Exotic Attractors From Liapunov Stability To Riddled Basins:

Exotic Attractors Jorge Buescu, 2012-12-06 This book grew out of the work developed at the University of Warwick under the supervision of Ian Stewart which formed the core of my Ph D Thesis Most of the results described were obtained in joint work with Ian as usual under these circumstances many have been published in research journals over the last two years Part of Chapter 3 was also joint work with Peter Ashwin I would like to stress that these were true collaborations We worked together at all stages it is meaningless to try to identify which idea originated from whom While preparing this book however I felt that a mere description of the results would not be fitting First of all a book is aimed at a wider audience than papers in research journals More importantly the work should assume as little as possible and it should be brought to a form which is pleasurable not painful to read
