Mallon, 2004-01-07 Gay parenting is a topic on which almost everyone has an opinion but almost nobody has any facts Here at last is a book based on a thorough review of the literature as well as interviews with a pioneering group of men who in the 1980s chose to become fathers outside the boundaries of a heterosexual union through foster care adoption and other kinship relationships This book reveals how very natural and possible gay parenthood can be What factors influence this decision How do the experiences of

gay dads compare to those of heterosexual men How effectively do professional services such as support groups serve gay fathers and prospective gay fathers What elements of the social climate are helpful and hurtful Gay Men Choosing Parenthood challenges a great deal of misinformation showing how gay fathers from different backgrounds adapted perceived and constructed their options and their families [Index to Legal Periodicals & Books](#) ,1998 [Legal Issues Facing the Nontraditional Family](#), 1995 Marc E. Mallon,2006 This book explores the myths and prejudices that influence attitudes towards lesbians and gay men as parents It also suggests ways that social workers can more effectively support lesbian and gay adopters and foster parents [The Oxford Handbook of Comparative Law](#) Mathias Reimann,Reinhard Zimmermann,2019-03-26 This fully revised and updated second edition of The Oxford Handbook of Comparative Law provides a wide ranging and diverse critical survey of comparative law at the beginning of the twenty first century It summarizes and evaluates a discipline that is time honoured but not easily understood in all its dimensions In the current era of globalization this discipline is more relevant than ever both on the academic and on the practical level The Handbook is divided into three main sections Section I surveys how comparative law has developed and where it stands today in various parts of the world This includes not only traditional model jurisdictions such as France Germany and the United States but also other regions like Eastern Europe East Asia and Latin America Section II then discusses the major approaches to comparative law its methods goals and its relationship with other fields such as legal history economics and linguistics Finally section III deals with the status of comparative studies in over a dozen subject matter areas including the major categories of private economic public and criminal law The Handbook contains forty eight chapters written by experts from around the world The aim of each chapter is to provide an accessible original and critical account of the current state of comparative law in its respective area which will help to shape the agenda in the years to come Each chapter also includes a short bibliography referencing the definitive works in the field [West's Encyclopedia of American Law](#) West Group,1998 Contains over four thousand alphabetically arranged entries that provide information about terms concepts events movements cases and persons significant to U S law and includes sidebars and In Focus articles tables and indexes and a variety of reference materials **The Women's Advocate** ,1991 *Equality for Same-Sex Couples* Yuval Merin,2010-02-15 During the past three decades nations all over the world have been debating whether to allow same sex couples to marry or at least grant these couples various rights associated with marriage In

Equality for Same Sex Couples Yuval Merin presents the first comparative study of the legal regulation of same sex partnerships worldwide as well as a unique survey of the status of same sex couples in Europe Merin begins by providing a historical overview of the transformation of marriage from antiquity to the present He then identifies and critically compares four principal models for the legal regulation and recognition of same sex partnerships civil marriage registered partnership domestic partnership and cohabitation Merin concludes that all of the models except civil marriage discriminate against gays and lesbians just as the separate but equal doctrine discriminated against African Americans thus so called alternatives to marriage even if they provide the same rights and benefits as marriage are inherently unequal and therefore unconstitutional

Resources in Education ,2000-04 *Handbook of Parenting: Being and becoming a parent* Marc H. Bornstein,2002

Completely revised and expanded from four to five volumes this new edition of the Handbook of Parenting appears at a time that is momentous in the history of parenting Parenting and the family are today in a greater state of flux question and redefinition than perhaps ever before We are witnessing the emergence of striking permutations on the theme of parenting blended families lesbian and gay parents and teen versus fifties first time moms and dads One cannot but be awed on the biological front by technology that now not only renders postmenopausal women capable of childbearing but also presents us with the possibility of designing babies Similarly on the sociological front single parenthood is a modern day fact of life adult child dependency is on the rise and parents are ever less certain of their own roles even in the face of rising environmental and institutional demands that they take increasing responsibility for their offspring The Handbook of Parenting concerns itself with different types of parents mothers and fathers single adolescent and adoptive parents basic characteristics of parenting behaviors knowledge beliefs and expectations about parenting forces that shape parenting evolution genetics biology employment social class culture environment and history problems faced by parents handicap marital difficulties drug addiction and practical concerns of parenting how to promote children s health foster social adjustment and cognitive competence and interact with school legal and public officials Contributors to the Handbook of Parenting have worked in different ways toward understanding all these diverse aspects of parenting and all look to the most recent research and thinking in the field to shed light on many topics every parent wonders about Each chapter addresses a different but central topic in parenting each is rooted in current thinking and theory as well as classical and modern research in that topic each has been written to be read and absorbed in a single sitting In addition each chapter follows a standard organization including an introduction to the chapter as a whole followed by historical considerations of the topic a discussion of central issues and theory a review of classical and modern research forecasts of future directions of theory and research and a set of conclusions Of course contributors own convictions and research are considered but contributions to this new edition present all major points of view and central lines of inquiry and interpret them broadly The Handbook of Parenting is intended to be both comprehensive and state of the art As the expanded scope of this second edition amply shows parenting is naturally and

closely allied with many other fields **Handbook of Parenting** Marc H. Bornstein, 2005-02-16 Please see Volume I for a full description and table of contents for all four volumes **Handbook of Family Therapy** Thomas L. Sexton, Jay Lebow, 2015-12-07 Integrative research based multisystemic these words reflect not only the state of family therapy but the nature of this comprehensive handbook as well The contributors all well recognized names who have contributed extensively to the field accept and embrace the tensions that emerge when integrating theoretical perspectives and science in clinical settings to document the current evolution of couples and family therapy practice and research Each individual chapter contribution is organized around a central theme that the integration of theory clinical wisdom and practical and meaningful research produce the best understanding of couple and family relationships and the best treatment options The handbook contains five parts Part I describes the history of the field and its current core theoretical constructs Part II analyzes the theories that form the foundation of couple and family therapy chosen because they best represent the broad range of schools of practice in the field Part III provides the best examples of approaches that illustrate how clinical models can be theoretically integrative evidence based and clinically responsive Part IV summarizes evidence and provides useful findings relevant for research and practice Part V looks at the application of couple and family interventions that are based on emerging clinical needs such as divorce and working in medical settings Handbook of Family Therapy illuminates the threads that are common to family therapies and gives voice to the range of perspectives that are possible Practitioners researchers and students need to have this handbook on their shelves both to help look back on our past and to usher in the next evolution in family therapy
