An Introductory Guide to Post-structuralism and Postmodernism Madan Sarup, 1988 This book provides an historical and a conceptual background to post structuralism and in part to post modernism for readers entering the discussions on post structuralism It does not attempt to be at the cutting edge of these debates nor to be advancing research in these areas It does however look at the educational implications of the ideas discussed The intention behind this collection was to provide a sound introduction to the key positions of a number of French poststructuralist thinkers who are being increasingly referred to used as support and even embraced by theorists in educational discourse The editor and contributors to this volume are concerned that these thinkers have been misappropriated on occasions That is why this volume concentrates on the historical and intellectual background of these philosophers Each of the authors of the chapters in this collection deals with their philosopher in the areas of brief biographical details key philosophical ideas and the applications in or implications of their work for education

**Succeeding Postmodernism** Mary K. Holland,2013-04-25 While critics collect around the question of what comes after postmodernism this book asks something different about recent American fiction what if we are seeing not the end of postmodernism but its belated success Succeeding Postmodernism examines how novels by DeLillo Wallace Danielewski Foer and others conceptualize threats to individuals and communities posed by a poststructural culture of mediation and simulation and possible ways of resisting the disaffected solipsism bred by that culture Ultimately it finds that twenty first century American fiction sets aside the postmodern problem of how language does or does not mean in order to raise the reassuringly retro question of what it can and does mean it finds that novels today offer language as solution to the problem of language Thus it suggests a new way of reading antihumanist late postmodern fiction and a framework for understanding postmodern and twenty first century fiction as participating in a long and newly enlivened tradition of humanism and realism in literature

**Secularism and the Pursuit of Transcendence, Volume II** Stanley E. Porter, Wendy J. Porter, 2025-02-19 We live in a secular age or so we have been told Nevertheless the Christian church strongly believes that we still experience and in fact are surrounded by acts of transcendence encounters with God that often defy imagination and explanation And yet we do try to explain such phenomena whether theologically experientially biblically historically philosophically literarily or even or especially artistically These two volumes are more than just papers from a major conference on secularism and the pursuit of transcendence held at McMaster Divinity College in Hamilton Ontario They contain genuine attempts by people deeply engaged with their secular surroundings to explain what we mean by transcendence Transcendence has been a longstanding topic among the best thinkers of this and previous ages and the same is true for these volumes which include contributions by Charles Taylor Robert Wuthnow Merold Westphal and Christina Gschwandtner but also by a wide range of others who address the question from divergent vantage points The responses vary as much as the orientations of those involved in the pursuit of defining not only what it means to live in our secular age but to be involved in the pursuit of transcendence or even to perceive the Transcendent's pursuit of us

*From Revolution to Deconstruction* Pam Papadelos, 2010 Feminist theory is no longer guiding the development of policy interventions in Australia because it is seen to be irrelevant to modern women Many leading feminists are locked into a politics that is based on liberal or socialist principles and do not want or know how to move away from these even when this type of politics is failing to change many women's circumstances This book confronts feminism and challenges its relationship to philosophy which the author argues impacts on the reception of poststructural theories like deconstruction It provides a narrative of why the potential for deconstruction has been denied as well as where it has been taken on It gives an account of deconstruction that tackles some of its more difficult aspects namely its political applications The book also outlines the history of Women's Studies as a discipline that is its institutionalization and identifies its theoretical concerns as a social movement with a political agenda The book maps deconstruction's impact on feminism in Australia and more specifically its introduction to Women's Studies programs
