

Math Study Skills Inventory—Level 1

Dear Educator:

This package contains 25 Math Skills Inventories, Level 1, scoring materials, and a User's Guide that will enable your students to identify strengths and weaknesses in their study skills and habits. As you review these materials, please refer back with your students, teachers, and staff the Inventory to avoid all errors.

As presented, Inventory 1 is the mathematics focus, entitled your students to test and Inventory pages 2 and 3 is now with each page. Until it is another math before they begin to work, the sample form on page 4 of the Inventory.

A Scoring Sheet, a Student Copy of the Student Profile Sheet, and a Teacher's Copy of the Student Profile are included with each Inventory. You may choose to skip the Inventory and give student profiles promptly if all your students are able. You may have them use the profile system you have developed to graph their own profiles. If your students are very capable, you may limit them to the scoring of their own inventories and the graphing of their own profiles. If your students want another graph themselves with your supervision, it is recommended that you check their results.

After the Scoring Sheet and Student Profile are completed, give each student one copy of another Student Profile and keep the Teacher's Copy of the Student Profile as well as the Scoring Sheet. The Student Profile will give both you and your students a record of their strengths and weaknesses. The Scoring Sheet will give you individual records for students showing their performance on each item in the Inventory as well as their proficiency in all the seven areas.

The User's Guide presents answers to questions frequently asked about the Inventory, a description of these Student Profiles with recommendations based on their performance, and the Math Study Sheet. In addition, to the User's Guide you will find directions for completing the Class Analysis Chart and the Class Progress Chart sheet. The Class Analysis Chart provides a record of the total performance of your class on the seven areas of the Inventory. From it, you can determine class strengths and weaknesses and use them to plan your instruction in study skills.

We hope you and your students will find the Inventory a valuable tool in the improvement of study skills.
