Legitimizing Identities The Self Presentations Of Rulers And Subjects:

Legitimizing Identities Rodney Barker, 2001-10-18 Rulers of all kinds from feudal monarchs to democratic presidents and prime ministers justify themselves to themselves through a variety of rituals rhetoric and dramatisations using everything from architecture and coinage to etiquette and portraiture This kind of legitimation self legitimation has been overlooked in an age which is concerned principally with how government can be justified in the eyes of its citizens In this 2001 book Rodney Barker argues that at least as much time is spent by rulers legitimating themselves in their own eyes and cultivating their own sense of identity as is spent in trying to convince ordinary subjects Once this dimension of ruling is taken into account a far fuller understanding can be gained of what rulers are doing when they rule It can also open the way to a more complete grasp of what subjects are doing both when they obey and when they rebel *Legitimizing Identities* Rodney S.

Barker, 2001 All rulers spend time convincing themselves of their right to rule *Legitimizing Identities* draws on a growing body of research in political science history and sociology to show how governments of all kinds devote resources and energy to cultivating their identity for their own self justification and esteem **Legitimizing the Order** Hakan T.

Karateke, Maurus Reinkowski, 2005-07-01 A dynasty that ruled for more than six centuries certainly developed many strategies to confront legitimacy crises and undertook various endeavors to legitimize their rule After the introduction that establishes a theoretical framework for examining the Ottoman state s legitimacy the present volume deploys into three sections The Well Founded Order deals with the question of how the Ottomans imagined the order of their polity and how they tried to live up to this self representation Religiosity and Orthodoxy turns to the question of religiosity and orthodoxy as defined by Ottoman political theory and how these concepts related to the issue of legitimacy The last section discusses how the Ottoman notions of legitimacy were exposed to criticism discussion or simply to transformations in situations of crisis especially in the 18th and 19th centuries Routledge Handbook of Citizenship in the Middle East and North Africa Roel

Meijer, James N. Sater, Zahra R. Babar, 2020-11-23 This comprehensive Handbook gives an overview of the political social economic and legal dimensions of citizenship in the Middle East and North Africa from the nineteenth century to the present The terms citizen and citizenship are mostly used by researchers in an off hand self evident manner A citizen is assumed to have standard rights and duties that everyone enjoys However citizenship is a complex legal social economic cultural ethical and religious concept and practice Since the rise of the modern bureaucratic state in each country of the Middle East and North Africa citizenship has developed differently In addition rights are highly differentiated within one country ranging from privileged underprivileged and discriminated citizens to non citizens Through its dual nature as instrument of state control as well as a source of citizen rights and entitlements citizenship provides crucial insights into state citizen relations and the services the state provides as well as the way citizens respond to these actions This volume focuses on five themes that cover the crucial dimensions of citizenship in the region Historical trajectory of citizenship since the nineteenth century until

independence Creation of citizenship from above by the state Different discourses of rights and forms of contestation developed by social movements and society Mechanisms of inclusion and exclusion Politics of citizenship nationality and migration Covering the main dimensions of citizenship this multidisciplinary book is a key resource for students and scholars interested in citizenship politics economics history migration and refugees in the Middle East and North Africa **The Oxford Handbook of Criminology** Alison Liebling, Shadd Maruna, Lesley McAra, 2017 Beginning with the history of criminology this updated and revised edition deals with topics as diverse as policing substance abuse juvenile crime statistics prisons victims and organised crime in Britain **Democracy and Public Space** John Parkinson, 2012 In an online interconnected world democracy is increasingly made up of wikis and blogs pokes and tweets Citizens have become accidental journalists thanks to their handheld devices politicians are increasingly working online and the traditional sites of democracy assemblies public galleries and plazas are becoming less and less relevant with every new technology And yet this book argues such views are leading us to confuse the medium with the message focusing on electronic transmission when often what cyber citizens transmit is pictures and narratives of real democratic action in physical space Democratic citizens are embodied take up space battle over access to physical resources and perform democracy on physical stages at least as much as they engage with ideas in virtual space Combining conceptual analysis with interviews and observation in capital cities on every continent John Parkinson argues that democracy requires physical public space that some kinds of space are better for performing some democratic roles than others and that some of the most valuable kinds of space are under attack in developed democracies He argues that accidental publics like shoppers and lunchtime crowds are increasingly valued over purposive active publics over citizens with a point to make or an argument to listen to This can be seen not just in the way that traditional protest is regulated but in the ways that ordinary city streets and parks are managed even in the design of such quintessentially democratic spaces as legislative assemblies The book offers an alternative vision for democratic public space and evaluates 11 cities from London to Tokyo against that ideal **Squatting and the State** Lorna Fox O'Mahony, Marc L. Roark, 2022-08-25 This book offers a fresh theoretical approach and methodology for tackling the most pressing property problems of our time **Deliberating in the Real World** John Parkinson, 2006-06-15 Deliberative democracy has become the central reference point for democracy theorists over the last decade or so influencing normative frameworks and the ways we conceptualize the workings of democratic societies It has also been linked with a burst of experimentation with new procedures that involve citizens directly in deliberations about public policy But there is a contradiction at the heart of deliberative democracy it seems that it cannot deliver legitimate agreements Deliberative decisions are said to be legitimate when all those subject to them take part in free and equal debate but in complex societies that can never happen Few people can deliberate together at any one time certainly not in any strict sense so how can the results of a deliberative event be legitimate for non participants And why would people with passionately held views sit down

