Using Research in Primary Care Alan Gillies, 2002 If you think that research is necessarily esoteric difficult and remote from primary care then try this book as an antidote It is designed as a workbook and covers 20 topics at the heart of the research agenda in today's NHS Each topic has its own chapter and is supported by online resources on the website Icons throughout the book guide you towards these relevant online resources which include documents useful links and downloadable templates At the end of each chapter there are questions to think about practical activities and key points to consolidate the information covered The book describes detailed and comprehensive methods for quantitative and qualitative research and data analysis and is useful and practical reading for all members of the primary care team including general practitioners and clinical governance staff

Textbook of Medical Administration and Leadership Erwin Loh, Paul W. Long, Peter Spurgeon, 2018-12-19 This textbook covers all general areas of knowledge required for a trainee generalist medical administrator and doctor undergoing training to be a medical administrator specialist Chapters cover all the key topics on medical administration and leadership Some of the key topics included are health systems and policy health law private health and insurance health disaster planning population and public health health information and technology and health economics and financial management Medical practitioners of today are part of huge changes in medical practice as continuing developments are happening in biomedical sciences and clinical practice with new health priorities rising expectations among patients and the public and changing societal attitudes Consequently basic

knowledge and skills while fundamentally important are not enough today on their own and doctors thus need to demonstrate leadership combined with sound management skills to drive the necessary changes required to meet the challenges ahead. This book serves as an invaluable resource for a wide spectrum of physicians including specialists, clinicians, managers and other health professionals as well as non-clinical managers working in health. This is a gateway text for trainees in medical administration, specialist medical administrators, aspiring medical managers, health service managers and heads of service and departments in various medical specialties.

Oxford Handbook of Mental Health Nursing Patrick Callaghan, Catherine Gamble, 2015-10-01 Fully revised for its second edition the Oxford Handbook of Mental Health Nursing is the indispensable resource for all those caring for patients with mental health problems. Practical, concise and up to date with the latest guidelines, practice and initiatives, this handbook is designed to allow essential information to be quickly accessible to nurses in a busy clinical setting. This Handbook contains expert guidance on all aspects of the nurse's role. Written by experienced nurses and teachers, it will help you achieve the best possible results for your patients. Summaries of key sections of the Mental Health Act are provided as well as the Mental Capacity Act, Mental Health Legislation in Scotland and other UK countries. New material for the second edition includes expanded and revised information on leadership, medications, physical interventions, basic life support, religion, spirituality and faith, and working with older adults as well as a brand new chapter on contemporary issues in mental health nursing.

Evidence-based Child Health Care Edward Alan Gasper, Lorraine Ireland, 2017-03-14 An evidence-based approach to health care is growing in importance but it is difficult for students and professionals to keep up to date with a vast and changing knowledge base. Even more challenging is the need to apply the evidence to everyday nursing practice. This book helps the reader to do just that. Bringing together a range of contributors, it explores some of the latest research in children's nursing. A particular feature is the application of the findings presented to nursing practice.

Accountability in Nursing and Midwifery Stephen Tilley, Roger Watson, 2008-04-15 Accountability is a key concern for nurses and midwives in the NHS today. Professional accountability, being responsible for your actions and for the outcomes of these actions, is part of the framework of clinical governance which aims to provide good quality, cost-effective, evidence-based care. The second edition of *Accountability in Nursing and Midwifery* addresses current issues and key concerns in accountability, focusing on accountability in the four main branches of nursing: adult, child, learning disabilities and mental health, as well as in midwifery, community nursing and nursing management. In an increasingly litigious society, the ethical and legal implications of accountability are growing and it is important that nurses understand the implications for everyday practice.

Going Paperless Nicola Shaw, 2001 Annotation: A practical guide to successfully achieving a fully computerised system in primary care.

Pharmacy Practice Kevin M. G. Taylor, Geoffrey Harding, 2001-07-26 Today's pharmaceutical services are patient-oriented rather than drug-oriented. This shift towards patient-centred care comes at a time when healthcare is delivered by an integrated team of health workers.

Effective pharmacy practice requires an understanding of the social context within which pharmacy is practised recognising the particular needs *Understanding Care Homes* Katherine Froggatt, Sue Davies, Julianne Meyer, 2009 This book draws together a range of research and development initiatives that emphasise the importance of partnership working and of enabling older people and their families to maintain the highest quality of life The book investigates how research and development can be undertaken to provide better care for the resident and their family
