The Intuitive Edge Philip Goldberg,1983 Understanding the World Through Narrative Steve Bowkett,Tony Hitchman,2023-10-02 While many educational books focus on creative and critical thinking skills this ground breaking work is the first to deal specifically with the ability to understand question and evaluate information presented broadly speaking in story form Story or narrative is central to our understanding of and interaction with the world around us We only have to think of the mini stories encapsulated in many advertisements the way that topics in science the story of human evolution for example in history and other subjects present themselves the power of myths and legends to act as guides to moral behaviour and the pervasive way that gossip rumour and superstition can spread to recognise the benefits of heightening such awareness in young learners Understanding the World Through Narrative explores the narrative structure of fiction but uses this as a template to show how the story form appears in mythology and modern urban folklore science history the media including advertising in our internal dialogues stories we tell ourselves about ourselves and others and how narrative structure can be used in curriculum planning to enhance children s learning The book contains over 160 thinking discussing researching activities for use in the classroom and as project work Chapters can be used independently although they are arranged with increasing degrees of sophistication and challenge This fascinating work is an essential resource for any teacher of upper primary and lower secondary students covering not only children s evolving intellectual ability and promoting curiosity and critical engagement but also enhancing their mental and emotional wellbeing *Handbook of Intuition Research* Marta Sinclair,2011-01-01 This groundbreaking interdisciplinary Handbook showcases the latest intuition research integrated in a framework that reconciles various views on what intuition is and how it works The internationally renowned group of contributors presents their findings in five areas Part I explores different facets of the intuiting process and its outcome the role of consciousness and affect and alternative ways of capturing intuition Part II deals with its function in expertise strategy entrepreneurship and ethics Part III outlines intuitive decision making in critical occupations the legal profession medicine the film and wine industries and teaching Part IV pushes the boundaries of our current understanding by exploring the possibility of non local intuition based on the principles of quantum holography Part V investigates different ways of developing intuitive skills This cutting edge comprehensive Handbook will prove essential for academics and research students of the social sciences particularly management psychology sociology entrepreneurship leadership team dynamics HR and training It will also be an invaluable resource for industry professionals searching for soft core methods to increase productivity and creativity innovation to improve leadership and organizational climate or to adopt new staff training and development methods Brainstyle Marlane Miller,2012-09-25 In this insightful inspirational self help book readers will journey from the hard edged realities of genetics and personal limitations to a limitless spiritual path and personal mastery of one s brainstyle Each of us has a natural brainstyle wired into our genes Your brainstyle is your

Sven Arvidson,2016-02-04 Science could never have proceeded without the creativity of intuition yet intuition is poorly understood and poorly studied In Intuition The Inside Story scholars explore the nature of intuition and its practical place in the social and behavioral sciences and the arts These contributors present the latest theoretical developments and research and provide every day examples of intuition from the lab and field They discuss the nature and experience of intuition from the perspectives of anthropology philosophy physics engineering psychology medicine and midwifery Contributors include Marcie Boucouvalas Guy Burneko Brenda J Dunne Jeremy Hayward Charles Laughlin Evelyn Monsay Anne Pineault Luci Roncalli and Joe Sheridan The Thinker's Toolkit Morgan D. Jones,2009-09-23 An invaluable resource for any manager or professional this book offers a collection of proven practical methods for simplifying any problem and making faster better decisions every time Notes on the Heart Susan H. McLeod,1997 It has long been recognized that affect that is the noncognitive aspect of mental activity plays a large role in writing and in learning to write According to Susan H McLeod however the model that has been most used for empirical research on the writing process is based on cognitive psychology and does not take into account affective phenomena Nor does the social constructionist view of the writing process acknowledge the affective realm except in a very general way To understand the complete picture McLeod insists we need to explore how cognitive affective and social elements interact as people write In this book McLeod follows a group of students through a semester of writing assignments tracking the students progress and examining the affective elements relevant to their writing To facilitate future discussion of these phenomena McLeod also provides suggested definitions for terms in the affective domain In a very real sense this book is the result of a collaboration of three Susans Susan McLeod who researched and wrote the book Sue Hallett an instructor in Washington State University s composition program whose classes McLeod observed and who helped provide much of the data and Susan Parker a graduate student who observed Hallett s class and who ran a tutorial connected to that class To provide a narrative structure McLeod and her two collaborators have constructed a simulated semester conflating the year and a half of the study into one semester and creating a class that is a composite drawn from seven classrooms over three semesters Although philosophers have had much to say about the affective domain Notes on the Heart is based for the most part on research from the social sciences Discussions of pedagogy while meant to have practical value are suggestive rather than prescriptive The goal is to help teachers see their practice in

