Krollermuller The First Hundred Years:

Kroller-Muller the First Hundred Years R.W. Oxenaar, 1989 **Kröller-Müller**, 1989 The Making of Place John Dixon Hunt, 2015-11-15 Gardening is rich in tradition and many gardens are explicitly designed to refer to or honor the past But garden design is also rich in innovation and in The Making of Place John Dixon Hunt explores the wide varieties of approaches aesthetics and achievements in garden design throughout the world today The gardens Hunt explores offer surprising new ideas about how we can carve out a space for respite in nature Taking readers to gardens public and private busy and hidden away to botanical gardens small parks university campuses and vernacular gardens Hunt showcases the differences between cultures and countries around the globe including the United States United Kingdom France Germany China and Australia Richly illustrated The Making of Place is sure to enchant and inspire even the most modest of home gardeners The Museum of the Future Karl Borromäus Murr, 2024-09-09 Peter Sloterdijk sees our digitalized world in a growing spatial crisis accompanied by the danger of a general virtuality of all relationships Others view the digitalization of the world as opening up a grassroots democratic space that allows everyone access to culture Against this backdrop this anthology examines the spatial characteristics of the museum between physical place and virtual space The chapters collected here approach the museum space from various disciplinary perspectives such as philosophy history art history architecture scenography museum education and curatorial studies At the same time the contributions by international museum experts are assigned to different literary genres fundamental considerations alternate with think pieces case studies and interviews Museum Space Kali Tzortzi, 2016-03-09 Museums are among the iconic buildings of the twenty first century as remarkable for their architectural diversity as for the variety of collections they display But how does the architecture of museums affect our experience as visitors This book proposes that by seeing space as common ground between architecture and museology and so between the museum building and its display we can illuminate the individuality of each museum and the distinctive experience it offers for example how some museums create a sense of personal exploration while others are more intensely didactic and how the visit in some cases is transformed into a spatial experience and in other cases into a more social event The book starts with an overview of the history of museum buildings and display strategies and a discussion of theoretical and critical approaches It then focuses on specific museums as in depth case studies and uses methods of spatial analysis to look at the key design choices available to architects and curators and their effects on visitors behaviour Theoretically grounded methodologically original and richly illustrated this book will equip students researchers and professionals in the fields of architecture museum studies curating exhibition design and cultural studies with a guide for studying museums and a theoretical framework for their interpretation Van Gogh to Mondrian Piet de Jonge, 2004 The Kroller Muller Museum is one of the great art collections in Europe yet it remains unknown to many Americans because of its remote location in the Hoge Veluwe National Park in rural southeast Netherlands This beautifully

illustrated book features highlights from the Museum's collection of late nineteenth and early twentieth century art including more than a score of works by Vincent van Gogh. The Museum is the result of the passion of a singular collector Helene Kroller Muller 1869-1939. The wife of a Dutch shipping magnate, she used almost unlimited funds to amass an astounding collection in a short period of time. Beginning in the 1910s, she collected voraciously, not only Van Gogh but Neo Impressionist masters Seurat, Signac, and Denis, and Symbolists Redon and Toorop. She patronized and supported artists who were pioneering abstraction, particularly Mondrian, Van Doesburg, and Van der Leek, and collected the Cubists including Picasso, Gris, and Leger. Mrs Kroller Muller had a consuming desire to create a museum where her collection could be displayed for the public. Over a period of more than twenty-five years, she worked with some of the leading architects of the early twentieth century: H. P. Berlage, Mies van der Rohe, and Henry van de Velde, and finally in 1938 her dream was realized with the opening of the institution that bears her name.

Book jacket Henry van de Velde: Henry van de Velde, 2022-10-25. The first English collection of writings by Henry van de Velde, one of the most influential designers and theorists of the twentieth century. Belgian artist, architect, designer, and theorist, Henry van de Velde (1863-1957) was a highly original and influential figure in Europe, beginning in the 1890s. A founding member of the Art Nouveau and Jugendstil movements, he also directed the Grand Ducal Saxon School of Arts and Crafts in Weimar, Germany, which eventually became the Bauhaus under Walter Gropius. This selection of twenty-six essays, translated from French and German, includes van de Velde's writings on William Morris and the English Arts and Crafts movement, Neo Impressionist painting, and relationships between ornament, line, and abstraction in German aesthetics. The texts trace the evolution of van de Velde's thoughts during his most productive period as a theorist in the artistic debates in France, Germany, Belgium, and the Netherlands. Katherine M. Kuenzli expertly guides readers to see how van de Velde's writings reconcile themes of aesthetics and function, and expression and reason throughout the artistic periods and regions represented by these texts. With introductory discussions of each essay and full annotations, this is an essential volume for a broad range of scholars and students of the history of fine and applied arts and ideas.

