Experiences In Thought Expression:

Thought, Reference, and Experience José Luis Bermúdez, 2005-07-14 Gareth Evans was arguably the finest philosopher of his generation In this volume an international team of contributors offer illuminating perspectives on Evans's groundbreaking work paying tribute to his achievements and leading his ideas in new directions Liminality and Experience Paul Stenner, 2018-02-14 This book breathes new life into the study of liminal experiences of transition and transformation or becoming It brings fresh insight into affect and emotion dream and imagination and fabulation and symbolism by tracing their relation to experiences of liminality The author proposes a distinctive theory of the relationship between psychology and the social sciences with much to share with the arts Its premise is that psychosocial existence is not made of stuff like building blocks but of happenings and events in which the many elements that compose our lives are temporarily drawn together The social is not a thing but a flow of processes and our personal subjectivity is part of that flow selves being tightly interwoven with others But there are breaks and ruptures in the flow and during these liminal occasions our experience unravels and is rewoven This book puts such moments at the core of the psychosocial research agenda Of transdisciplinary scope it will appeal beyond psychosocial studies and social psychology to all scholars interested in the interface between experience and social disorder **Thought as Experience in Bataille, Cioran, and Rosset** Joseph Acquisto, 2024-06-13 Examines how postwar French writers constitute the thinking subject and reshape its relation to the external social world Joseph Acquisto analyzes the writings of three thinkers during and shortly after the Second World War who address the question of what it means to think and what it means to constitute oneself as a thinking subject at a time that seems to come after everything with the ruins of attacked cities echoing the remains of a philosophical tradition that was confident in its establishment of human beings as rational of reason leading to progress and of both the self and the world as knowable What Georges Bataille calls inner experience and Emil Cioran labels thinking against oneself is something akin to a drama not a mere representation of the self in relation to the world but a process of remapping the relation of subject to object of thought dialectically Acquisto argues that both writers adopt an anti systematic approach to thinking that implicates fragmentary writing as a way of turning answers about subject object relations into questions Acquisto contends that this stands in contrast to the approach of Clement Rosset whose affirmation of the inaccessibility of the real leads to an anti intellectual grace filled affirmation of life as it is given under the guise of what he calls the tragic Bringing together thinkers that have seldom been discussed in a comparative light **Thought as Experience in Bataille Cioran and Rosset** examines the affective dimensions of thought as experience and considers the political stakes of postwar thought as out of order with the world from which it springs *Volume 1* Richard Heinrich, Elisabeth Nemeth, Wolfram Pichler, David Wagner, 2013-05-02 What is an image How can we describe the experience of looking at images and how do they become meaningful to us In what sense are images like or unlike propositions Participants of the 33rd International Wittgenstein Symposium

The Meaning of Gay Todd J. Ormsbee, 2012-07-10 Homosexual men in San Francisco had started the 1960s interacting mostly in private informal groups meeting in bars and house parties But by 1972 the city had a gay community and gay pride all celebrated with a parade Through numerous organizations and publications gay men created a counter publicity to fight against their domination and subordination and had begun to try to build a community that would foster deeper more meaningful relationships with each other The emergent counter publicity and community in turn created the social spaces necessary for gay men to create an expanding range of possible meanings for their gayness meanings that aligned more closely with their experiences and which better helped them meet their needs and desires The gayness they created could expand and contract depending on the needs and circumstances of the individual or group Rather than the typical story of the evolution from conservative to radical social movement *The Meaning of Gay* sees the development of gay politics as the shift from the need to establish a public facing gayness in the early 1960s to the community building efforts that began in the mid 1960s through the efforts to create a gayness based in authenticity brotherhood and revolution in the early 1970s Each of these developments flowed from gay men's responses to the swiftly changing San Francisco and American environment The dramatic explosion of possibilities for gayness that emerged during the 1960s may serve as a touchstone for those concerned with the problems of gay male life in the twenty first century This book traces these developments as they were recorded in the gay periodicals of the era and analyzes them from the perspective of John Dewey's theory of mind desire public valuation and democratic community

