**Learning from Design** Madelon Evers,2004      **The Organizational Learning Cycle** Nancy M. Dixon,2017-07-05 The Organizational Learning Cycle was the first book to provide the theory that underpins organizational learning Its sophisticated approach enabled readers to not only understand how but more importantly why organizations are able to learn This new edition takes the original concepts and theories and shows how they might and are being put into action With five

new or completely revised chapters Nancy Dixon describes the kind of infrastructure organizations need to put in place there are examples of knowledge databases whole systems in the room processes and after action reviews originating from organizations that are making real progress with these ideas A clearer relationship between organizational learning and more participative forms of organizational governance is drawn along with responsibilities that employees need to take on to enable and partake in collective learning With new case material from BP the US Army Ernst and Young and the Bank of Montreal for example this book shows how you can make use of the collective reasoning intelligence and knowledge of the organization and channel it into its ongoing and future development *Public Inquiries, Policy Learning, and the Threat of Future Crises* Alastair Stark, 2018 In the aftermath of major crises governments turn to public inquiries to learn lessons Inquiries often challenge established authority frame heroes and villains in the public spotlight and deliver courtroom like drama to hungry journalists As such they can become high profile political stories in their own right Inquiries also have a policy learning mandate with big implications because they are ultimately responsible for identifying policy lessons which if implemented should keep us safe from the next big event However despite their high profile nature and their position as the pre eminent means of learning about crises we still know very little about what inquiries produce in terms of learning and what factors influence their effectiveness in this regard In light of this the question that animates this book is as important as it is simple Can post crisis inquiries deliver effective lesson learning which will reduce our vulnerability to future threats Conventional wisdom suggests that the answer to this question should be an emphatic no Outside of the academy for example inquiries are regularly vilified as costly wastes of time that illuminate very little while inside social scientists echo similar concerns regularly describing inquiries as unhelpful These commentaries however lack robust generalizable evidence to support their claims This volume provides evidence from the first international comparison of post crisis inquiries in Australia Canada New Zealand and the United Kingdom which shows that contrary to conventional wisdom the post crisis inquiry is an effective means of policy learning after crises and that they consistently encourage policy reforms that enhance our resilience to future threats *Accelerating Transformation* Behnam Tabrizi, 2005 This book describes a detailed process methodology for speeding innovation and thereby leading to a firm s transformation Anyone who is interested in managing under uncertainty and implementing fast and effective processes would be interested in reading this book The results presented in this book are based on several years of research examining 72 projects from 36 leading companies in United States Asia and Europe The methods described are adopted by many firms in the industry **Non-Cognitive Factors and Learning within a Business Simulation** Tanja Kreitenweis, 2021-10-22 Serious games can provide a convenient and straightforward access to complex knowledge for all age groups However learning achievements depend largely on learners non cognitive factor disposition With the aim of combining the fields of serious games and non cognitive factors this research focuses on the use of a business simulation which conveys change management insights Business simulations are a subset of
