AIDS Vaccine Handbook Patricia Kahn,2005 Scrambling for Africa Johanna Tayloe Crane,2013-09-06 Countries in sub Saharan Africa were once dismissed by Western experts as being too poor and chaotic to benefit from the antiretroviral drugs that transformed the AIDS epidemic in the United States and Europe Today however the region is courted by some of the most prestigious research universities in the world as they search for resource poor hospitals in which to base their international HIV research and global health programs In Scrambling for Africa Johanna Tayloe Crane reveals how in the space of merely a decade Africa went from being a continent largely excluded from advancements in HIV medicine to an area of central concern and knowledge production within the increasingly popular field of global health science Drawing on research conducted in the U S and Uganda during the mid 2000s Crane provides a fascinating ethnographic account of the transnational flow of knowledge politics and research money as well as blood samples viruses and drugs She takes readers to underfunded Ugandan HIV clinics as well as to laboratories and conference rooms in wealthy American cities like San Francisco and Seattle where American and Ugandan experts struggle to forge shared knowledge about the AIDS epidemic The resulting uncomfortable mix of preventable suffering humanitarian sentiment and scientific ambition shows how global health research partnerships may paradoxically benefit from the very inequalities they aspire to redress A work of outstanding interdisciplinary scholarship Scrambling for Africa will be of interest to audiences in anthropology science and technology studies African studies and the medical humanities **HIV/AIDS** John E. Glass Ph.D.,Kathy Stolley,2009-08-25 The history symptoms prevention and current issues surrounding HIV and AIDS are discussed along with a focus on special populations struggling with the disease Once thought to be a disease of homosexuals and drug abusers AIDS has now impacted people across cultures genders and sexual orientations Despite activism new research and treatments many people are still dying from this disease HIV AIDS offers a comprehensive one volume resource that traces the history of the disease and discusses prevention along with current research and treatment It examines issues such as care giving health care settings human rights pregnancy and insurance The incidence and prognosis for the disease among special populations as well as their needs and struggles are covered in detail These groups include drug and alcohol abusers the gay and lesbian community minority communities pediatric patients prisoners senior citizens and women With education the key to both prevention and care of those infected this volume is an invaluable resource for students and general readers HIV/AIDS in South Africa 25 Years On Poul Rohleder,Leslie Swartz,Seth C.
