Great Apes Explorers:

The Great Apes Chris Herzfeld, 2017-11-14 A unique beautifully illustrated exploration of our fascination with our closest primate relatives and the development of primatology as a discipline This insightful work is a compact but wide ranging survey of humankind's relationship to the great apes chimpanzees bonobos gorillas orangutans from antiquity to the present Replete with fascinating historical details and anecdotes it traces twists and turns in our construction of primate knowledge over five hundred years Chris Herzfeld outlines the development of primatology and its key players and events including well known long term field studies notably the pioneering work by women such as Jane Goodall Dian Fossey and Birut Galdikas Herzfeld seeks to heighten our understanding of great apes and the many ways they are like us The reader will encounter apes living in human families painting apes apes who use American Sign Language and chimpanzees who travelled in space A philosopher and historian specializing in primatology Herzfeld offers thought provoking insights about our perceptions of apes as well as the boundary between human and ape and what it means to be either *The Great Apes* Robert Mearns Yerkes, Ada Watterson Yerkes, 1929 [Walking with the Great Apes](#) Sy Montgomery, 2009-08-25 **Top 50**

Reasons to Care About Great Apes David Barker, 2010-01-01 Discusses the great apes their life cycle habitats young and why these animals are endangered [Explorers](#) DK, 2010-09-20 From the first people to leave Africa to the first to leave the planet the urge to explore the unknown has driven human progress Explorers tells the story of humanity's explorations taking the reader into the lives of some of the most intrepid people ever known Throughout history exploration has arisen from a wide range of impulses from trade and the search for lands to colonize to scientific curiosity and missionary zeal This book tells the story of explorers of every type from those chasing glory to those seeking enlightenment In its pages readers will meet some of history's most famous trail blazers people whose courage opened frontiers turned voids into maps forged nations connected cultures and added to humankind's knowledge of the world by leaps and bounds Each life is captured in context by considering the knowledge of the world in which the explorers lived the factors that gave rise to their expeditions and the technology available to them at the time Their discoveries and the consequences are also considered in depth and highlighted with beautiful maps photographs and illustrations The tales of the explorers assistants and companions are woven into the overall story along with an examination of the qualities that made them drop everything in pursuit of discovery [Play and Exploration in Children and Animals](#) Thomas G. Power, 1999-11-01 Play is a paradox Why would the young of so many species the very animals at greatest risk for injury and predation devote so much time and energy to an activity that by definition has no immediate purpose This question has long puzzled students of animal behavior and has been the focus of considerable empirical investigation and debate In this first comprehensive and state of the art review of what we have learned from decades of research on exploration and play in children and animals Power examines the paradox from all angles Covering solitary activity as well as play with peers siblings and parents he considers the nature development and

functions of play as well as the gender differences in early play patterns A major purpose is to explore the relevance of the animal literature for understanding human behavior The nature and amount of children s play varies significantly across cultures so the author makes cross cultural comparisons wherever possible The scope is broad and the range multidisciplinary He draws on studies by developmental researchers in psychology and other fields ethologists anthropologists sociologists sociolinguists early childhood educators and pediatricians And he places research on play in the context of research on such related phenomena as prosocial behavior and aggression Finally Power points out directions for further inquiry and implications for those who work with young children and their parents Researchers and students will find *Play and Exploration in Children and Animals* an invaluable summary of controversies methods and findings practitioners and educators will find it an invaluable compendium of information relevant to their efforts to enrich play experiences

Great Ape Societies William C. McGrew, Linda F. Marchant, Toshisada Nishida, 1996-07-28 The great apes chimpanzees bonobos gorillas and orangutans are our closest living relatives sharing a common ancestor only five million years ago We also share key features such as high intelligence omnivorous diets prolonged child rearing and rich social lives The great apes show a surprising diversity of adaptations particularly in social life ranging from the solitary life of orangutans through patriarchy in gorillas to complex but different social organisations in bonobos and chimpanzees As great apes are so close to humans comparisons yield essential knowledge for modelling human evolutionary origins *Great Ape Societies* provides comprehensive up to date syntheses of work on all four species drawing on decades of international field work zoo and laboratory studies It will be essential reading for students and researchers in primatology anthropology psychology and human evolution

The Ancestor's Tale Richard Dawkins, 2004 A renowned biologist provides a sweeping chronicle of more than four billion years of life on Earth shedding new light on evolutionary theory and history sexual selection speciation extinction and genetics

Play and Exploration in Children and Animals Thomas G.