and deliberate when there seems little advantage in them doing so This book explores these problems in theory and practice searching for a solution that does not merely dismiss a strict understanding of deliberative democratic criteria It reconsiders the theory of legitimacy and deliberative democracy but goes further by examining cases of deliberation on health policy in the United Kingdom to see what problems emerge in practice and how real political actors deal with them The result is a complete rethink of the institutional limits and possibilities of deliberative democracy one which abandons the search for perfection in any one institution and looks instead to the concept of a multifaceted deliberative system **Lawyers in**

Conflict and Transition Kieran McEvoy, Louise Mallinder, Anna Bryson, 2022-03-17 Countries undergoing or recovering from conflict and authoritarianism often face profound rule of law challenges The law on the statute books may be repressive judicial independence may be compromised and criminal justice agencies may be captured by powerful interests How do lawyers working within such settings imagine the law How do they understand their ethical obligations towards their clients and the rule of law What factors motivate them to use their legal practice and social capital to challenge repressive power What challenges and risks can they face if they do so And when do lawyers facilitate or acquiesce to illegality and injustice Drawing on over 130 interviews from Cambodia Chile Israel Palestine South Africa and Tunisia this book explores the extent to which theoretical understandings within law and society research on the motivations strategies tactics and experiences of lawyers within democratic states apply to these more challenging environments *Whose Peace?* Sarah Birgitta Kanafani

von Billerbeck, 2017 This book examines local ownership in UN peacekeeping and how national and international actors interact and share responsibility in fragile post conflict contexts Transition in Afghanistan William Maley, 2018-04-17 This book by one of the most experienced authorities on the subject presents a deep analysis of the very difficult current situation in Afghanistan Covering a wide range of important subjects including state building democracy war the rule of law and international relations the book draws out two overarching key factors the way in which the prevailing neopatrimonial political order has become entrenched making it very difficult for any other political order to take root and the hostile region in which Afghanistan is located especially the way in which an ongoing creeping invasion from Pakistani territory has compromised the aspirations of both the Afghan government and its international backers to move the country to a more stable position **Local Legitimacy and International Peace Intervention** Oliver P. Richmond, 2020-07-31 Furthering

the understanding of the legitimate authority in internationally led peace and state building interventions This study focuses on understanding the complexities of legitimate authority in internationally led peace and statebuilding interventions Innovative theoretical approach engaging with local and contextual forms of legitimacy in peacebuilding contexts Introduces nuanced understandings of the concept of legitimacy Based on wide ranging fieldwork and twelve case studies Broader lessons for IR and for policy makers Includes local authors This edited volume focuses on disentangling the interplay of local peacebuilding processes and international policy via comparative theoretical and empirical work on the question of

