Experimental Architecture:

Experimental Architecture Peter Cook, 1970 1 Contexts for experiment 2 Experiment is an inevitable 3 National context and international pressure 4 The rise and disintegration of the city 5 The world is a village or a cushion 6 The future of architecture lies in the brain *Experimental Architecture* Rachel Armstrong, 2019-06-11 In this ground breaking book the first to provide an overview of the theory and practice of experimental architecture Rachel Armstrong explores how interdisciplinary design led research practices are beginning to redefine the possibilities of architecture as a profession Drawing on experts from disciplines as varied as information technology mathematics poetry graphic design scenography bacteriology marine applied science and robotics Professor Armstrong delineates original cutting edge architectural experiments through essays quotes poetry equations and stories Written by an acknowledged pioneer of architectural experiment this visionary book is ideal for students and researchers wishing to engage in experimental practice based architectural and artistic research It introduces radical new ideas about architecture and provides ideas and inspiration which students and researchers can apply in their own work and proposals while practitioners can draw on it to transform their creative assumptions and develop thereby a distinctive edge to stand out in a highly competitive profession

Experimental Architecture Rachel Armstrong, 2019-06-11 In this ground breaking book the first to provide an overview of the theory and practice of experimental architecture Rachel Armstrong explores how interdisciplinary design led research practices are beginning to redefine the possibilities of architecture as a profession Drawing on experts from disciplines as varied as information technology mathematics poetry graphic design scenography bacteriology marine applied science and robotics Professor Armstrong delineates original cutting edge architectural experiments through essays quotes poetry equations and stories Written by an acknowledged pioneer of architectural experiment this visionary book is ideal for students and researchers wishing to engage in experimental practice based architectural and artistic research It introduces radical new ideas about architecture and provides ideas and inspiration which students and researchers can apply in their own work and proposals while practitioners can draw on it to transform their creative assumptions and develop thereby a distinctive edge to stand out in a highly competitive profession **Archigram** Simon Sadler, 2005-06-24 The first book length critical and historical account of an ultramodern architectural movement of the 1960s that advocated living equipment instead of buildings In the 1960s the architects of Britain s Archigram group and Archigram magazine turned away from conventional architecture to propose cities that move and houses worn like suits of clothes In drawings inspired by pop art and psychedelia architecture floated away tethered by wires gantries tubes and trucks In Archigram Architecture without Architecture Simon Sadler argues that Archigram s sense of fun takes its place beside the other cultural agitators of the 1960s originating attitudes and techniques that became standard for architects rethinking social space and building technology The Archigram style was assembled from the Apollo missions constructivism biology manufacturing electronics

and popular culture inspiring an architectural movement High Tech and influencing the postmodern and deconstructivist trends of the late twentieth century Although most Archigram projects were at the limits of possibility and remained unbuilt the six architects at the center of the movement Warren Chalk Peter Cook Dennis Crompton David Greene Ron Herron and Michael Webb became a focal point for the architectural avant garde because they redefined the purpose of architecture Countering the habitual building practice of setting walls and spaces in place Archigram architects wanted to provide the equipment for amplified living and they welcomed any cultural rearrangements that would ensue Archigram Architecture without Architecture the first full length critical and historical account of the Archigram phenomenon traces Archigram from its rediscovery of early modernist verve through its courting of students to its ascent to international notoriety for advocating the disappearance of architecture Experimental Architecture in Los Angeles Aaron Betsky, John Chase, Leon

Whiteson, 1991 Experimental Architecture in Los Angeles presents for the first time the recent work of twenty two of the most innovative creative and challenging young architects on the West Coast of the United States Each architect in one way or another is the spiritual child of Frank Gehry and of the second generation of California architects such as Morphosis and Eric Owen Moss who followed in his footsteps Gehry expresses his support for this third generation of architects in his introduction to this volume Each architect or firm among them Michele Saee AKS Runo Josh Schweitzer Guthrie Buresh Koning Eisenberg and COA is presented in an individual chapter with lavish illustrations accompanied by a brief outline and analysis of the work Three critical essays each addressing a different aspect of these architects relationship to the West Coast and to Los Angeles in particular make this volume an indispensable guide to the latest developments in one of architecture s most exciting centers of activity BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved **Out There: Experimental architecture** , 2008 Soft Living Architecture Rachel

