Joris A. C. van Esch,2015-11-06 A steadfast misbelief in precision bombing evolved into the leading concept for US Army Air Force during the Second World War This concept envisioned the destruction of the German industrial and economic system as the swiftest path to victory However the belief in survivability of bombers through self defense proved incorrect and the Allies realized that the Luftwaffe had to be defeated first by attacking the German aircraft industry On 22 February 1944 Eighth Air Force conducted a mission as part of this offensive During this mission the bombers were recalled because of severe weather On the return trip the airmen decided not to abandon the mission outright but to attack targets of opportunity Because of navigational errors a section of 446 Bombardment Group misidentified the Dutch city Nijmegen as in Germany and bombed it Due to aiming errors the greater part of the bombs missed the designated marshalling yards by a kilometer and hit the city center instead The bombardment caused chaos on the ground It surprised the citizens ignorant by earlier faulty alarms and damage caused great difficulties for the provision of aid relief As a result the bombardment killed about 800 citizens and destroyed the historic city center