new way Teachers will be particularly interested in McLeod's discussion of teacher affect effect This section examines both the issue of the Pygmalion effect students becoming better because the teacher believes they are and perhaps the more common opposite the golem effect students becoming less capable because their teachers view them that way The Spirit of Leadership Harrison Owen, 1999 The business world is desperate for leaders Books and courses on leadership flood the market as companies search in vain for that one person who can make sense of their rapidly changing environment through assertiveness charisma and control According to noted consultant Harrison Owen our inability to locate such a person isn't the fault of our leaders it's the fault of our expectations In today's world where chaos is normal and paradoxes can't be resolved such old style leaders no longer offer the solution Today's world requires inspired leadership from all levels of the organization Inspired leadership literally means in spirited leadership and this book explores the intimate connection between spirit and leadership it implies It presents the radical notion that spirit is the most important ingredient of any organization and that leadership means opening space for that spirit to show up in powerful and productive ways The Spirit of Leadership lays out the New Rules of Leadership rules which surprisingly turn Old organizations have always played by For the keys to these new rules the book turns to those who have always successfully operated apart from the levers of formal power and authority women Offering lessons from effective female strategies it reveals the true functions of leadership to evoke grow sustain comfort and raise the spirit Not to be confused with morale building motivational techniques or even the current fad of spirituality in business The Spirit of Leadership digs deeper to show that at its essence leadership is our link to deep inner forces It provides practical steps readers can use to uncover their own capacity for leadership in whatever position they find themselves and to exercise that capacity both to enhance the performance of their organizations and to find their own fulfillment as complete human beings Five Ways of Doing Qualitative Analysis Kathy Charmaz, Linda M. McMullen, 2011-03-30 This unique text provides a broad introduction to qualitative analysis together with concrete demonstrations and comparisons of five major approaches Leading scholars apply their respective analytic lenses to a narrative account and interview featuring Teresa a young opera singer who experienced a career changing illness The resulting analyses vividly exemplify what each approach looks like in action The researchers then probe the similarities and differences among their approaches their distinctive purposes and strengths the role style and subjectivity of the individual researcher and the scientific and ethical complexities of conducting qualitative research Also included are the research participant's responses to each analysis of her experience A narrative account from another research participant Gail can be used by readers to practice the kinds of analysis explored in the book **The Power of Flow** Charlene Belitz, Meg Lundstrom, 2011-10-05 Imagine feeling as though the world is working with you not against you Imagine a day in which you make every green light and slip effortlessly into a parking spot in the most crowded part of town You make a To Do list and the people on it call you first You turn on the radio just in time to hear the exact information you need These meaningful

wisdom they offer This book provides an insight into the current state of research on rational analytical procedures in personnel selection and complements this with research on intuitions and emotions in personnel diagnostics By integrating scientifically verifiable rational analytical decision making procedures with the inner experiential knowledge of people this book bridges two complementary ways of recognizing and making good decisions It demonstrates how intuitions are developed and used in different fields of practice and cultures and how scientific research results from rational analytical and intuitive emotional selection procedures are successfully integrated by practitioners
