NASA EP. United States. National Aeronautics and Space Administration, 1968      **Critical issues in the history of spaceflight** Steven J. Dick, 2018      *Critical Issues in the History of Spaceflight* Stephen J. Dick, Steven J. Dick, Roger D. Launius, 2006 In March 2005 the NASA History Division and the Division of Space History at the National Air and Space Museum brought together a distinguished group of scholars to consider the state of the discipline of space history This volume is a collection of essays based on those deliberations The meeting took place at a time of extraordinary transformation for NASA stemming from the new Vision of Space Exploration announced by President George W Bush in January 2004 to go to the Moon Mars and beyond This Vision in turn stemmed from a deep reevaluation of NASA's goals in the wake of the Space Shuttle Columbia accident and the recommendations of the Columbia Accident Investigation Board The new goals were seen as initiating a New Age of Exploration and were placed in the context of the importance of exploration and discovery to the American experiences Amazon      *The Kremlin and the Cosmos* Nicholas Daniloff, 1972 This is the first book by a Westerner to trace the development of the Russian space program from its beginnings in the late nineteenth century through the enormous success of Sputnik to the crucial decision secretly arrived at and skillfully concealed not to continue in the race to place a man on the moon in the 1960s Nicholas Daniloff who spent four years as a reporter in Moscow shows that the roots of Soviet space achievement run deep The theoretical foundation was laid around the turn of the century by the self-taught scientist Konstantin E Tsiolkovsky who inspired a whole generation of pioneers in the 1930s These same pioneers became the top scientists and administrators of the space program in the 1950s and the 1960s The author has drawn on public and private sources including information provided by defectors to the West to give us the most complete account thus far of the secret Soviet space apparatus the motivation and status and anonymity of the men who have provided its leadership the balance between scientific research weapons development and propaganda considerations the cost both in rubles and in lives of gaining an exploitable early lead over the Americans and the probable future course of the program including the real likelihood of Soviet initiatives toward joint Russian American cooperation in space exploration

**The Living Cosmos** Chris Impey, 2011-06-02 Considering the development of life on Earth the existence of life in extreme environments and the potential for life elsewhere in the Universe this book gives a fascinating insight into our place in the Universe Chris Impey leads the reader through the history from the Copernican revolution to the emergence of the field of astrobiology the study of life in the cosmos He examines how life on Earth began exploring its incredible variety and the extreme environments in which it can survive Finally Impey turns his attention to our Solar System and the planets beyond discussing whether there may be life elsewhere in the Universe Written in non-technical language this book is ideal for anyone wanting to know more about astrobiology and how it is changing our views of life and the Universe An accompanying website available at [www.cambridge.org/9780521173841](http://www.cambridge.org/9780521173841) features podcasts articles and news stories on