Merleau-Ponty and Theology Christopher Ben Simpson, 2013-12-19 The philosophical contributions of French phenomenologist Maurice Merleau Ponty carry great untapped potential for theologians thinking through some of the central affirmations of the Christian faith This exploration is structured against the background of the fundamental interrelation between three bodies in Merleau Ponty s thought and in Christian theology the material as such or nature the corporeal the human body as a living body the corporal and the social body the corporate including language and tradition Merleau Ponty s philosophy offers a finessed and non reductionistic understanding of the relations between these orders of bodies

Appropriating Merleau Ponty s thought helps one think through Christian doctrines of creation theological anthropology Christology ecclesiology and eschatology *The Meaning of the Body* Mark Johnson, 2012-06-29 In *The Meaning of the Body* Mark Johnson continues his pioneering work on the exciting connections between cognitive science language and meaning first begun in the classic *Metaphors We Live By* Johnson uses recent research into infant psychology to show how the body generates meaning even before self consciousness has fully developed From there he turns to cognitive neuroscience to further explore the bodily origins of meaning thought and language and examines the many dimensions of meaning including images qualities emotions and metaphors that are all rooted in the body s physical encounters with the world Drawing on the psychology of art and pragmatist philosophy Johnson argues that all of these aspects of meaning making are fundamentally aesthetic He concludes that the arts are the culmination of human attempts to find meaning and that studying the aesthetic dimensions of our experience is crucial to unlocking meaning s bodily sources Throughout Johnson puts forth a bold new conception of the mind rooted in the understanding that philosophy will matter to nonphilosophers only if it is built on a visceral connection to the world Mark Johnson demonstrates that the aesthetic and emotional aspects of meaning are fundamental central to conceptual meaning and reason and that the arts show meaning making in its fullest realization If you were raised with the idea that art and emotion were external to ideas and reason you must read this book It grounds philosophy in our most visceral experience George Lakoff author of *Moral Politics* *A Theory of the Microdynamics of Occurrent Thought* Herbert S. Demmin, 2015-08-13 *A Theory of the Microdynamics of Occurrent Thought* T2 is based on a reflective analysis of occurrent thoughts OTs in the spirit of phenomenological philosophy and proposes that such thoughts consist of a specific combination of ten or fewer micro phases possessing phenomenal contents that are so brief that most of us are unaware of their existence The theory specifies the movements of an operating I or central executive in as and among these phases in the service of processing their contents by fleetingly becoming them followed by one of several transitions of attention that bring about different degrees of their objectification The relatively fixed sequences of the phases of OTs along with an operating I s immersion in and face up or face down surfacing from their phenomenal contents form a structure that carries and drives on line cognition supporting the view that they play a causal role in human information processing Two

categories two forms and fifteen different types of OTs are defined based on the transitions of an operating I therein This book includes detailed illustrations of the different types of OTs **The Subject of Experience** Galen Strawson, 2017 This book considers the conscious subject the subject of experience in particular the human subject the self the person Galen Strawson examines the phenomenology of the self he asks what is it like to have or be a self or to feel that one is or has a self and the metaphysics of the self Is there really such a thing as the self If so what is its nature He develops a novel approach to the metaphysical questions out of the results of the phenomenological investigation and argues against those who say that the self is just the human being that we can legitimately distinguish self and human being At the same time he raises doubts about how long selves can be supposed to last insofar as they are distinct from human beings Moving on to the ethics and moral psychology of the self Strawson asks whether we can really be said to lose anything in dying He criticizes the popular notion of the narrative self and emphasizes the differences between Endurers or Diachronics people who feel that they are the same person when they consider their past and future and Transients or Episodics people who do not feel this Strawson also considers the logic of the word I the first person pronoun and the reflexive structure of conscious awareness before examining Locke's Hume's and Kant's accounts of the mind and personal identity and arguing that Locke and Hume have been badly misunderstood The fourteen essays draw on literature and psychology as well as philosophy Book jacket
