That the idea of world revolution was crucial for the Bolshevik leaders in the years following the 1917 revolution is a well known fact But what did the party's rank and file make of it How did it resonate with the general population And what can a social history of international solidarity tell us about the transformation of Soviet society from NEP to Stalinism This book undertakes the first in depth analysis of the discourses and practices of internationalism in early Soviet society during the years of revolution civil war and NEP using forgotten archival materials and contemporary sources      World Revolution, 1917-1936 C. L. R. James, 2017-07-27

Originally published in 1937 C L R James's *World Revolution* is a pioneering Marxist analysis of the history of revolutions during the interwar period and of the fundamental conflict between Trotsky and Stalin James who was a leading Trotskyist activist in Britain outlines Russia's transition from Communist revolution to a Stalinist totalitarian state bureaucracy He also provides an account of the ideological contestations within the Communist International while examining its influence on the development of the Soviet Union and its changing role in revolutions in Spain China Germany and Central Europe Published to commemorate the centenary of the Russian Revolution this definitive edition of *World Revolution* features a new introduction by Christian H gsbjerg and includes rare archival material selected contemporary reviews and extracts from James's 1939 interview with Trotsky      The State and Revolution Vladimir Ilyich Lenin, 2022-08-10

In *The State and Revolution* Vladimir Ilyich Lenin intricately examines the relationship between the state and the proletariat arguing that the state is an instrument of class oppression Written amidst the tumult of the early 20th century Lenin employs a dialectical materialist approach reminiscent of Marx's theories critiquing liberal notions of the state and advocating for its dismantlement by the working class His succinct yet profound style captures the urgency of revolutionary thought situating the text within the broader context of Marxism's evolution and its application to the socio political landscape of Russia Lenin's work serves as both a theoretical treatise and a practical guide for revolutionaries seeking to grasp the necessity of state power as a temporary means to achieve the dictatorship of the proletariat Lenin a pivotal figure in the socialist movement was profoundly influenced by the socio political upheavals of his time His personal experiences and the failures of previous revolutions galvanized him to elucidate the mechanisms that sustain capitalist states By incorporating historical examples and philosophical discourse Lenin not only aimed to inspire action but also to provide a framework for understanding the transformative potential of the working class For readers interested in revolutionary theory political science or the history of socialism *The State and Revolution* is an indispensable text It challenges readers to consider the nature of state power and its implications for societal change making it essential for anyone seeking to

understand the dynamics of class struggle and the path toward emancipation     *Lenin and World Revolution [by] Stanley W. Page* Stanley W. Page,     *A Century of Conflict* Stefan Thomas Possony, 1953 Dotyczy m in Polski     *Lenin, Trotsky, Germany and the Treaty of Brest-Litovsk* I[O]rii Fel'shtinskiĭ, 2012 The Treaty that Ended the World Revolution For decades historians have been trying to understand why the world communist revolution that broke out in Europe in 1917 1919 in the wake of the horror of the First World War ended in defeat The overthrow of the Russian monarchy in March 1917 and the Bolshevik coup eight months later was followed by the Treaty of Brest Litovsk a separate peace between Russia and the Central Powers with unprecedented annexations and reparations Vladimir Lenin called for the conclusion of a separate peace with Germany Nikolai Bukharin called for immediate revolutionary war Lev Trotsky adhered to a middle position which has entered history under the slogan neither peace nor war What is clear is that by forming a separate peace with Germany and her allies in order to stabilize Soviet rule in Russia Lenin's government delivered a stab in the back to the German socialist revolution As a result by 1919 the Soviet government headed by Lenin had survived in Russia and it became the global center of the Communist International movement Join scholar and noted Russian historian Yuri Felshtinsky as he examines existing and newly discovered source material for a fresh look at this pivotal turning point in world history     *The Global Impact of the Russian Revolution* Aaron Retish, Matthew Rendle, 2021-05-13 This book explores the global impact of the Russian Revolution arguably the most influential revolution of the modern age It explores how the Revolution influenced political movements on the radical Left and Right across the world and asks whether the Russian Revolution remains relevant today In Part one four leading historians debate whether or not the Russian Revolution's legacy endures today Part two presents examples of how the Revolution inspired political movements across the world from Latin America and East Asia to Western Europe and the Soviet Union The Revolution inspired both sides of the political spectrum from anarchists and leftist radicals who fought for a new socialist reality and dreamed of world revolution to those who on the far Right who tried to stop them Part three an interview with the historian S A Smith gives a personal account of how the Revolution influenced a scholar and his work This volume shows the complexity of the Russian Revolution in today's political world The chapters in this book were originally published as a special issue of the journal *Revolutionary Russia*     *Pattern for World Revolution* Ypsilon (pseud.), 1947 General staff in Moscow Professional revolutionaries Decline of world revolution the end of the Comintern Stalintern     *The Global Revolution* Silvio Pons, 2014-08-28 The Global Revolution A History of International Communism 1917 1991 establishes a relationship between the history of communism and the main processes of globalization in the past century Drawing on a wealth of archival sources Silvio Pons analyses the multifaceted and contradictory relationship between the Soviet Union and the international communist movement to show how communism played a major part in the formation of our modern world The volume presents the argument that during the age of wars from 1914 to 1945 the establishment of the Soviet state in Russia and the birth of the communist movement had an enormous impact because of

their promise of world revolution and international civil war Such perspective appeared even more plausible in the aftermath of the Second World War and of revolution in China which paved the way for the expansion of communism in the post colonial world Communism challenged the West in the Cold War by means of anti capitalist modernization and anti imperialist mobilization showing itself to be a powerful factor in the politicization of global trends However the international legitimacy of communism declined rapidly in the post war era Soviet power exposed its inability to exercise hegemony as distinct from domination The consequences of Sovietization in Europe and the break between the Soviet Union and China were the primary reasons for the decline of communist influence and appeal Since communism lost its political credibility and cultural cohesion its global project had failed The ground was prepared for the devastating impact of Western globalization on communist regimes in Europe and the Soviet Union

