Interact Aztecs Interact:

Iconicity of the Uto-Aztecan Tirtha Prasad Mukhopadhyay, Alan Philip Garfinkel, 2023-05-12 Uto Aztecan iconic practices are primarily conditioned by the consciousness of the snake as a death dealing power and as such an animal that displays the deepest fears and anxieties of the individual. The attempt to study a snake simulacrum thus constitutes the basic objective of this volume. A long all embracing iconicity of snakes and related snake motifs are evident in different cultural expressions ranging from rock art templates to other cultural artifacts like basketry pottery temple architecture and sculptural motifs. Uto Aztecan iconography demonstrates a symbolic memorial order of emotional valences as well as the negotiations with death and a belief in rebirth just as the skin shedding snake reptile manifests in its life cycle.

Technologies for E-Services Fabio Casati, Dimitrios Georgakopoulos, Ming-Chien Shang, 2003-06-30 Welcome to Free Convection Film Flows and Heat Transfer. Free convection flows occur in many industrial processes. However, engineers still have to deal with many unresolved problems. This book systematically summarizes my recent research results that have been referred to and cited by many other researchers in this field. The purpose of this book is to provide a practical guide to university students, graduate students, design engineers, researchers, and scientists who wish to further understand the characteristics of free convection flows and heat transfer. I hope this book will serve as a useful tool for them as well as a guide to future research. This book includes three related parts: 1) accelerating convective boundary layers of Newtonian fluids; 2) accelerating film boiling and condensation of Newtonian fluids; and 3) accelerating film flows of non-Newtonian power law fluids. These phenomena are all caused by buoyancy or gravity and can be summed up in terms of the free convection film flows. In addition, the free convection film flows of Newtonian fluids can be taken as a special case of non-Newtonian power law fluids.
