019 brings together primary source documents reflecting the political legal and academic discussions of the United Nations Security Council reform in particular the Council s membership and decision making as they have taken place since 1991 Earlier discussions from the late 1940s through 1991 are covered insofar as they offer a useful contribution to the current debate This extensive collection curated by a leading authority is intended to be representative of the debate as a whole without bias faithfully reflecting the positions of various stakeholders global participants and civil society This important work will be an indispensable resource for researchers and students bringing together hundreds of documents produced during more than three decades by governments UN bodies universities think tanks and individual authors in a single comprehensive volume      **The Right-to-food Resolution** United States. The main thesis of this book is that social factors rather than purely economic factors are at the root of the contradiction between market freedom and government control. The author argues that the way markets are socially organized is critical to their capacity for operating independent of government controls. In essence, the social organization of the private economy is the key to the free market system. The economy can function more productively and humanely if efforts are made to reduce state controls and create a market system that is socially self-regulated. Important first steps in this direction are readily observable. The author evaluates two important trends in corporate self-management: worker participation and co-ownership, presenting evidence that these trends are both in the corporate self-interest and in the public interest. Self-regulation is beginning at the intercorporate level where firms compete and collaborate profitably in trade associations. New cooperative associations of small firms are shown to out-compete conglomerates through value-adding partnerships that utilize information technology and require the establishment of cooperative norms. Self-regulation is advanced through social investment, the allocation of capital by combining ethical and economic criteria. Over 450 billion is now being invested with ethical guidelines, suggesting that a balance of social and economic factors will be a vital part of investment practice in the future. The author suggests that if the United States wants to retain a vital economy at home, it must carefully examine the advantages of the social organization of world finance and encourage the power of world markets to regulate themselves without destroying local and national economies.

*The World We Want*. Robert B. Loudon, 2010-03-16. The World We Want compares the future world that Enlightenment intellectuals had hoped for with our own world at present. In what respects do the two worlds differ, and why are they so different? To what extent is and isn't our world the world they wanted, and to what extent do we today still want their world? Unlike previous philosophical critiques and defenses of the Enlightenment, the present study focuses extensively on the relevant historical and empirical record, first by examining carefully what kind of future Enlightenment intellectuals actually hoped for, second by tracking the different legacies of their central ideals over the past two centuries. But in addition to documenting the significant gap that still exists between Enlightenment ideals and current realities, the author also attempts to show why the ideals of the Enlightenment still elude us. What does our own experience tell us about the appropriateness of these ideals? Which Enlightenment ideals do not fit with human nature? Why is meaningful support for these ideals particularly within the US so weak at present? Which of the means that Enlightenment intellectuals advocated for realizing their ideals are inefficacious? Which of their ideals have devolved into distorted versions of themselves when attempts have been made to realize them? How and why, after more than two centuries, have we still failed to realize the most significant Enlightenment ideals? In short, what is dead and what is living in these ideals?