**Revolution and World Order** David Armstrong, 1993-06-10 What impact do revolutionary states have on the international community This important study focuses on this question showing major problems these states pose for the achievement of world order It also examines whether the revolutionary state adapts to international standards of acceptable patterns of behavior or the international society is forced to change as a result of the emergence of these revolutionary states The work also looks at the American French and Russian Revolutions as well as several post 1945 revolutionary states to find the relationship between the revolutionary states and the principal ordering devices of international society

**Reconstructing Lenin** Tamás Krausz, 2015-02-27 Vladimir Ilyich Lenin is among the most enigmatic and influential figures of the twentieth century While his life and work are crucial to any understanding of modern history and the socialist movement generations of writers on the left and the right have seen fit to embalm him endlessly with superficial analysis or dreary dogma Now after the fall of the Soviet Union and actually existing socialism it is possible to consider Lenin afresh with sober senses trained on his historical context and how it shaped his theoretical and political contributions Reconstructing Lenin four decades in the making and now available in English for the first time is an attempt to do just that Tam s Krausz an esteemed Hungarian scholar writing in the tradition of Gy rgy Luk cs Ferenc Tokei and Istv n M sz ros makes a major contribution to a growing field of contemporary Lenin studies This rich and penetrating account reveals Lenin busy at the work of revolution his thought shaped by immediate political events but never straying far from a coherent theoretical perspective Krausz balances detailed descriptions of Lenin s time and place with lucid explications of his intellectual development covering a range of topics like war and revolution dictatorship and democracy socialism and utopianism Reconstructing Lenin will change the way you look at a man and a movement it will also introduce the English speaking world to a profound radical scholar

interwar Germany and Hungary      **Revolution's Other World** Ken Post, 2016-07-27 Ken Post examines the turn to the East by the international communist movement in fostering world revolution after the success in Russia in 1917 which led to communism's greatest gains after the Second World War Based on a theorisation of the building of revolutionary movements this study critically assesses communist strategy and tactics using three key cases China India and Brazil drawing out implications for possible future developments in less developed countries      Lenin Lives? Christopher Read, 2023-12-12 Lenin lived a controversial life and has had a deeply controversial reputation in the centenary since his death 21 January 1924 His rise from a conventional educated provincial and middle class background to become not only the leader even dictator over the largest country on earth is dramatic and vital in itself But it is only part of the story Even after his death he was unchallenged as the chief inspirer of a disparate world revolutionary movement which rocked the dominant capitalist world for most of the twentieth century His admirers and disciples included major intellectual and cultural figures such as Brecht Picasso Sartre Franz Fanon and Pablo Neruda disparate radical activists and revolutionaries such as Ho Chi Minh Joseph Stalin Mao Ze dong Fidel Castro Che Guevara Josip Broz Tito terrorist groups such as the Red Brigades and Baader Meinhof and many liberation movements Despite this his work and influence have often been written off as no longer relevant and many today consider this to be so Lenin has they claim had his day even though he is still revered in China the world's most populous country However Lenin like his mentor Marx has had a tendency to rise from apparent decline and oblivion to renewed force and influence This study examines the key elements of Lenin's life and career the consolidation of his ideas into the doctrines of Leninism the influence of Leninism in promoting revolutionary movements around the globe and the currently disputed issue of whether his ideas still have any relevance today In particular while considering his views on the role of the revolutionary party often seen as the centrepiece of his theory and practice this account identifies the root of Lenin's global influence in his opposition to capitalist imperialism and as a bedrock foundation for the opposition of many to fascism and associated ideologies While recognizing that Lenin's reputation has reached its lowest point not least in his home country where his legacy is reviled by Vladimir Putin and other contemporary leaders the book concludes by weighing up the contemporary arguments of those who believe that Lenin still lives      Travellers of the World Revolution Brigitte Studer, 2023-06-20 Hope Struggle and Defeat The Communist International and the Global Fight for Freedom The Communist International was the first organised attempt to bring about worldwide revolution and left a lasting mark on 20th century history The book offers a new and fascinating account of this transnational organisation founded in 1919 by Lenin and Trotsky and dissolved by Stalin in 1943 telling the story through the eyes of the activists who became its professional revolutionaries Studer follows such figures as Willi Münzenberg Mikhail Borodin M N Roy and Evelyn Trent Tina Modotti Agnes Smedley and many others less well known as they are despatched to the successive political hotspots of the 1920s and 30s from revolutionary Berlin to Baku from Shanghai to Spain from Nazi Germany to Stalin's Moscow It traces their journeys

from revolutionary hope to accommodation defeat or death looking at questions of motivation and commitment agency and negotiation of life and love conflict and frustration In doing so it reveals a forgotten Comintern the expression of a multi dimensional revolutionary moment which attracted not only working class but feminist anti racist anti colonial and anti imperialist activists highlighting the role of women in the Comintern and the centrality of anti colonialism to the Communist project The book concludes with a reflection on the ultimate demise of a historically unique undertaking
