Legitimacy Processes In Organizations:

Legitimacy Processes in Organizations Cathryn Johnson, 2004-04-27 The purpose of this volume is to produce a collection of articles by leading social psychologists and organizational scholars that focus on legitimacy processes in organizations Over the last two decades in social psychology within sociology scholars have developed legitimacy theories that strive to show how legitimacy processes merge into structures Also in organizational research issues of legitimacy processes are of central concern for example in neoinstitutional theory Therefore it is worthwhile to devote a volume that will address specifically how these legitimacy processes operate in organizations This collection of papers will accomplish two goals First the contributors will have an opportunity to discuss how legitimacy processes contribute to our understanding of how organizations are structured and how they work In addition by examining legitimacy processes the contributors will be able to explore the micro macro implications of these processes Second this volume should stimulate more discussion between social psychologists and organizational researchers on issues of legitimacy and future directions for understanding legitimacy processes

Time, Temporality, and History in Process Organization Studies Juliane Reinecke, Roy Suddaby, Ann Langley, Haridimos

Tsoukas,2020-12-24 Time timing and temporality are inherently important to organizational process studies yet time remains an under theorized construct that has struggled to move much beyond chronological conceptions of clock time Missing from this linear view are ongoing debates about objectivity versus subjectivity in the experience of time linear versus alternative structures of time or an appreciation of collective or culturally determined inferences of temporality This is critical as our understanding of time and temporality can shape how we view and relate to organizational phenomena either as unfolding processes or stable objects History is equally important While we have an intuitive sense of history as a process organizational theorists have struggled to move beyond two limited conceptualizations history as a constraint on organization s capacity for change or history as a unique source of competitive advantage Both approaches suffer from the restrictive view of history as an objective set of brute facts that are exterior to the individuals organizations and collectives that experience them Yet management theory is acquiring an awareness of time history and memory as critical elements in processes of organizing This volume draws together emerging strands of interest in adopting a more nuanced orientation toward time temporality and history to better understand the temporal aspects of organizational processes **Handbook of Social Psychology** Lisa Slattery Walker,Gretchen Peterson,2025-06-09 This thought provoking Handbook presents an overview of social psychology as a sub discipline of sociology and psychology Chapters analyse how social interactions and environments influence human behaviours and emotions providing critical insights into identity theory group processes social structures and the sociology of emotions *Race, Organizations, and the Organizing Process* Melissa E. How Do Organisations Gain Legitimacy? Legitimacy as Social Process Anna Steinbachova, 2021-01-07 Seminar paper from the year 2019 in the subject Sociology Basics and General grade 1.3 Free University of Berlin course Institutional Theory language English abstract In her paper the author comes from the idea that there is not one definition of legitimacy and try to summarize the arguments on what legitimacy is Boyd 2000 suggests that legitimacy is dependent on

social structure systems and norms and that legitimation is a social process however it is not clear how large a part of the social system must confer its approval for an organisation These statements she also analyses In her paper she argues that there is a plethora of theories analysing the gaining of legitimacy however the process of gaining legitimacy and its establishment depends on diverse factors To support the argument she has researched and compared various theories and thus discussed different aspects on how legitimacy is gained The paper is organised as follows firstly she will sum up the theories on what legitimacy means and how is it approached by different authors Secondly she discusses the questions of actors and who establishes legitimacy then I focus on the theories about what role do resources play in establishing legitimacy and lastly I analyse the approach of legitimacy as a constraint Another thesis underlying her paper is from Deephouse 1996 who argues that organizational legitimacy is defined as a status conferred by social actors He states that legitimacy depends on the perspective of a particular social actor whose values and expectations for action should be congruent with the aspiring legitimate organisation Moreover the social actors approve legitimacy for an organisation where only certain actors have the authority to confer legitimacy however they need to be identified first In her seminar paper she also discusses Hybels 1995 who theorizes that legitimation comes from the actors through conferral of resources and communication of positive reputation however she points out the resource based view from Tilling 2010 where he suggests that legitimacy is an operational resource too During her research she discussed several authors who research the aspects of legitimacy important for her paper Suchman 1995 and Hamidu 2015 who analyse the concept of legitimacy Dowling and Pfeffer 1975 who address the importance of resources and the idea of legitimacy as a constraint Hybels 1995 whose work opposes the argument about resources of the two authors and other authors who contribute to her topic

Franchised States and the Bureaucracy of Peace Niels Nagelhus Schia, 2017-10-30 This book examines a new type of state formation evoked by the rise of transnational rule what Schia calls franchised states Drawing on anthropological studying through fieldwork within the UN organization he demonstrates how peacebuilding activities turned Liberia into an object of governing whereby the UN in seeking to build the state also became the state The sovereign state of Liberia here emerges as a franchise rather than a self contained entity Two implications follow First that international peacebuilding turns post conflict countries into clients of the international community Second that sovereignty is no longer exclusively associated with the state it is organized in and through specific practices of governing where a state actor is only one among a range of actors With these findings the book moves beyond previous work on peacebuilding by focusing on the unbundling of sovereignty It contributes to the literature on the changing forms of sovereignty by showing the specific ways in which sovereignty is organized packaged and enacted often by actors working under international auspices This book will be of interest to practitioners and students interested in international organizations international relations the study of international practices UN and peacebuilding