Armstrong, 2018-09-06 Soft Living Architecture explores the invention of new architectures based on living processes It crafts a unique intersection between two fast developing disciplines biomimicry and biodesign in architecture and bioinformatics and natural computing in the natural sciences This is the first book to examine both the theory and methodology of architecture and design working directly with the natural world It explores a range of approaches from the use of life like systems in building design to the employment of actual growing and living cell and tissue cultures as architectural materials creating architecture that can change learn and grow with us The use of living architecture is cutting edge and speculative yet it is also inspiring a growing number of designers worldwide to adopt alternative perspectives on sustainability and environmental design The book examines the ethical and theoretical issues arising alongside case studies of experimental practice to explore what we mean by natural in the Anthropocene and raise deep questions about the nature of design and the design of nature This provocative and at times controversial book shows why it will become ever more necessary to embrace living processes in architecture if we are to thrive in a sustainable future **Experimental Architecture** Jacobo

Krauel, Amber Ockrassa, 2004 This volume surveys houses that defy expectations and explode the notion of what constitutes experimental in residential architecture The buildings selected for this book have little in common they come from different cities across the globe they represent the work of different architect often with vastly different outlooks and they break the mold of what the notion of a house is The only thing that unifies the twenty nine projects depicted in this book is that each radically defies convention in some new way Book jacket *Architecture Competitions and the Production of Culture, Quality and Knowledge* Jean-Pierre Chupin, Carmela Cucuzzella, Bechara Helal, 2015-01-26 Winner of the 2016 Bronze medal in Architecture Independent Publisher Book Awards This book comprises a series of 22 case studies by renowned experts and new scholars in the field of architecture competition research In 2015 it constitutes the most comprehensive survey of the dynamics behind the definition organization judging archiving and publishing of architectural landscape and urban design competitions in the world These richly documented contributions revolve around a few questions that can be summarized in a two fold critical interrogation How can design competitions these historical democratic devices both praised and dreaded by designers be considered laboratories for the production of environmental design quality and ultimately for the renewing of culture and knowledge Includes 340 illustrations bibliographical references and index of over 200 cited competitions Keywords Architecture International competitions Architectural judgment Design thinking Digital archiving databases Architectural publications Architectural experimentation Landscape architecture Urban studies *Constructing a Place of Critical Architecture in China* Guanghui Ding, 2016-03-09 For the past 30 years The Chinese journal Time Architecture Shidai Jianzhu has focused on publishing innovative and exploratory work by emerging architects based in private design firms who were committed to new material theoretical and pedagogical practices In doing so this book argues that the journal has engaged in the presentation and production of a particular form of critical architecture described as an intermediate criticality as a response to the particular constraints of the Chinese cultural and political context The journal's publications displayed a dual critique a resistant attitude to the dominant modes of commercial building practice characterised by rapid and large scale urban expansion and an alternative publishing practice focusing on emerging independent architectural practitioners through the active integration of theoretical debates architectural projects and criticisms This dual critique is illustrated through a careful review and analysis of the history and programme of the journal By showing how the work of emerging architects including Yung Ho Chang Wang Shu Liu Jiakun and Urbanus are situated within the context of the journal's special thematic editions on experimental architecture exhibition group design new urban space and professional system the book assesses the contribution the journal has made to the emergence of a critical architecture in China in the context of how it was articulated debated presented and perhaps even produced within the pages of the publication itself The protagonists of critical architecture have endeavoured to construct an alternative mode of form and space with strong aesthetic and socio political implications to the predominant production of architecture under the current Chinese socialist

market economy To rebel against certain forms of domination and suppression by capital and power is by no means to completely reject them rather it is to use them

Design Studio Vol. 5: Experimental Realism Gem Barton, 2022-06-01 The experimental realism provides architects with a vital means to test ideas and the untried By injecting the experimental with a new realism however speculative design has the potential to advance new inclusive equitable and desirable futures Showcasing cutting edge insight the book advocates for the inclusion of speculative spatial design in architectural development It explores the real word application of nearfuture fantastical storytelling and the power of imagination Discover plural design reactions in response to real possible situations

Reconstructing Architecture Thomas A. Dutton, Lian Hurst Mann, *A Critical History of Contemporary Architecture* Asst Prof David Rifkind, Dr Elie G Haddad, 2014-03-28 This book provides a comprehensive critical overview of the developments in architecture from 1960 to 2010 The first section provides a presentation of major movements in architecture after 1960 and the second a geographic survey that covers a wide range of territories around the world This book not only reflects the different perspectives of its various authors but also charts a middle course between the aesthetic histories that examine architecture solely in terms of its formal aspects and the more ideological histories that subject it to a critique that often skirts the discussion of its formal aspects

