Invention to Innovation Dr Larry Marshall, 2023-06-05 Invention to Innovation charts a course for scientists leaders investors and policy makers to translate research into growing innovative competitive companies and industries With extensive experience and insights gained over three decades Dr Larry Marshall demonstrates how science can generate new value that grows markets and creates jobs while also delivering social environmental and economic benefits Through a combination of advice examples and vision this thought provoking work shows how Australia's world class science can navigate across the Valley of Death to become successful innovations and grow our economy With contributions from leaders in business research venture and scientists who have made the leap to become scientist CEOs Invention to Innovation is essential reading for anyone who believes Australia's excellent science deserves a vibrant globally competitive innovation ecosystem to ensure our sustainable and prosperous future Praise for Invention to Innovation The Digital Future has huge potential to unlock new waves of innovation and economic prosperity for all Australians It's a future where Aussie kids see Aussie scientists and Aussie entrepreneurs solve Australian problems and take them to the world Larry is passionate about this future for our children and this book is all about how to make it happen

Melanie Silva Managing Director of Google Australia and New Zealand Powered by his extensive scientific entrepreneurship Dr Larry Marshall shows us how to couple science with innovation to produce prosperity Human ingenuity is an inexhaustible resource this book explains how to mine it and refine it into societal value Dr Alan Finkel former Australian Chief Scientist President of the Australian Academy of Technology and Engineering Chancellor of Monash University CEO and Founder of Axon Instruments For Australia's budding technology entrepreneurs Invention to Innovation is an excellent how to manual

full of practical advice and offering useful tangible guidance on how our scientists and entrepreneurs can seize the tremendous opportunities Australia offers Michelle Simmons CEO and Founder of Silicon Quantum Computing and 2018 Australian of the Year Few scientists have transitioned to become business leaders or to create public companies but Larry Marshall has done just that and by sharing uncomfortable truths failures and successes all anchored by the real life experience of someone who has crossed the Valley of Death more than once Larry seeks to provide other scientists with the confidence that they too can do it Catherine Livingstone AO former Chair of CSIRO Commonwealth Bank and Telstra former President of the Business Council of Australia and former CEO of Cochlear Australia has a proud history of scientific research and industrial innovation But despite this we ve got a lousy track record of translating this innovation into real impact especially commercial impact We will only succeed if we try This book is an important first step towards success Dr Andrew Forrest AO Chairman and Founder of Fortescue Metals Group Fortescue Future Industries Minderoo Foundation and Tattarang **Always Inventing** Tom L. Matthews, 2015-03-10 A biography with photographs and quotes from Bell himself which follows this well known inventor from his childhood in Scotland through his life long efforts to come up with ideas that would improve people s lives **I Invented the Modern Age** Richard Snow, 2013-05-14 From the acclaimed popular historian Richard Snow who writes with verve and a keen eye The New York Times Book Review comes a fresh and entertaining account of Henry Ford and his invention of the Model T the ugly cranky invincible machine that defined twentieth century America Every century or so our republic has been remade by a new technology 170 years ago the railroad changed Americans conception of space and time in our era the microprocessor revolutionized how humans communicate But in the early twentieth century the agent of creative destruction was the gasoline engine as put to work by an unknown and relentlessly industrious young man named Henry Ford Born the same year as the battle of Gettysburg Ford died two years after the atomic bombs fell and his life personified the tremendous technological changes achieved in that span Growing up as a Michigan farm boy with a bone deep loathing of farming Ford intuitively saw the advantages of internal combustion Resourceful and fearless he built his first gasoline engine out of scavenged industrial scraps It was the size of a sewing machine From there scene by scene Richard Snow vividly shows Ford using his innate mechanical abilities hard work and radical imagination as he transformed American industry In many ways of course Ford s story is well known in many more ways it is not Richard Snow masterfully weaves together a fascinating narrative of Ford s rise to fame through his greatest invention the Model T When Ford first unveiled this car it took twelve and a half hours to build one A little more than a decade later it took exactly one minute In making his car so quickly and so cheaply that his own workers could easily afford it Ford created the cycle of consumerism that we still inhabit Our country changed in a mere decade and Ford became a national hero But then he soured and the benevolent side of his character went into an ever deepening eclipse even as the America he had remade evolved beyond all imagining into a global power capable of producing on a vast scale not only cars

but airplanes ships machinery and an infinity of household devices A highly pleasurable read filled with scenes and incidents from Ford s life particularly during the intense phase of his secretive competition with other early car manufacturers I Invented the Modern Age shows Richard Snow at the height of his powers as a popular historian and reclaims from history Henry Ford the remarkable man who indeed invented the modern world as we know it

The Ethics of Invention Sheila Jasanoff,2016-08-30 We live in a world increasingly governed by technology but to what end Technology rules us as much as laws do It shapes the legal social and ethical environments in which we act Every time we cross a street drive a car or go to the doctor we submit to the silent power of technology Yet much of the time the influence of technology on our lives goes unchallenged by citizens and our elected representatives In The Ethics of Invention renowned scholar Sheila Jasanoff dissects the ways in which we delegate power to technological systems and asks how we might regain control Our embrace of novel technological pathways Jasanoff shows leads to a complex interplay among technology ethics and human rights Inventions like pesticides or GMOs can reduce hunger but can also cause unexpected harm to people and the environment Often as in the case of CFCs creating a hole in the ozone layer it takes decades before we even realize that any damage has been done Advances in biotechnology from GMOs to gene editing have given us tools to tinker with life itself leading some to worry that human dignity and even human nature are under threat But despite many reasons for caution we continue to march heedlessly into ethically troubled waters As Jasanoff ranges across these and other themes she challenges the common assumption that technology is an apolitical and amoral force Technology she masterfully demonstrates can warp the meaning of democracy and citizenship unless we carefully consider how to direct its power rather than let ourselves be shaped by it The Ethics of Invention makes a bold argument for a future in which societies work together in open democratic dialogue to debate not only the perils but even more the promises of technology
