Bibliography of Philosophy, Psychology, and Cognate Subjects ,1905 *Music as Thought* Mark Evan Bonds,2015-07-28 Before the nineteenth century instrumental music was considered inferior to vocal music. Kant described wordless music as more pleasure than culture and Rousseau dismissed it for its inability to convey concepts. But by the early 1800s a dramatic shift was under way. Purely instrumental music was now being hailed as a means to knowledge and embraced precisely because of its independence from the limits of language. What had once been perceived as entertainment was heard increasingly as a vehicle of thought. Listening had become a way of knowing. Music as Thought traces the roots of this fundamental shift in attitudes toward listening in the late eighteenth and early nineteenth centuries. Focusing on responses to the symphony in the age of Beethoven, Mark Evan Bonds draws on contemporary accounts and a range of sources philosophical literary political and musical to reveal how this music was experienced by those who heard it first. Music as Thought is a fascinating reinterpretation of the causes and effects of a revolution in listening.