Designs for Experimentation and Inquiry Åsa Mäkitalo, Todd E. Nicewonger, Mark Elam, 2019-06-27 Designs for Experimentation and Inquiry examines how digital media is reconfiguring the established worlds of research education and professional practice It reflects on the theoretical methodological and ethical issues shaping contemporary engagements with digital learning and offers insights for both analysing and intervening in digital learning practices This insightful volume fills a gap in the current literature by bringing together experiences from Sociocultural Studies of Learning Science and Technology Studies and Design Studies Each chapter is an innovative case study examining a different aspect of digital media's role in research education and professional practice by exploring topics such as Learning practices and digitalized dialogue Digital design experiments Digitally mediated collaborations Ethical digital inquiry and design Expertly researched and written this book is a unique resource for scholars researchers and professionals working in the fields of digital design applied technology and the learning sciences The Preface and Introduction as well as Chapters 3 and 5 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Disappearing Architecture Georg Flachbart, Peter Weibel, 2005-09-09 The creation of new environments through the use of developments in Information Technology is significantly altering not only architecture itself but also the roles and tasks of the architects Architecture can no longer be described in the terms we are familiar with since it no longer corresponds to the form of architecture as we know it an inclusive and exclusive structure clearly defined with a single interior and a single exterior For architects the challenge of the future will increasingly lie in creatively coming to terms with hybrid environments understanding and exploiting the

design potential of digital spaces within the physical world and redefining the role of architecture within a visually dominated culture This volume presents a valuable and attractive contribution to the contemporary discussion on this subject

Building A Revolution Charlie Q.L. Xue, 2005-09-01 Building a Revolution Chinese Architecture Since 1980 presents a picture of Chinese architecture in transition as the entire economy shifted from being planned and state controlled to being market led The book also examines the national form and Chinese identity the impact of international architecture housing reform and the emergence of architects in private practice Both celebrated and young Chinese architects are portrayed and the notable buildings in the prosperous coastal cities are highlighted Through this book on modern Chinese architecture the reader will appreciate the influence of globalization and modernization on the most populous country in the world *The Architecture Co-laboratory* Kas Oosterhuis, Lukas Feireiss, 2006 Publicatie n a v de conferentie gehouden op 1 april 2006 op de faculteit Bouwkunde van de TU Delft over de huidige en toekomstige veranderingen rond de digitaal ontworpen architectuur en designpraktijk **Languages and Compilers for Parallel Computing** Bill Pugh, Chau-Wen

Tseng, 2005-12-13 This book constitutes the thoroughly refereed post proceedings of the 15th International Workshop on Languages and Compilers for Parallel Processing LCPC 2002 held in College Park MD USA in July 2002 The 26 revised full papers presented were carefully selected during two rounds of reviewing and improvement from 32 submissions All current issues in parallel processing are addressed in particular memory constrained computation compiler optimization performance studies high level languages programming language consistency models dynamic parallelization parallelization of data mining algorithms parallelizing compilers garbage collection algorithms and evaluation of iterative compilation **A Dictionary of Architecture and Landscape Architecture**, **Star Ark** Rachel Armstrong, 2016-11-13 As space ventures have become more numerous leading scientists and theorists have offered ways of building a living habitat in a hostile environment taking an ecosystems view of space colonization The contributors to this volume take a radical multi disciplinary view of the challenge of human space colonization through the ongoing project Persephone This book fundamentally challenges prevalent ideas about sustainability and proposes a new approach to resource austerity and conservation and providing truly sustainable approaches that are life promoting Readers will learn the details of the plans for Persephone a real project that is part of the company Icarus Interstellar s plans for the design and engineering of a living interior on a worldship to be constructed in Earth s orbit within 100 years Although the timeframe itself is only an estimate since it is contingent on many significant developments including funding and technological advances the industry consensus is that within 100 years we will see manned space exploration beyond our solar system This notion is shared by organizations such as the Initiative for Interstellar Studies and the DARPA funded 100 year starship project This book specifically develops the principles for the construction of a living habitat within a worldship a multi generational starship that contains its own world that supports colonists as it travels across great distances between stars at a speed much slower than light Far from being a

sterile industrial setup such as the ISS or even being a bucolic suburbia as proposed by Gerard O'Neill in the 1970s this worldship will provide the pre conditions for sustaining life beyond Earth's environment which may also lead to the evolution of non terrestrial ecologies Drawing on the principles of ecopoiesis and insights offered by the Biosphere 2 experiment that demonstrated what we have to learn about ecosystem construction this book proposes first designing the soils of such a space It should then be possible to set up the conditions that a first generation of colonists may experience in leaving our solar system to find new worlds to settle perhaps in spreading life throughout the universe Although the book takes a unique view of ecology and sustainability within the setting of a traveling starship it is equally concerned with the human experience on artificial worlds Chapters come from a range of multi disciplinary thinkers who shed light on the brave new future ahead from different angles
