Intergenerational Communication Across The Lifespan:

Intergenerational Communication Across the Life Span Angie Williams, Jon F. Nussbaum, 2013-02-01 Individuals of all ages interact with one another and their interactions have significance throughout their lives This distinctive volume acknowledges the importance of these interactions and provides a life span developmental view of communication and aging attempting to capture the many similarities and changes that occur in people s lives as they age The authors move the study of intergenerational contact closer to the actual participants examining what happens within intergenerational interactions and how people evaluate their intergenerational experiences The volume concentrates on the micro context of the intergenerational interaction and the cognitions language and relationship behaviors related to intergenerational communication across the life span The volume employs the perspective that the understanding of human behavior across the life span is enhanced by studying communicative behavior in intergenerational interaction The authors integrate research from multiple disciplines concerned with intergenerational communication which is framed by several unique theoretical perspectives drawn from the communication discipline As a resource for the study of intergenerational communication across the life span this monograph offers important insights to scholars students and all who are involved in intergenerational communication

Language and Aging in Multilingual Contexts Kees De Bot, Sinfree Makoni, 2005-01-01 In this book different aspects of language and aging are discussed While language spoken by and language spoken with elderly people have been treated as different areas of research it is argued here that from a dynamical system perspective the two are closely interrelated In addition to overviews of research on language and aging a number of projects on this topic in multilingual settings are presented

Handbook of Communication and Aging Research Jon

F. Nussbaum, Justine Coupland, 2004-04-12 This second edition of the Handbook of Communication and Aging Research captures the ever changing and expanding domain of aging research Since it was first recognized that there is more to social aging than demography gerontology has needed a communication perspective Like the first edition this handbook sets out to demonstrate that aging is not only an individual process but an interactive one The study of communication can lead to an understanding of what it means to grow old We may age physiologically and chronologically but our social aging how we behave as social actors toward others and even how we align ourselves with or come to understand the signs of difference or change as we age are phenomena achieved primarily through communication experiences Synthesizing the vast amount of research that has been published on communication and aging in numerous international outlets over the last three decades the book s contributors include scholars from North America and the United Kingdom who are active researchers in the perspectives covered in their particular chapter Many of the chapters work to deny earlier images of aging as involving normative decrement to provide a picture of aging as a process of development involving positive choices and providing new opportunities A recurring theme in many chapters is that of the heterogeneity of the group of people who are variously

categorized as older aged elderly or over 65 The contributors review the literature analytically in a way that reveals not only current theoretical and methodological approaches to communication and aging research but also sets the future agenda This handbook will be of great interest to scholars and researchers in gerontology developmental psychology and communication and in this updated edition will continue to play a key role in the study of communication and aging
