**Evolution and International Organization** Volker Rittberger, 2013-03-13 phase two spanned the time from the late 1930 s to about 1950 Sohn s period III and Yalem s periods II and III The literature produced during these years revealed an ambivalent reaction toward the apparent inability of international organizations particularly the League of Nations to control violence or contribute to the solution of conflicts among major powers The advocates of a world state saw vindicated their position that an even stronger universal supranational authority was required to assure the repression or deterrence of international aggression However

the realist position laying claim to greater scientific validity argued the importance of political and ideological conflicts as barriers to international cooperation Yalem 1966 2 The excellent analysis by Ronald Rogowski 1968 shows how the twin positions of idealism and realism proceed from an identical paradigm of world politics a nation state system with little or no integrative superstructure They differ however in their epistemological outlook The realists display a positivistic standpoint taking the international system and its premise power politics as unalterable givens they inquire into the feasibility of international organization under these circumstances The idealists adopt what one might call a critical approach toward social analysis they do not deny the positive validity of the realists findings but they reject the notion that power politics is an unalterable impediment Strategic Organization Development Therese F. Yaeger, Peter F. Sorensen, 2009-10-01 This second volume in the Contemporary Trends in Organization Development and Change Series addresses one of the most complex and important issues for management and organization development today how to plan for and create an organization capable of not only competing but excelling in an almost impossibly turbulent and uncertain environment The book brings together a series of articles by practitioner scholars Those authors who have the responsibility for helping their organization create the future and who also have the responsibility of helping us conceptually understand the process of strategic OD In this book you can sense the value of both of these voices the practitioner and the scholar These authors include organization development executives from global Fortune 500 organizations major community service organizations major academic contributors to the field and OD practitioners from major consulting firms Each author makes a unique contribution by providing strategies for planning the future implementing change and creating organizational capabilities for sustained success New and current models for strategic organization development and candid discussions of issues difficulties and ways of coping with unanticipated events are provided This book is dedicated to contributing to a better understanding and sharing of how major corporations community service organizations and OD consultants are experiencing and working with one of the most important organizational problems of today how to manage change for success