legitimacy and authority Using a number of conflict affected regions as case studies including Kosovo Iraq Bosnia Herzegovina and Sudan the book incorporates the expertise of a range of international scholars in order to understand the dynamics of local peacebuilding the construction of legitimate authority and its interplay with internationally led peace and state building interventions The commissioned chapters advance our understanding of local legitimacy sustainable international engagement and the hybrid forms of authority they produce Constructivism Reconsidered Patrick James, Mariano E Bertucci, Jarrod Hayes, 2018-11-12 In international relations IR the theory of constructivism argues that the complicated web of international relations is not the result of basic human nature or some other unchangeable aspect but has been built up over time and through shared assumptions Constructivism Reconsidered synthesizes the nature of and debates on constructivism in international relations providing a systematic assessment of the constructivist research program in IR to answer specific questions What extent of disagreement exists with regard to the meaning of constructivism To what extent is constructivism successful as an alternative approach to rationalism in explaining and understanding international affairs Constructivism Reconsidered explores constructivism's theoretical empirical and methodological strengths and weaknesses and debates what these say about its past present and future to reach a better understanding of IR in general and how constructivism informs IR in particular **Spreading Democracy and the Rule of Law?** Wojciech Sadurski, Adam Czarnota, Martin Krygier, 2006-07-30 The accession of eight post communist countries of Central and Eastern Europe and also of Malta and Cyprus to the European Union in 2004 has been heralded as perhaps the most important development in the history of European integration so far While the impact of the enlargement on the constitutional structures and practices of the EU has already generated a rich scholarly literature the influence of the accession on constitutionalism democracy human rights and the rule of law among the new member states has been largely ignored This book fills this gap and addresses the question of the consequences of the external force of European enlargement upon the understanding and practice of democracy and the rule of law and among both the main legal political actors and the general public in the new member states A number of leading legal scholars sociologists and political scientists both from Central and Eastern Europe and from outside address these issues in a systematic and critical way Taken together these essays help answer a fundamental question does the European Union have the potential of promoting and consolidate democracy and human rights The Combination of All Forms of Struggle Alexandra Rachel Phelan, 2025-04-01 Over the course of a decades long armed conflict the Colombian state took a variety of approaches toward its insurgent opponent the Revolutionary Armed Forces of Colombia FARC Successive governments swung between pursuing negotiations and responding with military counterinsurgency measures FARC for its part proclaimed its commitment to the combination of all forms of struggle seeking legitimation through both political and military means Investigating the relationship between FARC and the Colombian state from the outbreak of conflict in 1964 to the signing of the final peace agreement in 2016 Alexandra Rachel Phelan offers new

insight into the dynamics of insurgencies In such conflicts both states and insurgents seek to assert their legitimacy which has crucial implications for any prospective resolution Phelan examines how FARC adopted different means of legitimation as part of its overall political and military strategy and how these strategies influenced government responses She argues that the case of Colombia demonstrates that insurgents are more likely to engage in negotiations when the state recognizes their political legitimacy than when it demands their defeat During a protracted conflict when it is unclear that the state can win by military strength alone offering incentives for political settlements can minimize and perhaps even end fighting Drawing on interviews with former and active FARC leaders and Colombian government officials as well as access to key primary documents this book sheds new light on the Colombian conflict and provides rich theoretical understanding of the role of legitimacy in counterinsurgency more broadly

Oil States in the New Middle East Kjetil Selvik, Bjørn Olav Utvik, 2015-07-16 Oil has been central to regime survival for oil states across the Arabian Peninsula and has been at the heart of their attempts to defuse the wave of Arab revolutions However in 2011 revolution hit Libya the most oil dependent regime in the Middle East The political storm winds that have swept this region have thrown into doubt the resilience of Arab rentier states and highlight how the political effects of oil vary across the oil producing countries Oil States in the New Middle East brings together leading experts to critically assess the centrality of oil and the relevance of Rentier State Theory in light of the post 2011 upheaval across the Middle East and North Africa It combines overall reflections on the political dynamics in oil states with focused case investigations of individual countries Taking as its starting point the centrality of oil in explanations of regime survival the book analyses how the oil states have responded to and fared throughout the Arab popular upheavals resulting in a critical assessment of the continued relevance of Rentier State Theory While observers have asked how the uprisings varied between oil and non oil states this book turns the comparative focus inward arguing for a more fine grained understanding of the political effects of oil in different oil producing countries This book would be of interest to students and scholars of Middle East North Africa and Gulf Studies Oil and Politics as well as Comparative Politics and International Political Economy