Henry Van De Velde on Rational Beauty, Empathy and Ornament Elie George Haddad, 2022-09-22. This book explores the different aspects of Henry van de Velde's creative activity through a study of his writings and major works of his German period (1900-1916), including his unpublished manuscript on ornament. The study casts light on this major figure in Early Modern architecture, specifically on his aesthetic theory centered around themes such as rational conception and empathy. This study focuses on this specific period of van de Velde's work as it constitutes the period of his greatest activity as a designer, teacher, and architect. While examining the relation between his writings and his built works, it thematically addresses the different architectural works realized by the architect during this period.

The Artists of De Stijl Donald Langmead, 2000-07-30. This guide summarizes and evaluates the available literature concerning the Dutch artistic movement De Stijl, which was headed by art critic and painter Theo van Doesburg, and was comprised of such architects and artists as J. J. P. Oud, Piet

Mondrian Rovert van t Hoff and Georges Vantongerloo The loose knit group took its name from the avant garde journal they first published in October 1917 De Stijl The Style Although it was limited to Holland De Stijl promoted ideas about a universal art combining tenets of theosophy an holistic view of the oneness of all things including arts and culture and socialism This bibliography examines publications that deal with the movement and with affiliated groups and individual members Art historians and scholars of modern and of Dutch art and architecture will appreciate this comprehensive tool for further research Within individual sections for the movement and for its members entries are chronologically arranged with separate categories for books monographs and catalogs and periodicals A final section analyzes and presents the contents of the journal De Stijl

Henry Van de Velde Katherine M. Kuenzli, 2019-01-01 The painter designer and architect Henry van de Velde 1863 1957 played a crucial role in expanding modernist aesthetics beyond Paris and beyond painting Opposing growing nationalism around 1900 he sought to make painting the basis of an aesthetic that transcended boundaries between the arts and between nations through his work in Belgium France Germany and the Netherlands Van de Velde s designs for homes museums and theaters received international recognition The artist often associated with the Art Nouveau and Jugendstil developed a style of abstraction that he taught in his School of Applied Arts in Weimar the immediate precursor of and model for the Bauhaus As a leading member of the German Werkbund he helped shaped the fields of modern architecture and design This long awaited book the first major work on van de Velde in English firmly positions him as one of the twentieth century s most influential artists and an essential voice within the modern movement

SPECIALIST *The Annenberg Collection* Metropolitan Museum of Art (New York, N.Y.), Colin B. Bailey, 2009 The Walter and Leonore Annenberg Collection of Impressionist and Post Impressionist paintings watercolors and drawings constitutes one of the most remarkable groupings of avant garde works of art from the mid 19th to the early 20th century ever given to The Metropolitan Museum of Art A revised and expanded edition of the 1989 publication Masterpieces of Impressionism and Post Impressionism The Annenberg Collection this volume presents more than fifty masterworks by such luminaries as Manet Degas Morisot Renoir Monet Cezanne Gauguin Van Gogh Picasso and Matisse accompanied by elucidating texts and a wealth of comparative illustrations From publisher

Sir John Soane? Influence on Architecture from 1791 Oliver Bradbury, 2017-07-05 Sir John Soane s Influence on Architecture from 1791 A Continuing Legacy is the first in depth study of this eighteenth century British architect s impact on the work of others extending globally and still indeed the case over 200 years later Author Oliver Bradbury presents a compelling argument that the influence of Soane

1753 1837 has persevered through the centuries rather than waning around the time of his death Through examinations of internationally renowned architects from Benjamin Henry Latrobe to Philip Johnson as well as a number of not so well known Soanean disciples Bradbury posits that Soane is perhaps second only to Palladio in terms of the longevity of his influence on architecture through the course of more than two centuries from the early 1790s to today concluding with the recent return to pure revivalism Previous investigations have been limited to focusing on Soane s late Georgian and then post modern influence this is the first in depth study of his impact over the course of two centuries Through this survey Bradbury demonstrates that Soane s influence has been truly international in the pre modern era reaching throughout the British Isles and beyond to North America and even colonial Australia Through his inclusion of select detailed case studies Bradbury contends that Soane s is a continuing not negated legacy in architecture *L'architettura del parco nel disegno della città* Mauro Vincenti,2010 **Annual Bibliography of Modern Art** Museum of Modern Art (New York, N.Y.). Library,1992 **100** Gennaro Postiglione,2004 This volume features 100 homes of different architects **Drawings from the Kröller-Müller National Museum, Otterlo** William Slattery Lieberman,1973 *Proceedings, American Philosophical Society (vol. 115, No. 2, 1971)* ,
