## **Intergovernmental Fiscal Relations:**

Intergovernmental Fiscal Relations Mr.Vivek B. Arora,Mr.John Norregaard,1997-10-01 This paper provides an overview of recent Chinese reforms to introduce a modern system of fiscal federalism that balances the need for central macroeconomic control with the economic advantages of decentralized government Following a discussion of the rationale for decentralization the paper describes the main structural and economic developments in China in this area including their impact on economic stabilization The key measures in the 1994 fiscal reforms as well as reform initiatives needed in the future are also discussed

Intergovernmental Fiscal Relations Ronald C. Fisher,2012-12-06 The main objective of this book is to restate the important theories and evidence from economic analysis concerning intergovernmental fiscal issues More importantly the second objective of the book is to identify gaps in knowledge empirical uncertainties and missing theoretical structures and then to establish a preliminary agenda for new research on this topic The book is organized in two sections The first covers the core body of intergovernmental fiscal relations including optimal size for jurisdictions and assignment of public sector functions the formulation and execution of tax policy in an intergovernmental setting and the appropriate structure and use of intergovernmental transfers In the second section the core knowledge is applied to four major policy areas education welfare fiscal interaction in urban areas and economic development In thinking about a new research agenda the authors call for more current and authoritative estimates of fiscal incidence including interjurisdictional spillovers for more fundamental research about the federation process and effects of consolidation for new evidence about the long run general equilibrium effects of interjurisdictional competition and for basic research about the choice process and establishment of intergovernmental fiscal institutions and policies by federal and subnational governments

**Intergovernmental Fiscal Relations in the New EU Member States** William Dillinger,William R. Dillinger,2007-01-01 This paper evaluates reforms in the structure of intergovernmental relations in Eastern Europe since the breakup of the Soviet Union focusing on eight recent EU accession countries the Czech Republic Estonia Hungary Latvia Lithuania Poland Slovakia and Slovenia It reviews each country s response to the economic and political upheavals of the immediate post Soviet era and their gradual convergence on a common eastern European model of intergovernmental relations

*Intergovernmental Fiscal Relations* Linda Gonçalves Veiga,Mathew Kurian,Reza Ardakanian,2014-08-14 This book examines and analyzes issues related to public finance in subnational governments along with a discussion of case studies on decentralization Most of the analysis applies to all public goods and services provided by subnational governments with some placed on the role of subnational governments in the management of environmental resources notably water and waste Coverage includes optimal arrangements for sharing fiscal responsibilities among different levels of government the potential impact of decentralization on the quality of public goods delivery local governments expenditure and revenue choices and the effect of decentralization on accountability governance and policy outcomes The scope of discussion extends

to both public finance theory and applied policy debates The first chapter on trends in financing of public services opens with an explanation of the how and why of government intervention in the economy the nature and purposes of transfers between and among governments and trends in decentralization Case studies examine the impact of decentralization in such areas as service delivery water and sanitation education and health and on poverty and income inequality Chapter 2 examines public budgets governance structures norms and organizational practices building up understanding of budgets budget cycles fiscal revenues from fees and taxes expenses debt and political economy issues rules mandating balanced budgets in government and more Chapter 3 discusses issues of accountability and policy outcomes offering important lessons from recent international experience including ways to strengthen political administrative and financial accountability The concluding chapter recounts lessons from recent international experience and surveys implications for the nexus approach to management of environmental resources The information analysis and expert advice presented here is particularly relevant for developing and emerging countries where well designed decentralization reforms have a higher potential to improve efficiency in the provision of public services and to enhance the development of integrated and sustainable strategies for the use of water soil and waste resources and applications that advance the nexus approach *Intergovernmental Fiscal Relations ...* United States. Break,1970 **Czech Republic** João do Carmo Oliveira,Jorge Martinez-Vazquez,2001-01-01 This report contains the most significant elements of intergovernmental fiscal relations in the Czech Republic including administrative structure expenditure and revenue assignments fiscal imbalances and transfers access to borrowing and indebtedness and budgeting Although each of these elements is discussed in its own chapter it is important to remember that they are interrelated and that reform design needs to be conducted in a coordinated manner The Reform of Intergovernmental Fiscal Relations in Developing and Emerging Market Economies Anwar Shah,1994 An important dimension of public sector reform in developing and emerging market economies has been the loosening of central control over the private sector and lower level governments The author s overview of the principles and best practices of fiscal federalism should help guide policy debates on restructuring

intergovernmental fiscal arrangements Strong emphasis on central planning impedes innovative responses to local issues by local governments and stymies private sector development Decentralization should be the rule the author argues unless a strong case can be made for centralizing specific responsibilities Local public services can be provided more efficiently if expenditures more closely match local needs and preferences More closely linking benefits to costs also promotes accountability Increased fiscal autonomy can also help mobilize more revenue from local sources improving a country's fiscal position And decentralized decision making encourages local participation in development Constitutional responsibilities should be stated clearly and precisely Tax and spending assignments should be determined simultaneously so revenue means are matched as closely as possible to spending needs at each level of government In most developing countries subnational governments have limited access to their own tax bases and depend on higher level transfers A grant's design should reflect the situation and objectives The author gives examples Although most countries give a high priority to limiting interregional fiscal disparities no developing or transitional economy has adopted an explicit standard for equalization Revenue sharing should be supplemented by an equalization program with a specified standard rather than by combining several factors into one formula Local borrowing to meet capital expenditures is a major issue in most developing countries In such cases autonomous bodies can supervise and assist local borrowing for capital projects The decentralization of responsibilities and the rationalization of intergovernmental transfers should be supported by strengthening local institutional capabilities Monitoring auditing and inspections functions in most developing nations especially need to be strengthened Transitional economies also need to give high priority to establishing or improving framework laws on property rights corporate legal ownership and control and bankruptcy and financial accounting and control
